Excerpt from a coded transcript

F2: Hopefully a warming experience on a cold day. Erm does anyone want to make a start and choose one of these two to pass around? Yes.

P4: I've got some incense.

P1: No idea where it's from.

F2: Well, that's interesting you should say that, is that what you would do with it?

P4: Or I would put potpourri.

F2: Yes, yes.

F1: I think you can open it as well.

P4: Doesn't smell.

F2: Doesn't smell of anything.

F1: Do you have, do you want to have like a closer look and try to open it maybe and see if there's anything inside?

P4: No, I looked and I smelled.

F1: Nothing, okay.

P4: But it might have just disappeared over the years.

F1: Anything else you can notice maybe about the material?

P1: Does it open?

F2: It does. I had difficulty opening it, I must say. Yes, well done.

P2: It does, well done.

F1: Oh there you go.

P1: I've no idea how old this is.

F2: No.

P1: I've a feeling it's not very old, but I might be completely wrong.

Codes (vertical labels):

- P guessing and hypothesising
- F asking questions
- F asking questions - exploration
- F responding to P
- F direction or instruction - prompting
- Origin
- P uncertainty, not knowing or forgetting
- Smell
- Identity or function_purpose
- P asking questions
- P responding to F
- P clarifying
- F validating or encouraging to P
- P changes or introduces new topic or moves conversation on
- Ps responding to each other
- Material
- Age
- Remembering - recapping what has been discussed
- Authenticity
