ETHRD-IG Focus Group Materials

This page captures documentation associated with ETHRD-IG focus groups and their work. Types of documentation may include scoping statements, working documents, reports, outputs/recommendations Please organize focus groups in order of date of establishment then alphabetical.

RDA

Core Characteristics of Learning Resource Collectors (such as Catalogues and Registries)

Introduction to this google document

What kind of information do you need in order to evaluate and understand how a certain collection of learning resources in RDM (research data management) is chosen, managed and sustained over time?

In this focus group we have started to study the evolving landscape of learning resources in RDM. We have started to collect and list current catalogues or registries of learning resources, and realized that there is a need for a set of characteristics that describe them, in order to help people evaluate and understand the resources they offer.

This document offers draft core characteristics to help organizations and their
