

Results of the survey of the ZKI working group Strategy and Organization on software solutions at universities 2021

Malte Dreyer, Humboldt University Berlin, <https://orcid.org/0000-0002-1775-8622>

malte.dreyer@hu-berlin.de

<https://doi.org/10.5281/zenodo.4904601>

Introduction

At present, the ZKI does not yet have an overview of which software solutions are used how frequently at the member institutions. The aim of this survey is therefore to gain a better picture of the solutions in use and to create a helpful means of comparison for many institutions by querying particularly central systems.

The survey was answered by 89 universities. Up to 83 responses were given for the individual categories of software solutions. Participation in the survey was possible from 20.4.2021 to 21.5.2021.

The survey asked about the following categories:

- Backup Software
- Campus Management Systems - CaMS
- Content Management Systems - CMS
- Chat / Instant Messaging Solutions - IM
- Document Management Systems - DMS
- Research Information System - FIS
- Calendar
- Learning Management Systems - LMS
- Mail
- Private Cloud / VM Management
- Project Management Software
- Resource Management Systems
- Sync-n-Share solutions
- Ticket / Incident Management Systems
- Video management systems
- Video conferencing solutions
- Knowledge Management Solutions

For each category, the following questions were asked:

- Which solution do you use?
- Is the system commercial, open source, homegrown, or hybrid?
- How do you operate the system? Internally, externally or mixed?
- How satisfied are you with the solution? (Scale from 1 - very dissatisfied to 10 - very satisfied)
- What comments do you have?

In addition, the survey asked about type of institution of higher education, state, and number of students at the institution.

Summary

The data for the individual categories varies widely. Some categories are significantly characterized by open source solutions, while other categories are almost exclusively represented by commercial solutions. Clear differences can be identified between larger and smaller institutions. Smaller institutions show greater diversity in the solutions used across all categories. Similar, but not quite as pronounced, are corresponding differences between universities and universities of applied sciences. The diversity of solutions at HAWs is slightly higher.

The following chart shows the top solutions for each category - open source solutions are marked in green and commercial solutions in blue.

