OpenAIRE

RCAAP – PT Repositories Network

Interoperability is the key

- **Guidelines implemented in all Portuguese repositories**

- Mandatory for integration in the National Portal

- National Portal upcoming version will support Guidelines V4

- EC/FCT projects embedded in repositories deposit workflow via OpenAIRE API

RCAAP Project
- National Initiative in Portugal
- Network for scientific resources (repositories, journals, portals, research data repositories)
- Integrates La Referencia Contents
- Has a content policy based on OpenAIRE guidelines
- Provides Dspace hosting service where some developments have been done!

Repositories managers workflows

PROVIDE (real) added value services

Open Science Funder Policies

Fundação para a Ciência e a Tecnologia - FCT
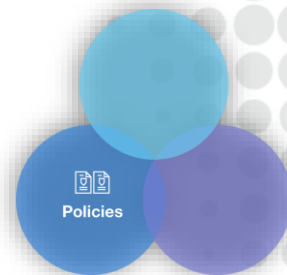

- **FCT, the major national funder, launched (May 2014) the Open Access policy fully in line with EC recommendations.**

- **The mandate requires the deposit in a repository of the Portuguese repositories network – RCAAP.**

- **Portugal has not implemented a national Open Science policy yet.**
  - **RDM (Open Data)** policy proposal, aligned with H2020 requirements and Science Europe recommendations, is under approval by the FCT board.
  - Although there is no mandate to deposit research data, FCT's encourages grant candidates to present research data management plans.
    - Argos was recently chosen by the FCT for trial use in support of the RDM policy implementation.

Policies

OpenAIRE

OS & RDM support and training

Benefiting from OpenAIRE training
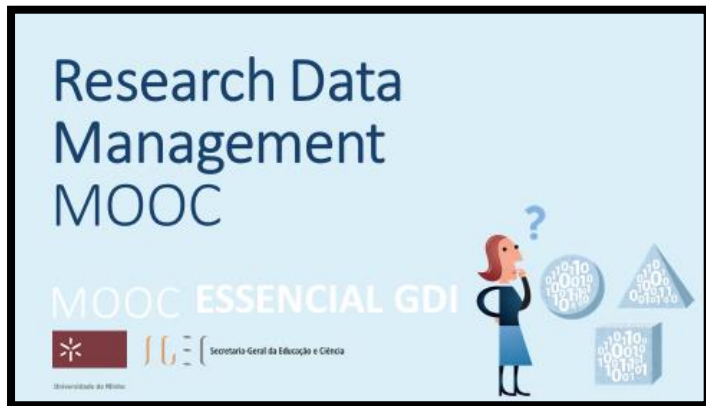

MOOC developed by Uminho (relying in OpenAIRE and FOSTER training resources) to train young researchers and PHD students
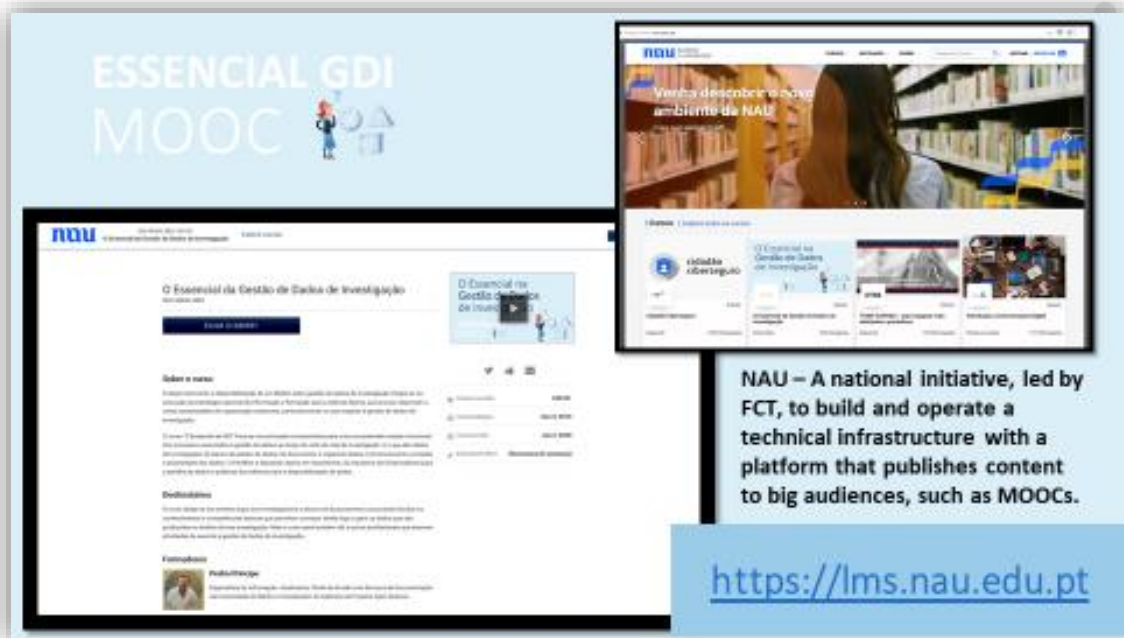

NAU – A national initiative, led by FCT, to build and operate a technical infrastructure with a platform that publishes content to big audiences, such as MOOCs.

THE COURSE

FORMAT

6 Modules with around **30 hours** effort rate

**Contents**: Text, videos, diagrams with CC-BY license, **Evaluation**: tasks & quizzes.

TARGET

It's aimed first at **researchers and doctoral students** - providing the basic knowledge and skills to start managing their research data.

RESULTS

Registered participants: **1608**

Completion certified: **430**

ESSENCIAL GDI
MOOC
COURSE MODULES

1 - Introduction to Research Data Management

2 - Data Management Plans

3 - Documenting and organizing data

4 - Data licensing and data protection

5 - Sharing and depositing data in repositories

6 - Funders requirements for data sharing and publishers policies for data availability

OS trainers community of practice

Building on the European Training Community of Practice

- **Train-the-trainer bootcamps (FOSTER, OpenAIRE, FIT4RRI) skilled over 50 trainers**
- **Open Science PT CoP created last Sept. 25$^{th.}$ (support in this initial phase by OpenAIRE NOAD)**

Thank you!
