Contributors

Jonathan Prag,James Cummings,James Chartrand,Valeria Vitale,Michael Metcalfe,system,Simona Stoyanova

Autopsy

The fragment could not be found by Tréziny in the excavation stores (2011: 129)

Last Change

2020-11-26 - Simona Stoyanova restructured bibliography

Place of origin (ancient)

Megara Hyblaea

Place of origin (modern)

Megara Iblea

Provenance

The fragment was reported in the excavation journal of Fr. Villard for 26 February 1949, recovered in the NE corner of the Hellenistic structure VI,A (=23,24) , west of the agora.

Coordinates

37.204118, 15.181527

Current Location

Italy, Sicily, Megara Hyblaea, Antiquarium di Megara Hyblaia

Physical Description

Fragment of a marble plaque, of which no detailed description is preserved

Dimensions

Height not recorded cm

Width not recorded cm

Depth not recorded cm

Layout

Text is recorded over two lines

Execution

Engraved

Letter Forms

The omicron is described (Tréziny reporting Fr. Villard) as angular

Letter heights:

Line 1-2: not recorded mm

Interlineation

Interlineation line 1 to 2: not recorded mm

Text

1. ENXP

2. AIO

Apparatus

Text of Tréziny 2011

Translation (en)**Commentary**

The inscription has not been relocated since the original excavations. Villard only mentions its existence in the publication of 1951 ('un fragment

d'inscription funéraire chrétienne du Ve siècle'); Tréziny reports slightly greater detail from the excavation journal, as recorded here.