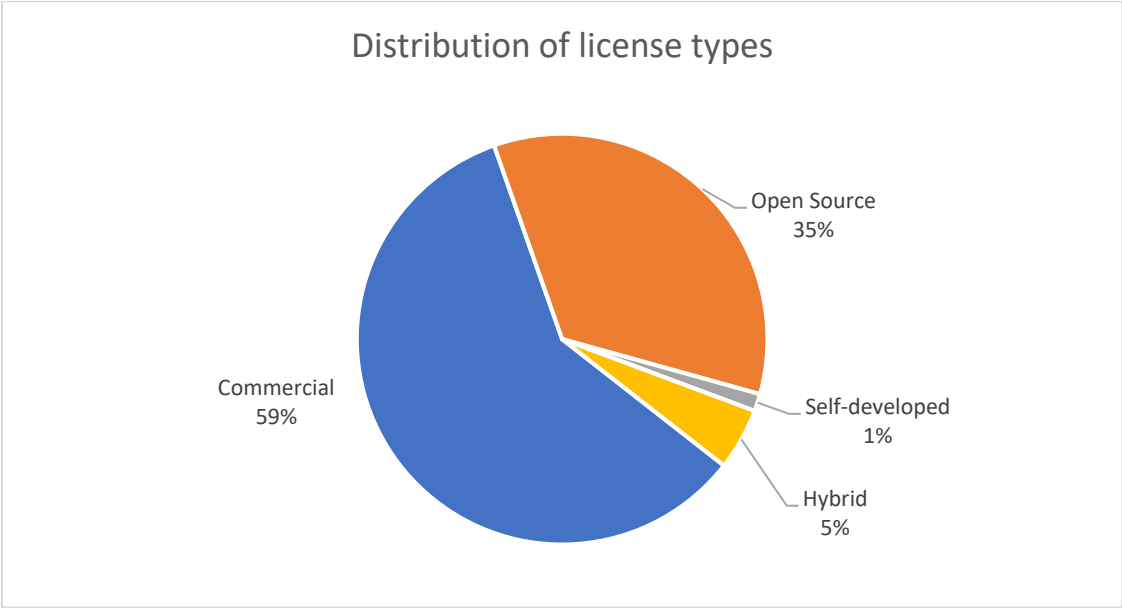

Category	Place 1	Quantity	Place 2	Quantity	Place 3	Quantity
Backup	Veeam	23	IBM Spectrum Protect	21	Dell EMC Networker	5
Campus Management System	HISinOne	41	HIS GX	21	CampusNet	8
Content Management System	Typo3	45	Plone	6	Imperia	5
Document Management System	Codia d.3	27	Lib-IT Filero	4	ELO Digital Office	3
Research Information System	HIS	10	HISinOne-RES	7	Clarivate Converis	4
Incident Management	OTRS	30	KIX Professional	7	Zammad	6
Instant messaging	Microsoft Teams	12	RocketChat	11	Matrix	8
Calendar	Microsoft Exchange	52	SOGoo	5	Microfocus Groupwise	4
Learning management system	Moodle	37	Ilias	13	Stud.IP	9
Mail	Microsoft Exchange	50	Dovecot	9	GroupWise	2
Project Management	GitLab	24	Jira	7	OpenProject	6

