

Spotlight on ORCID[®]

Stanford-UCSF Open Science Reading Group
April 27, 2021

Howdy

- Anneliese Taylor
- Head of Scholarly Communication, UCSF Library
- Open access and open research advocate
- Member of Open Science Group at UCSF

Agenda for today

- Overview of ORCID and how ORCID iDs work
- Explore some examples iDs
- Go through a few examples of how organizations use ORCID
- Snapshot of ORCID API

What is ORCID?

- Stands for Open Researcher and Contributor ID
- ORCID is the name of the organization that provides the ORCID iD
- ORCID iD is a persistent digital identifier assigned to individual researchers
- 16-digits, e.g.  <https://orcid.org/0000-0003-0346-4057>
- Uses a reserved block of ISNIs - International Standard Name Identifier
 - Researchers, writers, inventors, performers, publishers, etc.
- ORCID iD registry began 2012, over 11M records

What are the benefits to researchers?

- Addresses the problem of name ambiguity in search and discovery
- Lets researchers track name changes and variations
- Displays affiliations, grants, publications, and more
- Allows researcher to control what information is shared
- Free and perpetual
- Connecting an iD with publishers and trusted organizations writes information and saves time and effort
- Helps you get credit for peer review activity and works you produce
 - [PLOS](#), [Springer Nature](#), [protocols.io](#)
- Helps you comply with funder and publisher requirements
 - [NIH grant applications](#), [ORCID open letter](#)

How to get an iD and fill in the record

- Register at <https://orcid.org/register>
- Sign in at <https://orcid.org/signin>
 - your institution may have single sign-on set up (Stanford and UCSF do)
 - keep your individual login on record in case you leave the institution
- Add identifying info, affiliations, grants, and works manually, by identifier, or through trusted connections where possible
 - [building and connecting your ORCID iD](#)
 - [add works and peer review](#)
- ORCID Help

Dryad login via ORCID account

[Explore Data](#)[About ▼](#)[Help ▼](#)[Login](#)

ORCID Account

Dryad uses ORCID as its primary login method.

Please use, or create, your ORCID login credentials to login to Dryad.

Login or create your ORCID iD

Dryad's Commitment to You

Curation

All datasets are curated to ensure they are Findable, Accessible, Interoperable, and Reusable

Compliance

Enabling adherence to funder and publisher open data mandates

Community Supported

Dryad is researcher-led and supported by our institutional and publisher members

The institution as a 'trusted organization'

The screenshot shows the top of a web browser with a dark blue header containing the UC Davis logo on the left and an FAQ link on the right. Below this is a white banner for the ORCID Optimizer BETA application. The banner includes the ORCID logo and the text 'Member Organization' on the right. The main content area has a green heading 'Improve Your ORCID Record' followed by the text 'Get the most out of your ORCID iD with help from the UC Davis Library.' A blue button labeled 'UC Davis Login' is centered below this text. At the bottom of the banner, a red line of text states: 'This app is currently for use by CoE and EEI pilot participants only.'

ORCID integrations

ORCID API

Credit: [Sheila Rabun & Shawna Sadler, Lyrasis](#)

See [Common systems for integrations \(U.S.\)](#)

How does the ORCID API work?

- The basis of the ORCID API is OAuth 2.0, which enables authenticated connections between researchers' ORCID iD records and a system (see ORCID's OAuth workflow)
- Data is transferred between the ORCID registry and systems via XML or JSON
- ORCID is a RESTful API: HTTPS calls are required to communicate between the ORCID registry and a system (see tutorials)
- <https://www.lyrasis.org/Leadership/Pages/orcid-us-api.aspx>

Using R with ORCID iD data

- Creating a resume in RStudio using rorcid and ORCID API
 - Peace Ossom-Williamson (POW), Director for Research Data Services, The University of Texas Arlington
 - [GitHub documentation](#)
- [R and ORCID workshop](#) offered by POW at University of Cincinnati (the other UC)
- [rorcid walkthrough](#) from Clarke Iakovakis

Who runs ORCID, and how is it funded?

- Incorporated in Delaware in 2010 as a non-profit organization
- Governed by an international Board of Directors
 - Faculty, publishers, librarians, consortia, funders
- 35 international staff
- Funding relies on memberships
- Member organizations = 1238
- Annual fee range: \$5150 - \$25,750 (discounts for non-profits and start-ups)
- Membership through consortia - \$4800 via Lyrasis

ORCID Founding Principles

1. ORCID will work to support the creation of a permanent, clear, and unambiguous record of research and scholarly communication by enabling reliable attribution of authors and contributors.
2. ORCID will transcend discipline, geographic, national, and institutional boundaries.
3. Participation in ORCID is open to any organization that has an interest in research and scholarly communications.
4. Access to ORCID services will be based on transparent and non-discriminatory terms posted on the ORCID website.
5. Researchers will be able to create, edit, and maintain an ORCID identifier and record free of charge.
6. Researchers will control the defined privacy settings of their own ORCID record data.
7. All data contributed to ORCID by researchers or claimed by them will be available in standard formats for free download (subject to the researchers' own privacy settings) that are updated once a year and released under a CC0 waiver.
8. All software developed by ORCID will be publicly released under an Open Source Software license approved by the Open Source Initiative. For the software it adopts, ORCID will prefer Open Source.
9. ORCID identifiers and record data (subject to privacy settings) will be made available via a combination of no-charge and for-a-fee APIs and services. Any fees will be set to ensure the sustainability of ORCID as a not-for-profit, charitable organization focused on the long-term persistence of the ORCID system.
10. ORCID will be governed by representatives from a broad cross-section of stakeholders, the majority of whom are not-for-profit, and will strive for maximal transparency by publicly posting summaries of all Board meetings and annual financial reports.

2025 Vision

ORCID is driven by a vision of a world where all who participate in research, scholarship, and innovation are uniquely identified and connected to their contributions across disciplines, borders, and time. We invite you to look over our [2025 Vision](#), in which we focus on how we provide value to researchers and the research and innovation ecosystem.

Four core strategies

ORCID is centered on four core strategies. These guide our decisions and help us prioritize our actions as we work with the community to achieve our vision.

RESEARCHER

Position the researcher at the center of all that we do

INFRASTRUCTURE

Invest in developing a robust information infrastructure

TRUSTED ASSERTIONS

Enable a wide range of verified iD-ID connections

STRATEGIC RELATIONSHIPS

Develop sustainability through strategic relationships

<https://info.orcid.org/2020-2025-strategic-plans>

For discussion

1. Is your ORCID iD filled in?
2. Have you allowed trusted partners such as a publisher or bibliographic service like ResearcherID to write information to your record?
3. What has worked well (or not so well) for helping you complete your record?
4. Have you worked with R or another program to use ORCID data?

Thanks!
