ASHVIN

Digitising and and transforming the European construction industry

ASHVIN introduces digital twin technologies enabling energy-efficient buildings with a low environmental impact

OUR CONTRIBUTION

Improve Scheduling Capabilities and Accuracy

Support a reliable project planning and the near eradication of project delays

Contribute to the Standardisation for Digital Twins at a European scale

Propose a European wide digital twin standardization scheme

Significantly reduce Construction Costs

Leverage the true potential of the accurate digital twin representation

Towards a Safer & Greener European Construction Industry

Reduce the number of on-site accidents and Increase Resource Efficiency

construction projects

ASHVIN has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 958161