Details of the participating facilities

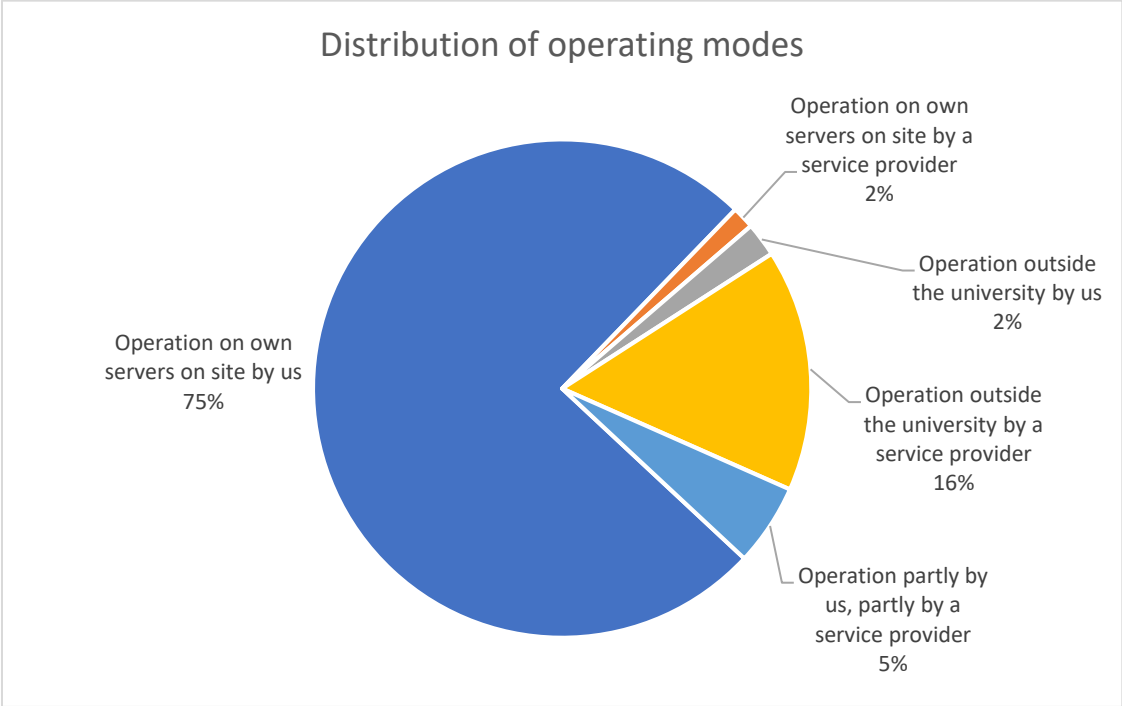

Comprehensive evaluations

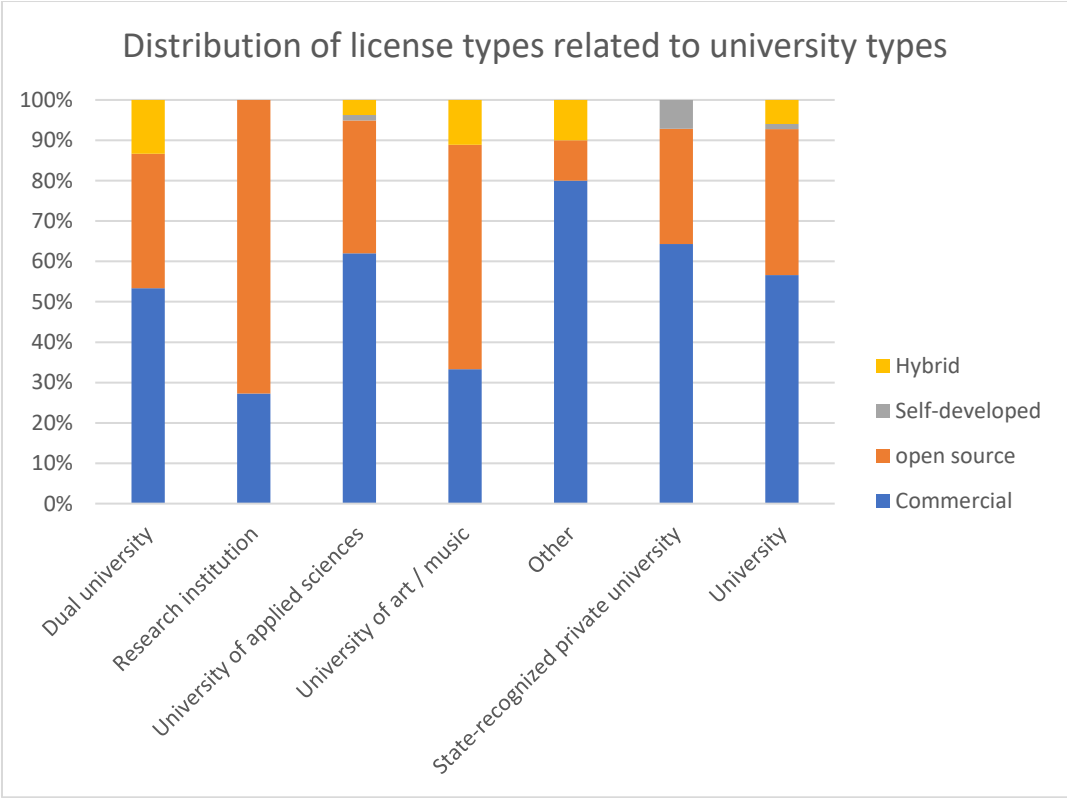

The license types are distributed across all categories as follows:

