Ambra Project

Welcome to Ambra

What is Ambra?

Ambra is an Open Source platform for publishing Open Access research articles. It provides features for post-publication discussion and versioned articles that allows for a "living" document around which further scientific discoveries can be made. It is licensed under the MIT License.

What is the status of Ambra?

PLOS (Public Library of Science) no longer actively develops Ambra, but maintains it as its operating platform for the full catalog of PLOS journals.

With PLOS focus moving away from Ambra, the platform itself is not likely to be the ideal starting point for a new journal or publishing system. However, it remains viable, and its purposeful design toward solving open access scholarly communication problems may serve as a point of inspiration for future platforms.

KNOWLEDGE
PROJECT

Software - Research - Community - Services - Support

PKP is a multi-university initiative developing (free) open source software and conducting research to improve the quality and reach of scholarly publishing

Public Knowledge Project > Open Journal Systems

Open Journal Systems

Open Journal Systems (OJS) is an open source software application for managing and publishing scholarly journals. Originally developed and released by PKP in 2001 to improve access to research, it is the most widely used open source journal publishing platform in existence, with over 10,000 journals using it worldwide.

(Nielen) OJS :: Inštalácia

System Requirements

Recommended Server Requirements

- 1 PHP \geq 5.5 with MySQL or PostgreSQL support (OJS \geq 3.1.2 would require PHP \geq 7.0).
- 2 MySQL \geq 5.x (or PostgreSQL \geq 9.1.5) with data storage and connection using UTF8.
- 3 Apache \geq 1.3.2x or \geq 2.0.4x or Microsoft IIS 6.
- 4 Operating system: Any OS that supports the above software, including Linux, BSD, Solaris, Mac OS X, Windows.

(Nielen) OJS :: Bezpečnosť

A secure deployment can be best achieved by using the following policies:

- 1 Dedicate a database to OJS; use unique credentials to access it.
- 2 Configure OJS (config.inc.php) to use SHA1 hashing rather than MD5.
- 3 Install SSL certificate and configure OJS (config.inc.php) to use force_ssl_login so that authenticated users communicate with the server via HTTPS.
- 4 Install OJS so that the files directory is NOT a subdirectory of OJS installation and can't be accessed directly via the web server.
- 5 Restrict file permissions as much as possible.
- 6 Configure your server for a regular backup of OJS database, file/submission directory, and OJS installation directory.
- 7 Perform a manual backup when upgrading or performing maintenance.

Požiadavky "*systemu*"

- Súčasť strategického riadenia/plánu (prostriedok, nie cieľ)
- Udržateľnosť z pohľadu atribútov:
 - technických
 - personálnych
 - finančných
- Zodpovednosť

... a keď sa povie
“*System*” ...

(Na príklade OJS)

Funkcionality pre nastavenie “ *Systemu* ”

Technická infraštruktúra pre nastavenie komplexného publikačného procesu a zapojenia metrik.

- Celý pracovný postup redakčnej správy vrátane odosielania článkov, oponentúr a hodnotenia a napokon publikovanie (vrátane generovania DOI).
- Definovanie rolí - administrátor časopisu, šéfredaktor, redaktor, recenzent, autor a čitateľ.
- Má modul, ktorý podporuje predplatné časopisov.
- Dostupná architektúra doplnkov, ktorá umožňuje integrovať nové funkcie. Dostupné doplnky uľahčujú indexovanie v službách Google Scholar a PubMed Central, publikovanie informačných kanálov RSS / Atom pre webové publikovanie a poskytovanie štatistík COUNTER o online použití. OJS tiež vyhovuje LOCKSS, čo pomáha zabezpečiť nepretržitý prístup k obsahu časopisu. Medzi doplnky tretích strán patria Reading Tools, ktoré smerujú čitateľov k súvisiacim článkom, mediálnym kanálom a dokumentom v databázach s otvoreným prístupom.
- Exporty XML (implementované rôzne schémy).

CURRENT ISSUE

Vol. 15 (2021): Potravinárstvo Slovak Journal of Food Sciences

Articles published in the journal are peer-reviewed and freely available online. Journal covers areas including food hygiene, food safety, and quality, food microbiology, food laws and regulations, ingredients and ingredient functionality, nutraceuticals, product formulation, sensory science and sensory statistical analysis, process control and its contribution to food processing operations, food chemistry, food toxicology, food engineering, food technology and biotechnology, nourishment, public health, primary production of food, food adulteration, food economics and marketing, the environmental effect on food and food machinery.

Aims & Scope

Acta Horticulturae et Regiotecturae (AHR) is a double-blind peer reviewed, open access

- Scientific journal of the Faculty of Horticulture and Landscape Engineering of the Slovak University of Agriculture in Nitra since 1998 (Articles are published in English since 2013).
- The journal is administered by an International Editorial Board.
- Editor-in-Chief:** *prof. Ing. Dušan Igaz, PhD.*
- Managing Editor:** *doc. Ing. Ján Horák, PhD.*
- The journal is published twice a year

Acta Horticulture et Regiotecturae (AHR) is a peer reviewed, open access scholarly journal aimed to presentation and dissemination of the latest, up-to-date results of scientific research in the fields of landscape engineering, landscape architecture and horticulture in the context of the climate changes impacts. Journal focuses on the publication of original research from horticulture and viticulture, nature and landscape sustainability, protection and management, environment protection and related fields.
