

Accessing CSS-Properties in JavaScript

```
<html>
  <head>
    <title>Example Page</title>
    <style>
      /** CSS PROPERTIES **/
      #tag1 {
        height: 100px;
        top: 50px;

        background-color: red;
      }
    </style>
    <script>
      /** Access via JavaScript **/
      var tag1Element =
        document.getElementById('tag1');

      tag1Element.style.height = '200px';
      tag1Element.style.top = '100px';
      tag1Element.style.backgroundColor = 'green';
    </script>
  </head>
  <body>
    <div id="tag1"></div>
  </body>
</html>
```

ExamplePage.html

CSS Property	Access via JavaScript
height: 100px	<i>element.style.height</i> = '100px'
top: 50px	<i>element.style.top</i> = '50px'
background-color: red	<i>element.style.backgroundColor</i> = 'red'