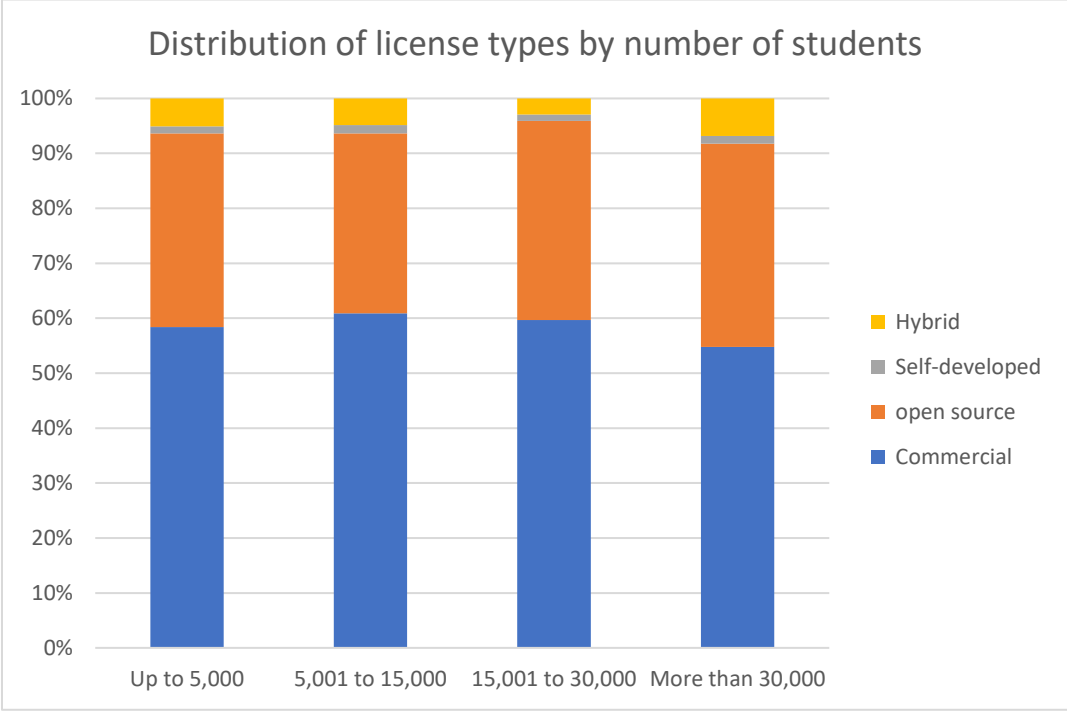

For operating models, the distribution across all categories is as follows:

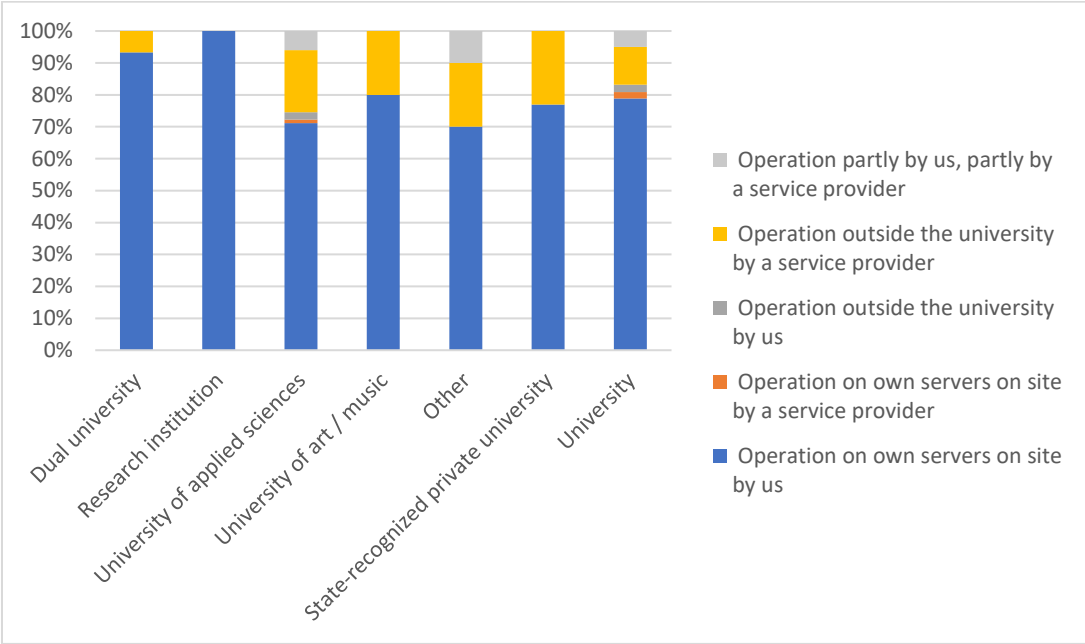

By type of university, the distribution of license types across all categories is as follows:

