

S blank for baseline subtraction

10:47a S-blank_057.d01-d02

Farideh Jalilehvand, University of Calgary - Ni(thiourea)₆ClO₄ complex

huge green crystals - using the smaller crystals of the fresh batch June 2011

ground powder on tape, was not mixed with BN - looks yellow when pumped down

11:35a NiTU6_058.d01

beam refill at noon

data looks a bit too out of proportion with the large edge jump and tiny white line features.

sample removed, scraped a bit, and reloaded

12:34p NiTU6_059.d01-d03

the EY data became very noisy for the last scan - sublimation?
