

Dataset for “21st century fate of the Mocho-Choshuenco ice cap in southern Chile”

Matthias Scheiter, Marius Schaefer, Eduardo Flández, Deniz Bozkurt, Ralf Greve

1 July 2021

This dataset consists of 5 folders:

- spinup:
 - time series of the transient spin-up
 - two-dimensional fields of the ice cap state in 2013
- control:
 - time series of the control run
 - two-dimensional fields of the ice cap state in 2040, 2060, 2080, 2099, and 2599
- rcp26/rcp45/rcp85:
 - one folder for each of the three scenarios (RCP2.6, RCP4.5, RCP8.5), each of them containing the following files for all 23 global climate models
 - time series of ice cap evolution between 2013 and 2099
 - two-dimensional fields of the ice cap state in 2040, 2060, 2080, and 2099