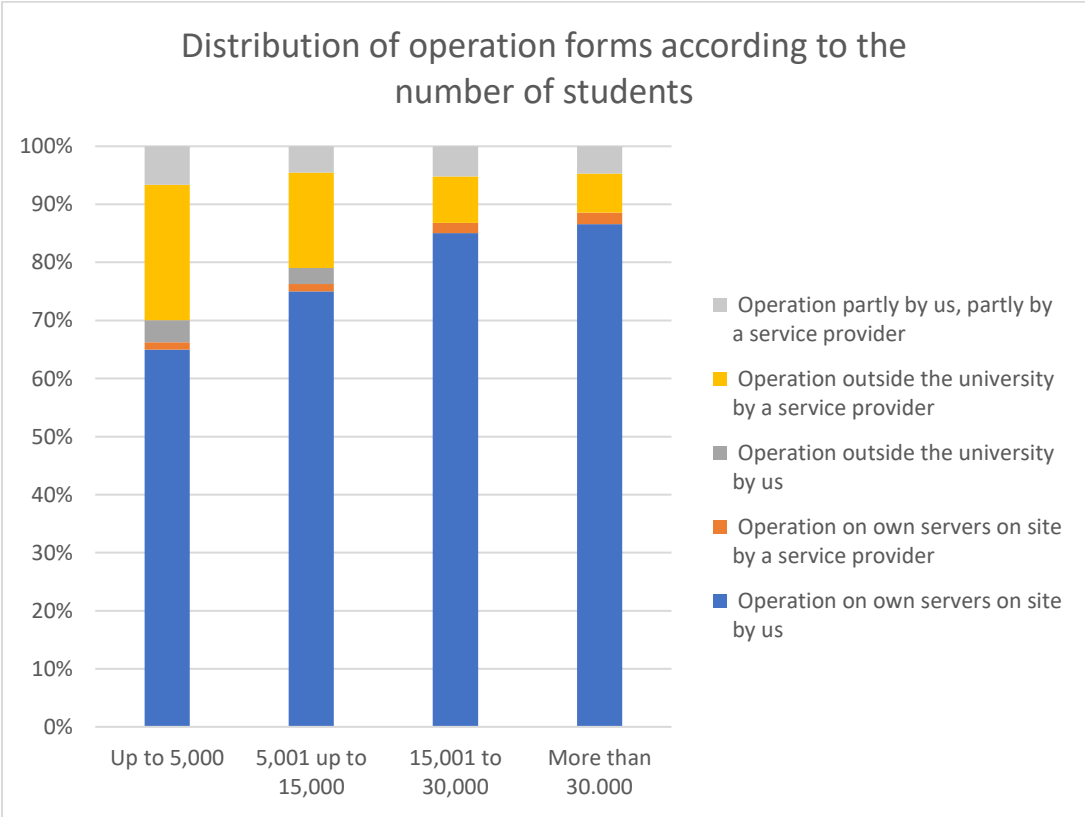

Across all categories, license types by number of students are distributed as follows:

The following chart shows the distribution of operating modes across all categories by type of university:

