

The scripts are prepared in Jupyter Notebook.

You can open a static version of them by clicking on the .html files or launch the notebook files (.ipynb) in Jupyter. The script can be then manipulated. To instal Jupyter we recommend the Anaconda distribution.

For simplicity, the data folder was included in the scripts folder.

The following libraries were used:

Pandas 1.0.5

Seaborn 0.10.1

Matplotlib 3.2.2

The scripts are written in Python 3.8.3
