ORCID-Austria Online Tech-Workshop

25.11.2020

About me & 4Science

Andrea Bollini, CTO at 4Science

DSpace committer (involved since v. 1.2), Open Source enthusiast, contributor of Dataverse, DuraCloud, OJS and other projects

Member of the Working Group of COAR Next Generation Repository

Deputy leader of the euroCRIS CERIF TG for CRIS Architecture

Technical Leader of the ORCID Italian Consortium in 2015-2016

Leader of the DSpace 7 REST team

Started DSpace-CRIS back in 2009, open sourced in 2013

OpenAIRE Advance Open Innovation Call

CERTIFIED
Service Provider

What is DSpace-CRIS?

The first open source CRIS system

More than 100 installations
Worldwide, in all continents!

A large community of
German speaking users in
Austria, Switzerland,
Germany

Discussed at DSpace
Anwendertreffen since 2017

Welcome to the Research Information System of the University of Bamberg

The University of Bamberg has a detailed profile in the Humanities, the Social Sciences, Economics and Business Administration, the Natural Sciences and Education as well as in the Information Systems and Applied Computer Sciences. Interdisciplinary research activities contribute to the University's unique place in Germany's scientific landscape.

The Research Information System (Forschungsinformationssystem = FIS) offers you a coherent overview over the various research activities and results from the entire range of disciplines at the City-University and its affiliated institutes. The FIS also serves as the publication-system of the University of Bamberg, where academic publications and research data can be published in Open Access.

You can find further information about research activities and about the transfer of knowledge and technology as well as our research profile on our websites on research and transfer.

Important News

ORCID in the FIS

ORCID is an internationally widespread identifier for researchers. Do you already have an ORCID ID? You can link it to your FIS profile and make your research results even more visible. More information

Betaphase REPOSIT

The new **REPOSIT**ium of Hamburg University of Applied Sciences for publications, research data and research information is currently still under development. At the moment, the collection "Publications without full text" (formerly "Publication Database") of HAW Hamburg and document server with the published theses (diploma, bachelor and master theses) of the students of HAW Hamburg are available for you.

The individual upload of data and documents as well as the creation of datasets is not yet activated for all members of Hamburg University of Applied Sciences, but will be possible in the near future.

REPOSIT is based on the open source software solution DSpace and the extension DSpace-CRIS. The Hamburg University of Technology provides the hosting and the support is carried out in cooperation with the The Carl von Ossietzky State and University Library Hamburg.

We are looking forward to your comments on the adaptation and improvement of this website's usability and design. If you have any questions, please contact openaccess@haw-hamburg.de.

Abstract Introduction: Leukotriene-modifying agents (LTMs) including montelukast, zafirlukast, and zileuton are approved by the US Food and Drug Administration (FDA) for the treatment of asthma and allergic rhinitis. Various neuropsychiatric events (NEs) have been reported; however, the evidence of the association is conflicting. This systematic review investigates the association between NEs and LTMs by assessing the relevant published literature. Methods: PubMed, EMBASE, MEDLINE, and Cochrane Library were searched using keywords. Studies designed to investigate the association were eligible for inclusion without restriction to any study design or language. The primary outcome was defined as suicidal conditions, while secondary outcomes included all other NEs. Results: Thirty-three studies were included for a narrative review. Four observational studies did not find a significant association, while ten pharmacovigilance studies using different global databases detected the signals. Notably, some studies suggest that the FDA warning issued in 2008 might have influenced the reporting rate of NEs as a result of increased awareness. Limitations: The risk of NEs was not quantified, because of the lack of randomized controlled trials and observational studies investigating the association. Conclusion: Many pharmacovigilance studies have been conducted to determine the association between NEs and LTMs, but there is limited evidence from observational studies. High-quality epidemiological studies should be conducted to evaluate the association and quantify the risk, not only in children, but also in adults. © 2017, Springer International Publishing AG.