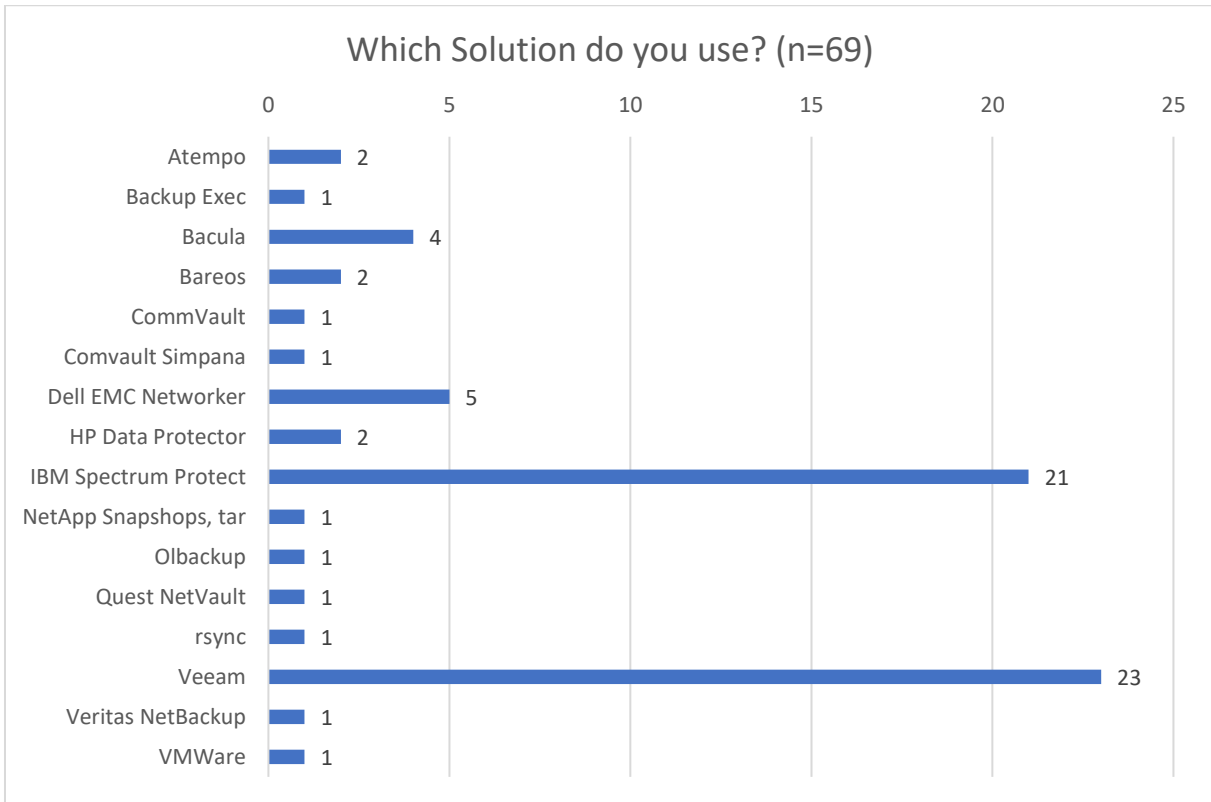

The distribution of operating modes across all categories by number of students is shown in the following chart:

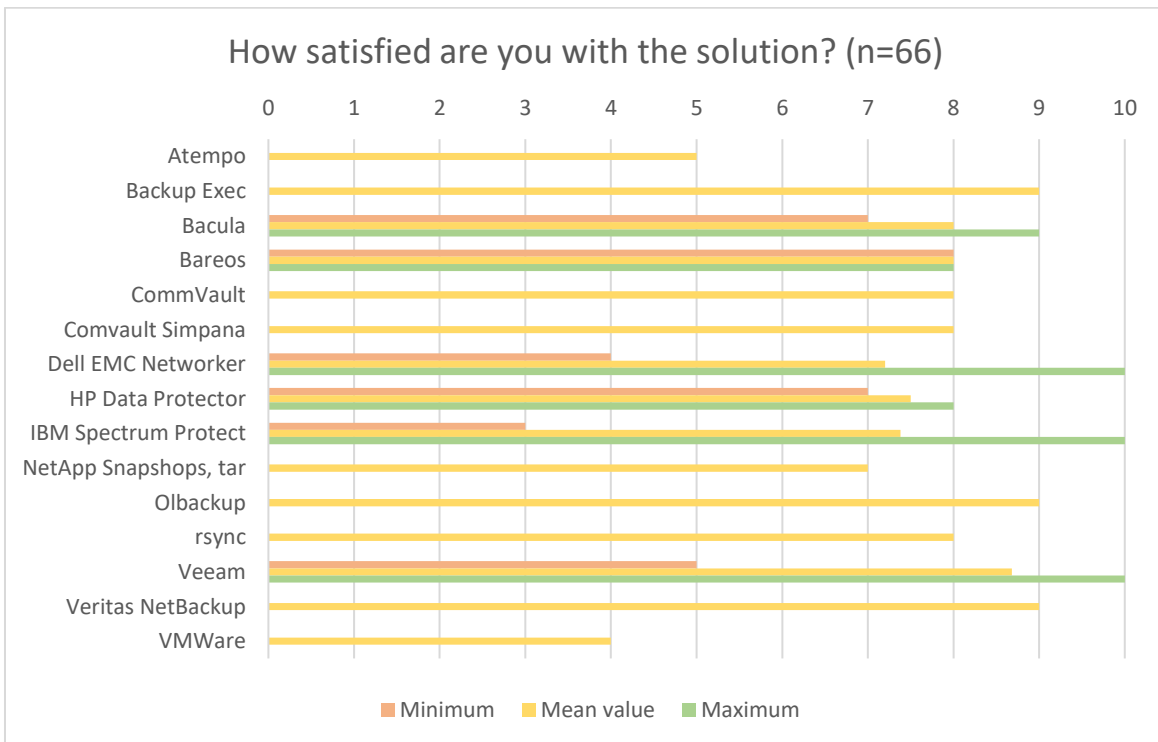

Backup

The mentions are:

