DATA STREAMS IN LINKED.SWISSBIB.CH

THE SWISS METACATALOG IN THE LINKED OPEN DATA CLOUD

The project linked.swissbib.ch integrates the metacatalog swissbib into the semantic web, together with the creation of a Linked Data service. This implies the transformation of the metadata from different Swiss library networks into an RDF based format, its enrichment and its publication. Main challenges arise from the requirement of fully automated processes to allow daily updates.

Data reception: deduplication, clustering, ...

[MARC/XML]

Transformation

(with Java/XSLT)

[MARC/XML]

> [SOLR/XML]

Transformation

(with Metafacture)

[MARC/XML] > [JSON-LD]

Preprocessing

[JSON-LD] > [N-TRIPLE]

URI ATTRIBUTION

The first of the four Linked Data principles is realised during the transformation. The (still not resolved) challenge consist of creating persistent URI upon the basis of records deduplicated every day.

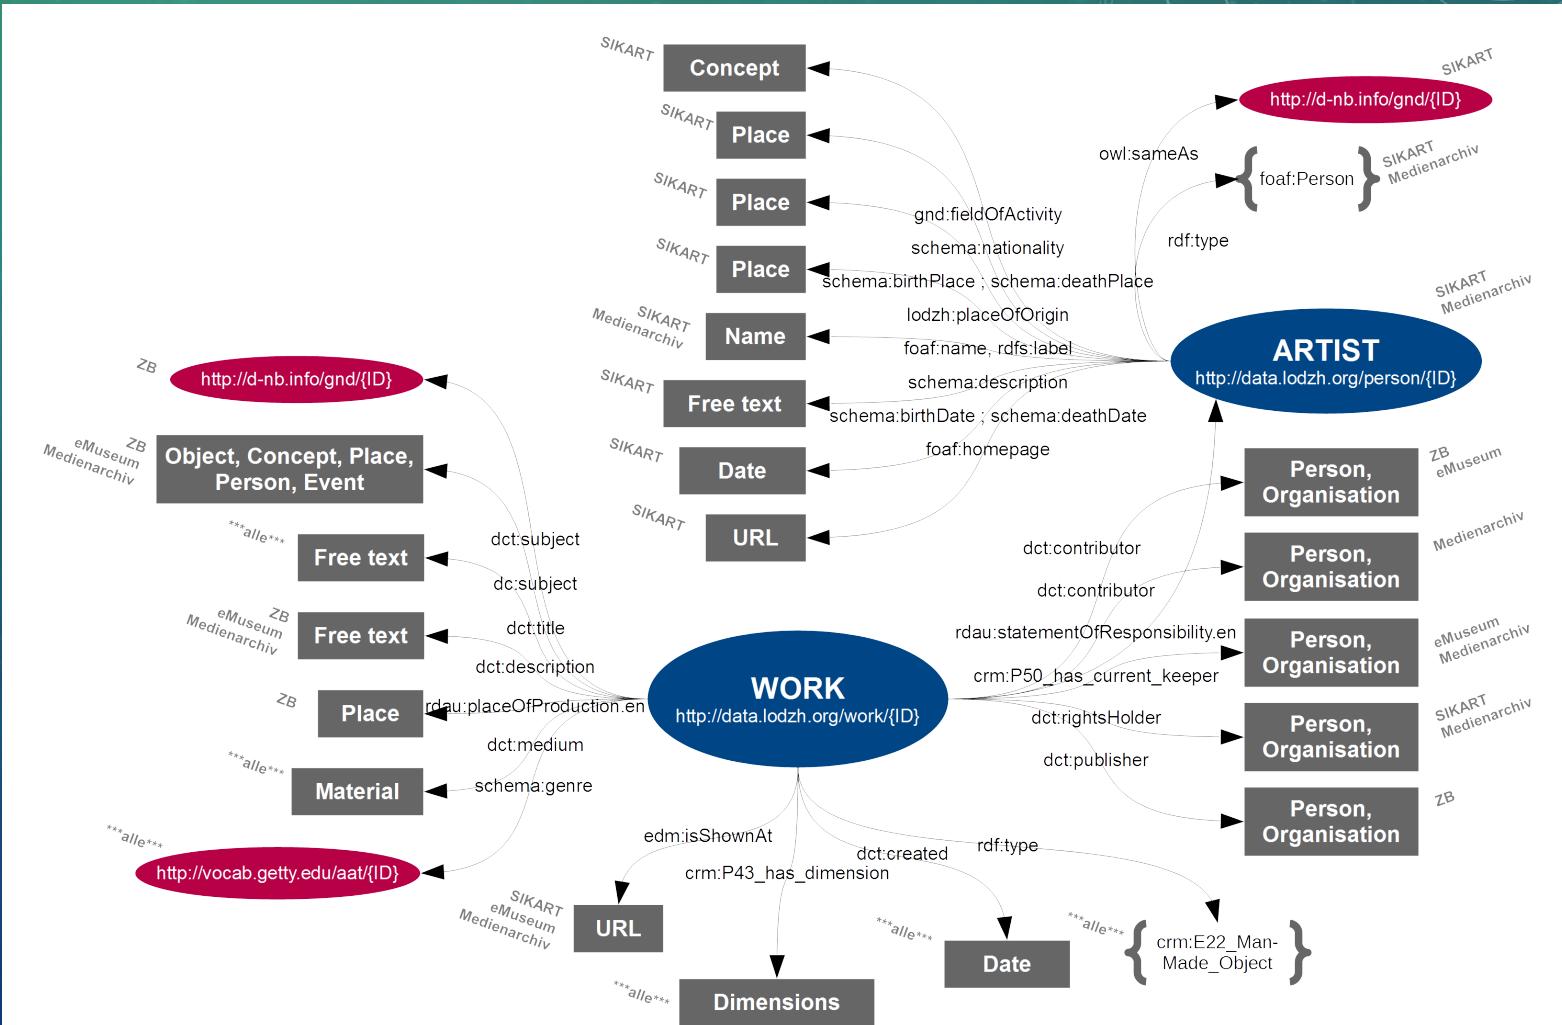

Problem: Notwendigkeit persistenter Identifikation,
im Idealfall dynamisch persistenter Identifikation

LINKED OPEN DATA ZURICH (LODZ)

Problem: Diversität und feine Granularität ohne absolute Notwendigkeit einer semantischen Spezifikation

Prongué et al. 2017

IDENTIFIZIEREN: PERSISTENT IDENTIFIER (PID)

A persistent identifier

is a long-lasting and biunique reference to a digital resource.*

**biunique: unique in both directions (bijective) / eineindeutig*

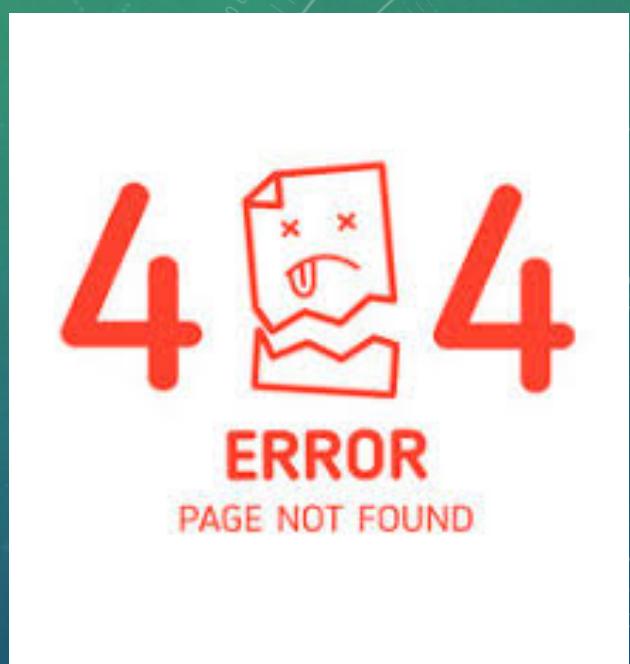

Ein Art von ISBN für Daten und alle digitalen Ressourcen.

ZWECK

- Dauerhafter (nicht permanenter) Zugang
- Verhindern von Fehlermeldungen

<https://www.interserver.net/tips/kb/404-error-fix/>