DSpace-CRIS & ORCID Integration

Full integration already available in the current version and ongoing for the next DSpace-CRIS 7

Based on the ORCID v3 API

Verified and approved by the ORCID Support Team (of course it needs organisational best practices in place as well)

How to enable it

1

Get your application credentials: Public, Member, Premium API are all supported

How to enable it

1

Register a client application: Sandbox Member API

To access the Sandbox Member API service, please enter the following information about your client application and your organization. If you are a member and need to request Production Member API credentials, please fill out the [Production Member API application form](#).

Note: *This process is not fully automated. There may be a delay before we respond to you with credentials after you complete this form.*

Stay in touch! *Join our [ORCID API Users mailing list](#) to learn the latest updates about the ORCID API.*

General Information

Registration for the development sandbox service is open to anyone. For more information about credentials and how to complete this form see the [Register a Client Application](#) article.

Update existing credentials?

- No
 Yes

Note to ORCID staff

Use this field to let us know if you're using a vendor system, include additional redirect URIs, or if there is anything else you'd like to communicate to the ORCID team.

Email address *

Please enter a valid email address to enable us to correspond regarding your request. This cannot be a mailinator email address.

Your name

Name of your organization *

Credential Type

In the production registry, the API features that members have access to are determined by their membership level. While [ORCID membership](#) isn't required in order to access the Sandbox, Sandbox credentials can be set to reflect the API features available at different [membership levels](#).

MY ORCID RECORD English

Registry Search

FOR RESEARCHERS FOR ORGANIZATIONS ABOUT HELP

FUNDERS PUBLISHERS RESEARCH ORGANIZATIONS OUTREACH RESOURCES INTEGRATE WITH THE ORCID API

THE ORCID API
[REGISTER A CLIENT APPLICATION](#)

Access to any of the ORCID APIs requires a set of credentials consisting of a Client ID and a Client Secret. To register for API credentials, please choose the applicable API from the list below, or [learn more about the differences between the Member and Public APIs](#)

- Sandbox Member API**
The Sandbox Member API allows organizations to test Member API functions without affecting production records. Membership is not required in order to access the Sandbox Member API.
Note: *The Sandbox is not connected to the production ORCID registry and no information is shared between the two systems, however, the Sandbox has identical functionality, with the exception of the behavior of emails, and connections outside systems. [Learn more about the sandbox environment.](#)*
- Production Member API**
If you are an ORCID member, please use this option to register for Production Member API credentials. Not a member? [Learn more about ORCID membership.](#)
- Public API**
The Public API allows organizations that are not ORCID members to access a limit set of API features, including authenticating users' ORCID IDs and retrieving publicly-visible information from the ORCID registry.

How to enable it

1

Get your application credentials: Public, Member, Premium API are all supported

2

Configure your DSpace-CRIS to use the right API, credentials, scopes

bibtex.template

1)

How to enable it

1

Get your application credentials: Public, Member, Premium API are all supported

2

Configure your DSpace-CRIS to use the right API and credentials

3

Improve the configuration to reflect change to your metadata

How it works

Authorization token and preferences are stored in the Researcher Profile properties (metadata)

The application listens for changes related to objects that could be synchronized with ORCID, changes are filtered out depending on the preferences and stored in a processing queue (backend by a database table)

The application uses

- the client application credential to retrieve generic data from ORCID (such as lookup author names, import publications by others, improve researchers' profiles, etc.)
- the researcher authorization token to query for their related information so to possibly show / import also information reserved to trusted parties

Authentication

Login using the ORCID Credentials can be enabled / disabled

italian english

Log In to DSpace

Use your ORCID or create a new one

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. Click on the ORCID logo to sign in with your existent record or create a new one.

Link a local profile to ORCID

The researcher can connect their local profile with ORCID or create a new one. This is the only way to get an ORCID, it cannot be input manually!