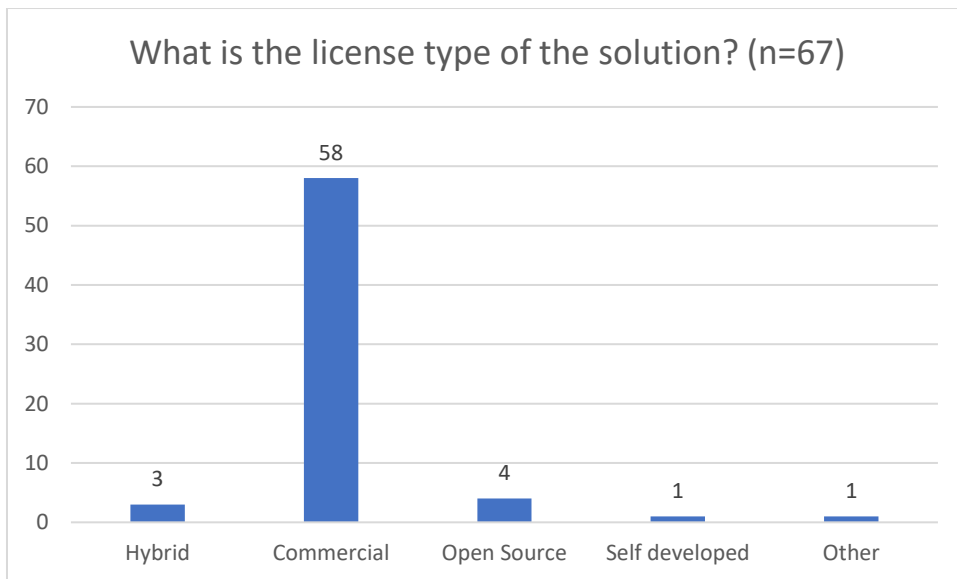

The satisfaction ratings are distributed as follows

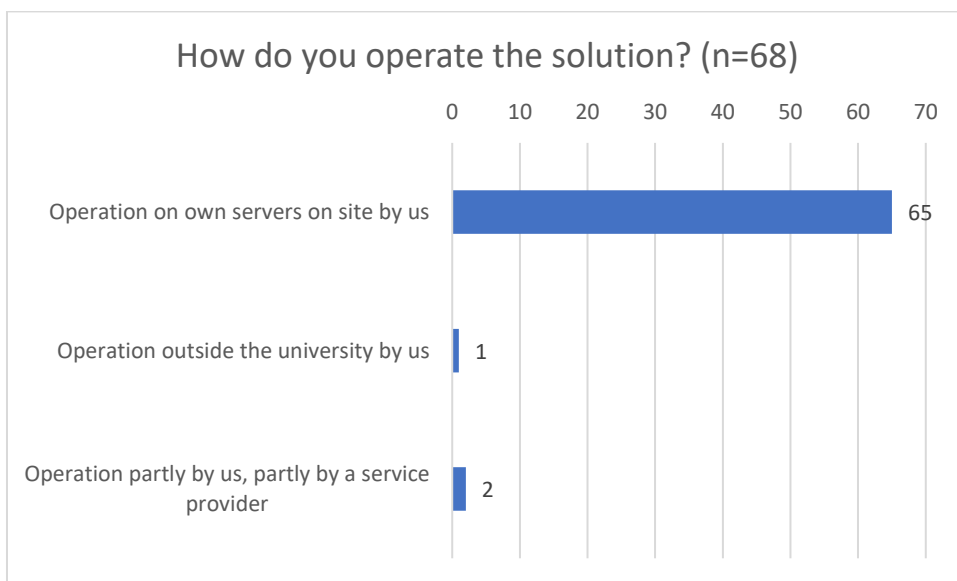

A satisfaction score of 1 stands for "very dissatisfied" and 10 for "very satisfied".

