Network Linked Open Middle Ages

Project

The 'Network Linked Open Middle Ages' is intended to offer qualified young researchers an **interdisciplinary** platform to **enrich** relevant existing **sources** of digital medieval studies with **innovative procedures**, to **evaluate these methods** and to **research the resources** together in pilot studies.

- Medieval studies as use case for initial research-oriented adaptation of **Linked-Open-Data-Procedures:**
  - Improvement of the sustainability, quality and contextualisation of data
  - **FAIR** principles ("**F**indable, **A**ccessible, **I**nteroperable, and **R**e-usable")
- Systematic testing of implementation of these procedures in scientific practice
- Transfer of gained knowledge to other disciplines in the scientific community as 'best practices'
- Creation of **sustainable foundation** for the future:
  - increased interconnectedness of the data
  - intensive cross-disciplinary exchange between the participating scientists and their institutions

Network members

Dr. Luise Borek (coordinator)
Dr. Katharina Zeppezauer-Wachauer (co-coordinator)
Astrid Böhm
Hannah Busch
Prof. Dr. Nathanael Busch
Dr. Karoline Döring
Dr. Gustavo Fernández Riva
Max Grüntgens
Dr. Canan Hastik
Dr. Marco Heiles

Peter Hinkelmanns
Nora Ketschik
Dr. Helmut W. Klug
Dr. Florian Nieser
Christopher Pollin
Dr. Jonas Richter
PD Dr. Simone Schultz-Balluff
Manuel Schwembacher

student assistants:
Julia Höpfner
