

# RISIS

RESEARCH INFRASTRUCTURE FOR SCIENCE  
AND INNOVATION POLICY STUDIES

## **NEW resources for researchers and policymakers: ESID and ISI-Trademarks**

*RISIS infrastructure goals and achievements*

Emanuela Reale (CNR-IRCrES)

This project is funded by the European Union under Horizon2020 Research and Innovation Programme Grant Agreement n° 824091

# What is RISIS

- A European research infrastructure in social sciences focusing on data and services for science and innovation studies
- Initiated in 2014 and renewed in 2018 until 2023
- It provides European researchers
  - Freely on line accessible services
  - Project-based access to curated & enriched datasets (15)
  - Tools for methodological advances
  - Registers on research organizations and firms (2)
  - Ontologies, visualization maps
  - Indicators on Actors, Topics and Geography
  - Training, research seminars and policy sessions

## *Research orientation*

- providing facilities, resources and services to researchers in the STI field and beyond
- developing new datasets and indicators on STI policies

## *Inscribed in the open science movement*

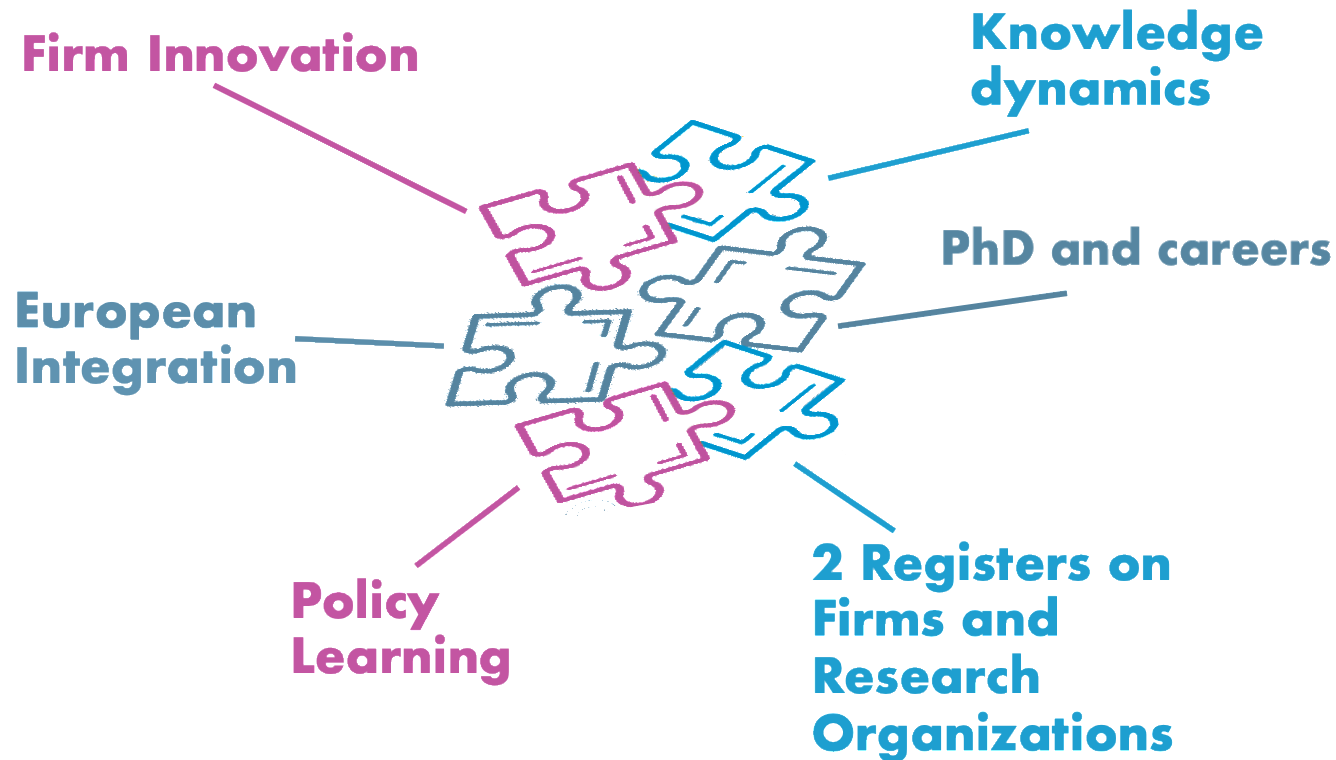

- Access is granted for 'publishable research'
- Embedded in the VRE and in the OpenAire environment (capability to match RISIS data with other open access resources)
- Using Zenodo as repository for outputs and outcomes

## *Impact and interactions with the research community*

- Important investment in training, dissemination and communication

## RISIS datasets families

# The KNOWMAK tool

# RISIS

Visualizing knowledge creation in the European Research Area: the RISIS-KNOWMAK tool

# Achievements

# RISIS

RISIS Users by type of activity (n=758)

- 810 registered users in January (now around 1,000)
- Of which around 60% are ‘active users’ participating at least in one RISIS activity
- Good gender balance (44,2% are women)
- An European community (80% of the active users are from European countries)
- Among the non-European countries Middle East represents 33% of users and Asia 23%
- Around 130 active users are multiple users

# Future developments

# RISIS

- Access to micro data
- Tailored services
- Opening of 2 new datasets
- Improve freely available positioning indicators (universities and public research organizations, regional level, large firms)
- Monitoring effort to measure our ‘impact’

# Aim of the RISIS session at Eu-SPRI

# RISIS

- Present the two new datasets developed within the RISIS infrastructure:
  - **ESID on Social Innovation**
  - **ISI-Trademarks**
- Discuss the advantages they can provide for research on STI themes

# Program

- 4.10 – 4.30
- *ESID, Social Innovation through Machine Learning*  
Abdullah Gök, University of Strathclyde
  - *DISCUSSANT* Dietmar Lampert, Centre for Social Innovation
- 4.40 -5.00
- *ISI-Trademark, mapping the economic growth*  
Peter Neuhäusler, Fraunhofer ISI
  - *DISCUSSANT* Eric Iversen, NIFU
- 5.10 – 5.25      *Q&A session*
- Wrap up      Thomas Scherngell, AIT

# RISIS

RESEARCH INFRASTRUCTURE FOR SCIENCE  
AND INNOVATION POLICY STUDIES

European Forum for  
Studies of Policies  
for Research and Innovation