The license types are distributed as follows:

The following types are mentioned as operating models:

The following table shows the solutions used grouped by facility size:

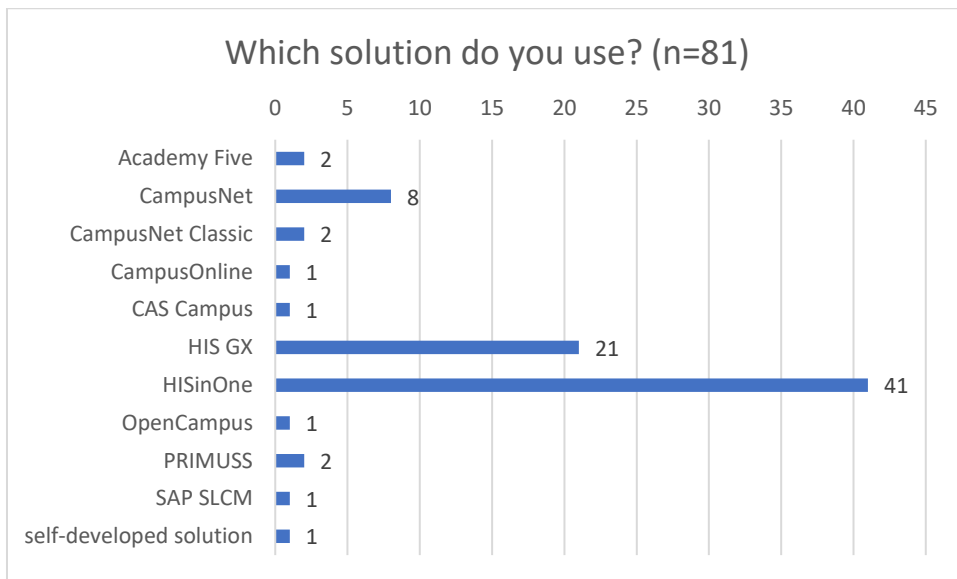

Anzahl Studierende	Nennungen
Bis zu 5.000	22

List of questions

General Questions: Please provide us with some basic information. (All information is optional)

- From which type of university or research institution do you come? (University, University of Applied Sciences, University of Art / Music, Church university, Dual university, State-recognized private university, Research institution)
- In which state is your facility located? (List of federal states)
- How many students does your university have? (Up to 5,000, 5,001 to 15,000, 15,001 to 30,000, More than 30,000)

Questions for each software category:

- Which solution do you use? (Free text)
- Is the system commercial, open source, self-developed or hybrid? (Commercial, Open Source, Self-developed, Hybrid)
- How do you operate the system? Internally, externally or mixed? (Operation on own servers on site by us, operation on own servers on site by a service provider, operation outside the university by us, operation outside the university by a service provider, operation partly by us, partly by a service provider).
- How satisfied are you with the solution? (Please select on a scale of 1 - 10, where 1 indicates low satisfaction and 10 indicates very high satisfaction).
- What comments do you have? (Free text)

Groups of questions about the software categories:

- Campus Management: Examples are HIS GX, HISinOne, CampusNet, CampusOnline, SAP SLCM)
- Backup software: examples are Spectrum Protect, Bacula, NetBackup
- CMS (Content Management System): Examples are Typo 3 or Wordpress
- Chat / instant messenger solution: examples are Mattermost, Rocketchat, Slack or Matrix

- DMS (Document Management System): Examples are d.3, ELO, OpenText,
- FIS (Research Information System): Examples are Pure (Elsevier), Converis (Clarivate Analytics), Symplectic Elements (Symplectic/Digital Science), HIS or FactScience (QLEO).

- Calendar: Examples are Exchange, Open Xchange, SOGo
- LMS (Learning Management System): examples are Moodle, Ilias, Stud.IP, Canvas
- Mail: Examples include Exchange, Open Xchange, Dovecot
- Private cloud / VM management: Examples are VMWare, OpenStack, Proxmox
- Project management: Examples are OpenProject, Gitlab, JIRA
- RM (Resource Management): Examples are SAP, HIS, Mach
- Sync-n-Share: Examples are Dropbox, OwnCloud, NextCloud, Seafile
- Ticket / Incident Management System: Examples are OTRS, Zammad, JIRA
- Video management: Examples are Panopto, OpenCast, Mediasite
- Video conferencing: Examples are Zoom, BBB, WebEx, Jitsi
- Knowledge management: Examples are Confluence, Mediawiki, Sharepoint, Twiki
