We welcome little people

Come prepared to contribute

& pets

and have fun!

ARDC

Australian Research Data Commons

We acknowledge and celebrate the First Australians on whose traditional lands we meet, and we pay our respect to the elders past and present. We extend that respect to Aboriginal and Torres Strait Islander peoples joining us today.

Your hosts today

Mark Crowe

Anastasios Papaioannou

Thanks also to Darya Vanichkina
Sydney Informatics Hub

Developing Sharing Guidelines

- Training development is slow and expensive

- Few of us are funded for open-source content development

- Training needs are similar between organisations

- Sharing of material can save time, money, and lead to better outcomes

- http://bit.ly/ARDC2020_session7

The Opportunity

- Sharing allows organisations to expand their training portfolios for minimal cost

- Shared maintenance improves quality and reduces costs

- Collaborative development of material is faster and cheaper, and allows access to a larger knowledge pool

- Use of common training material leads to a more consistent syllabus to researchers

The Challenges

- Must show clear value to our host institutions; financial as well as reputational

- Must retain control over material and IP

- Shared development and maintenance carry an administrative overhead

Today's goals

- Is this a viable project with community support?

- What case studies do we have to demonstrate value?

- What are the other issues, or other benefits?

- *Is there support for a working group to take on this project?*

Day 3: Wednesday 28 October - Next Session

Session 8 - 2.00 pm (AEDT)

Community action #3: Time to fill the gaps: Building out
a national training inventory