PERSISTENT NICHT PERMANENT

10 persistent myths about PIDs by John Kunze

- PIDs guarantee access. Get real. All PID services run on evolving software/hardware that no vendor warranties.
- PIDs rarely break. Nonsense. Millions of PIDs are broken. Updating redirection tables is real work for you and your successors.
- ...

Myth 1: PIDs guarantee access. Get real. All PID services run on evolving software/hardware that no vendor warranties. How could anyone, let alone poor non-profits, change that?

John Kunze @jakkbl · Aug 24, 2018
Replies to [@jakkbl](#)
Myth 2: PIDs rarely break. Nonsense. Millions of PIDs are broken. Updating redirection tables is real work for you and your successors. (You do have a succession plan, right?)

John Kunze @jakkbl · Aug 24, 2018
Replies to [@jakkbl](#)
Myth 3: PIDs must not be URLs. What a crock. PIDs not carried inside clickable URLs are irrelevant or only of academic interest.

PIDs und cool URIs (Bazzanella, Bortoli, Bouquet 2013)

Feature	PIDs	Cool URIs
Resolver	YES	NO
Authority	YES	NO
Naming authorities	YES	NO
Level of trust	HIGH	LOW
Policies	YES	NO
Persistence	YES	NO
Actionability of IDs	Partially	YES
Uniqueness	YES	NO
Content change	NO	YES
Content negotiation	NO	YES
Cross linkage	NO	YES
Effort for implementation	HIGH	LOW
Costs for users	Potentially HIGH	LOW
Sustainability issues	MANY	FEW
Identified entities	Mainly digital objects	Everything
Bridge metadata	NO	YES

4. FAZIT

- Hohes Potenzial in der Kombination von LOD und PIDs
- Eine Fusion der Aspekte “Trust” und Persistenz auf Basis einer klareren und logischeren Struktur
- Bessere Modularität (“thinking in blocks and layers”)
