

Please choose the total number of FAIR data assessment metrics developed by FAIRsFAIR.

# Which of the following aspects are documented in the FAIRsFAIR data object metric specification (v0.3)?

Persistent identifier of the metric

Metric descriptions

Metric alignment with FAIR principle(s)

Metric alignment with CoreTrustSeal requirement(s)

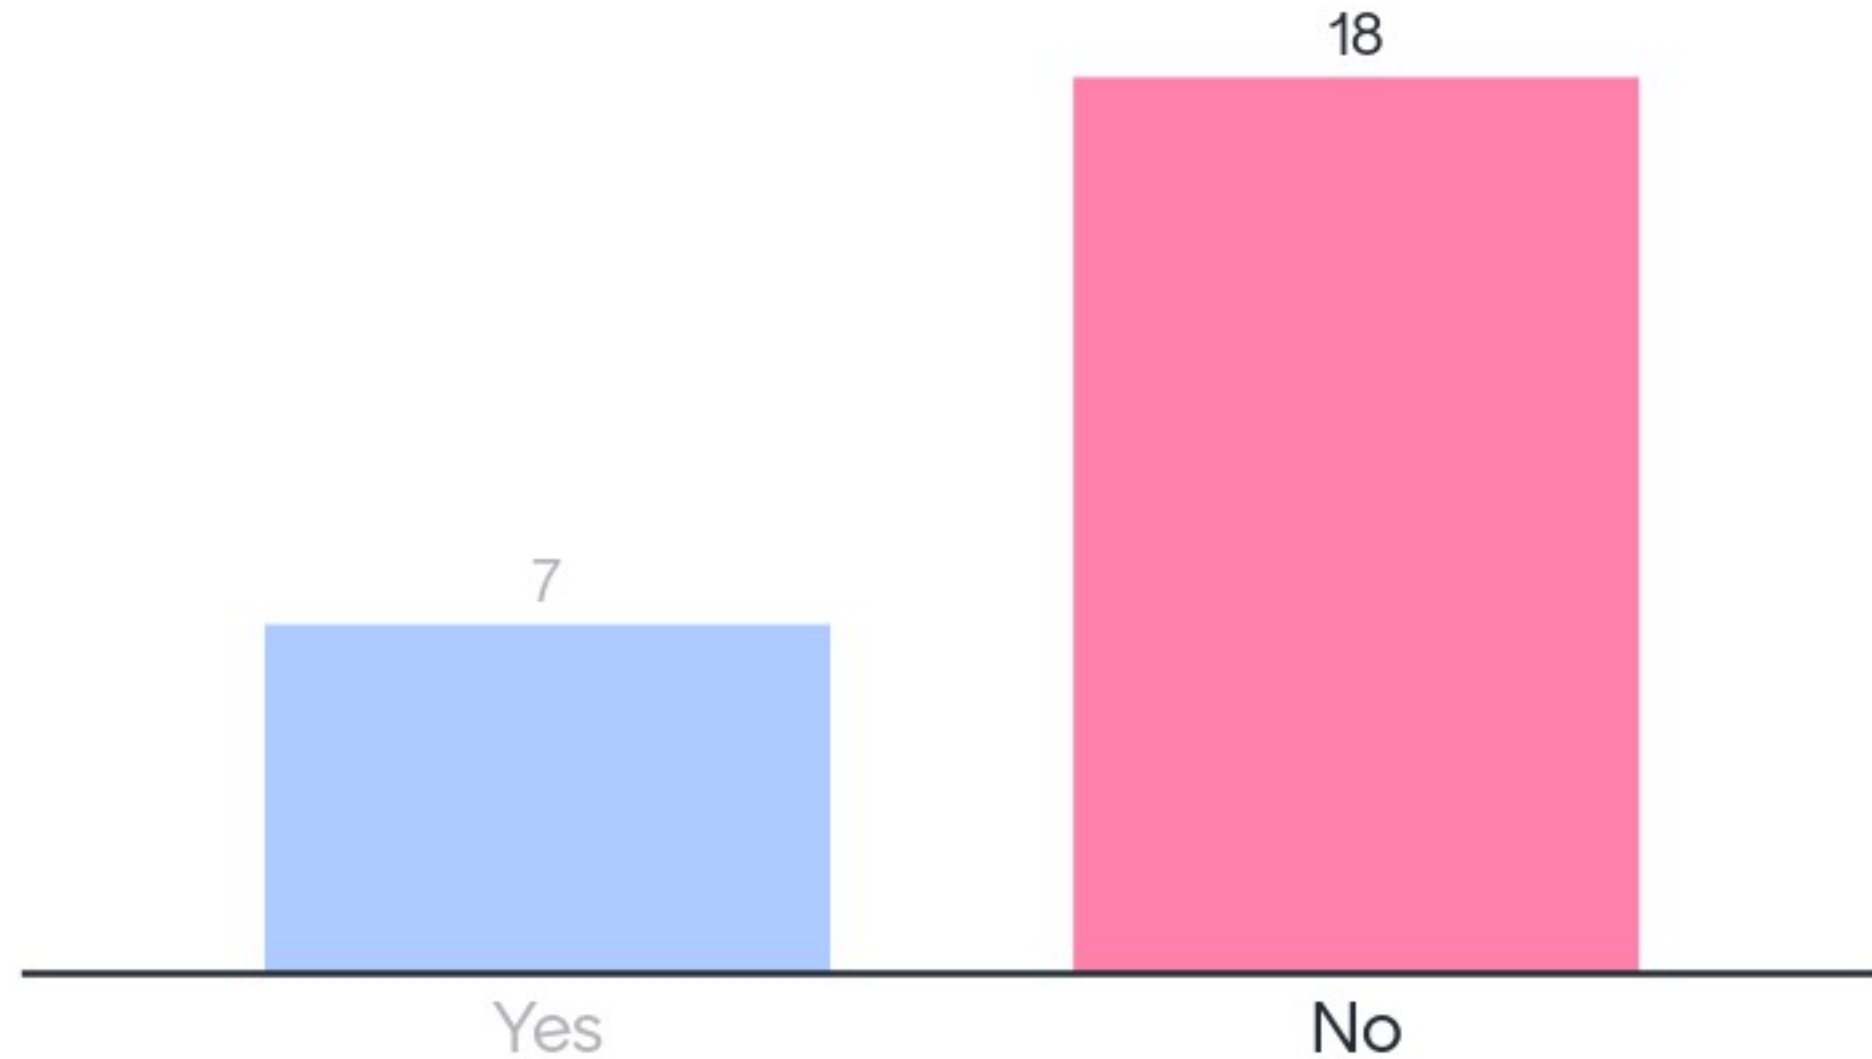

Assessment methods

# How many data metrics have so far been implemented in F-UJI?

F-UJI only uses the metadata of a dataset to assess the dataset's FAIRness.

# I want to test F-UJI. How do I get started?

Download its source repository in the Github and install it locally.

Email the developers of the tool

Request credentials to access the test service from the developers

Based on today's presentation, please summarize the automated assessment tool (F-UJI) in TWO words.
