

Transitioning journals to open access via stakeholder governed infrastructures

Building a trustworthy platform for publishing journals

Stakeholder Governance

Common challenges/opportunities of an Open Access infrastructure

- Align metadata structures to national/international standard
- Compliance to funder requirements
- Permanent identifiers
- Open licensing compliant
- Mechanisms for preservation and archiving
- Support for users of the platform
- Sustainable funding over time

Offer based on users needs:

- An affordable technical solution as an alternative

Future plans:

- Collaboration between platforms?
- Collaboration with other essential infrastructures for OA?