Link a local profile to ORCID - 2

Connected profile shows the granted authorization and provides instruction / option to disconnect

The screenshot shows a user profile for 'Federico' with a navigation bar containing 'Profile', 'Publications', 'Projects', 'Indicators', 'ORCID', and 'Other'. The 'ORCID' tab is selected and highlighted with a red box. Below the navigation bar, the 'ORCID Authorizations' section is visible. It contains two main panels: 'Granted authorizations' and 'Missing authorizations'. The 'Granted authorizations' panel shows a green 'iD' icon, a green eye icon, and a green refresh icon. Below these icons, the text reads: 'Get your ORCID iD', 'Read your limited-access information', 'Add or update your biographical information', and 'Add or update your research activities'. The 'Missing authorizations' panel is empty and contains a green message box that says: 'Great!!! This box is empty, so you have granted all access rights to use all functions offers by your institution. For more information see [Privacy policy](#)'. At the bottom of the 'ORCID Authorizations' section, there is a light blue banner with the text: 'If you need to remove your ORCID, please contact the repository administrator'.

Link a local profile to ORCID

During the submission process a librarian can identify the authors in the ORCID registry or the system can use the information if provided by the external datasource (pubmed, scopus, etc.)

The image shows a web form for submitting an item, with a popup window for author lookup. The form fields include:

- Authors:** A text input field containing "Westgard, Joshua" and a search icon.
- Author Department:** An empty text input field with a search icon.
- Title *:** A text input field containing "Free World Cities Database".
- Other Titles:** An empty text input field.
- Date of Issue *:** A dropdown menu showing "Month:" and "(No Month)".
- Publisher:** An empty text input field.
- Citation:** An empty text input field.

The popup window, titled "DSpace-CRIS DEMO: DSpace Value Lookup - Google Chrome", shows the results of an author lookup for "Westgard, Joshua":

- Westgard, Joshua(0000-0001-8169-3977)
Local value 'Westgard, Joshua' (not in Naming Authority)
- Westgard, Joshua
Name in "Last, First" format
- Buttons: Accept, See More Results, Cancel

Link a local profile to ORCID

Work has structured data including SELF and PART identifiers and a BibTeX representation as citation

The screenshot shows the ORCID website interface. At the top, there is a navigation bar with the ORCID logo and the tagline "Connecting Research and Researchers". The navigation menu includes "FOR RESEARCHERS", "FOR ORGANIZATIONS", "ABOUT", "HELP", and "SIGN OUT". Below the navigation bar, there are sub-menus for "MY ORCID RECORD", "INBOX (1)", "ACCOUNT SETTINGS", "DEVELOPER TOOLS", and "LEARN MORE".

The main content area displays the user's profile information, including the "Preferred name" and "ORCID ID" (sandbox.orcid.org/0000-0002-9421-192X). A notification banner indicates that "Dspace-CRIS Demo WebSite has updated items in the Work section of your record." A table below the notification shows the details of the update:

From	Subject	Date
▼ DSpace-CRIS Demo WebSite	Your ORCID Record was amended	2016-02-19

The "Work" section is expanded, showing a list of works. The first work is "Test Article for ORCID" from "Sample journal", dated "2015-01-01". The work includes a "SOURCE-WORK-ID: 65" and a "URL: http://demo-dspace-cris.cineca.it/handle/123456789/41". The source is identified as "Dspace-CRIS Demo WebSite".

Include IDs in machine readable outputs

ORCID IDs can be included in any format exposed over OAI-PMH

DSpace-CRIS supports out-of-box the following guidelines where the ORCID IDs are exposed:

- Guidelines for Data Archives (based on DataCite schema v4)
- Guidelines for CRIS Managers (based on CERIF)

Guidelines for Literature Repository v4 can be supported via configuration

Signposting is an approach to make the scholarly web more friendly to machines, exposing relations as Typed Links in HTTP Link headers

