

Mean genetic diversity indices for 38 autosomal microsatellite loci in four golden jackal populations plus gray wolves and dogs (n=128). Standard errors are given in parenthesis. N = number of individuals; Na = number of alleles; He = expected heterozygosity. Related to Figure 3D.

	European Golden Jackals	Middle East Golden Jackals	Kenyan Golden Jackals	North African Golden Jackals	Eurasian Gray Wolves	Dogs
N	13	26	23	24	20	22
Na	3.37 (0.19)	5.50 (0.32)	3.63 (0.24)	8.97 (0.40)	7.00 (0.26)	6.60 (0.25)
No. Private Alleles	0.00 (0.00)	0.21 (0.08)	0.26 (0.08)	1.39 (0.19)	0.45 (0.16)	0.37 (0.10)
He	0.480 (0.032)	0.623 (0.033)	0.525 (0.033)	0.798 (0.012)	0.761 (0.013)	0.723 (0.017)