DSpace-CRIS 7: Ready to use, out-of-box

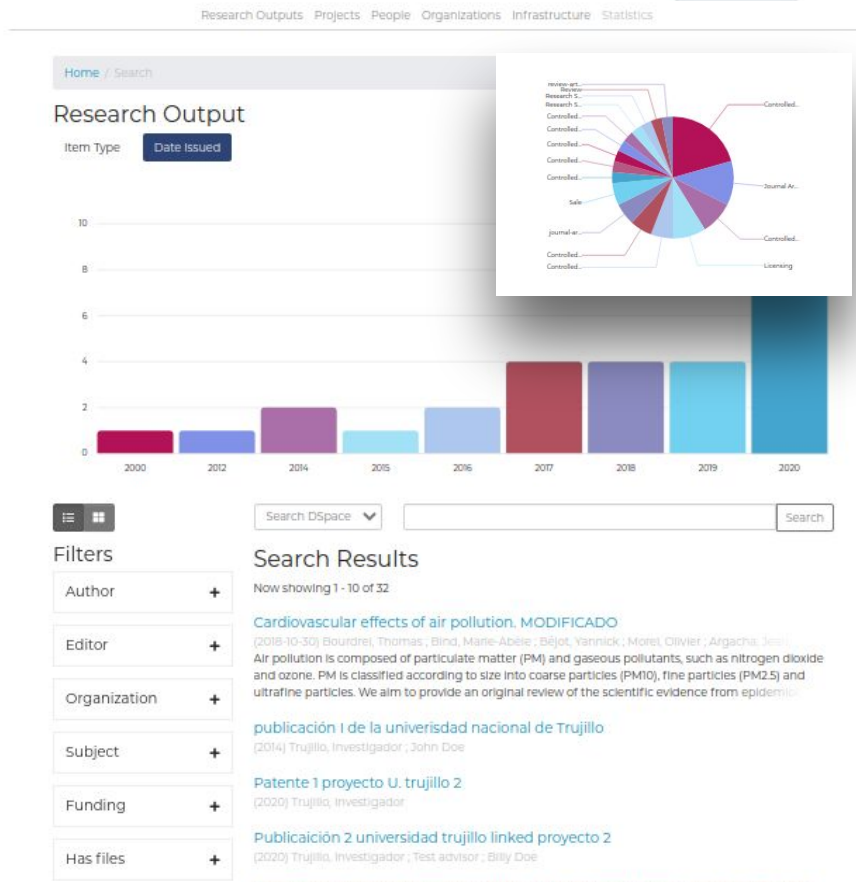

Default data model based on OpenAIRE information space and CRIS guidelines

Support for real CRIS workflows and use cases

- Full ORCID integration (pull & push)
- Profile (self)management and curation, CV export
- data quality checks & tools: deduplication, publications claim/unclaim, publication-patent-project lookup
- fine-grain security

Easy to maintain, most frequent administrative tasks can be performed via UI

Modern UX, full REST API backend

The screenshot displays the DSpace-CRIS 7 interface. At the top, there is a navigation bar with links for Research Outputs, Projects, People, Organizations, Infrastructure, and Statistics. A search bar and a 'Log In' button are also visible. Below the navigation bar, the profile of 'Cortese, Claudio' is shown. The profile includes a photo, a title 'Researcher at Universidad de Lima', and various sections: Profile, Publications, Projects, OrgUnits, Patents, Qualifications, and Other. A red box highlights a PDF icon in the top navigation bar. The profile text includes: 'PHD in Archaeology and lecturer in "Computer Applications in Archaeology" at the Catholic University of Milan. His main interest is management and analysis of data in the cultural heritage area through the use of different methods, standards and technologies, from relational databases to GIS, from Digital Libraries to the Semantic Web. In the historical / archaeological field his working activity is mainly oriented towards the design and creation of databases for several research groups. During the PHD he also gained experience in the use of statistical techniques for the analysis of archaeological data, tools used mainly for the reconstruction of the transformation processes that affected the ancient material culture. In the last decade he worked at the Interuniversity Consortium Cilea and Cineca. Here his interests expanded to the wider field of digital humanities, and materialized mainly in project management and analysis of data and metadata in the context of Digital Library Management Systems for the curating, preservation, reuse and distribution of cultural digital resources. In relation to all these topics he provided consulting services, lessons and courses in universities and in public and private institutions. He currently holds the position of Project Manager and Analyst in the field of digital humanities at 4Science.'

Affiliations
Researcher at Universidad Nacional from 2000 to 2014

Education
Doctor at PhD Archaeology Università Cattolica del Sacro Cuore from 2003 to 2006
