

Nanoparticles released from rubber tyres!

Governance

refers to the actions, processes, traditions and institutions by which authority is exercised and decisions are taken and implemented.

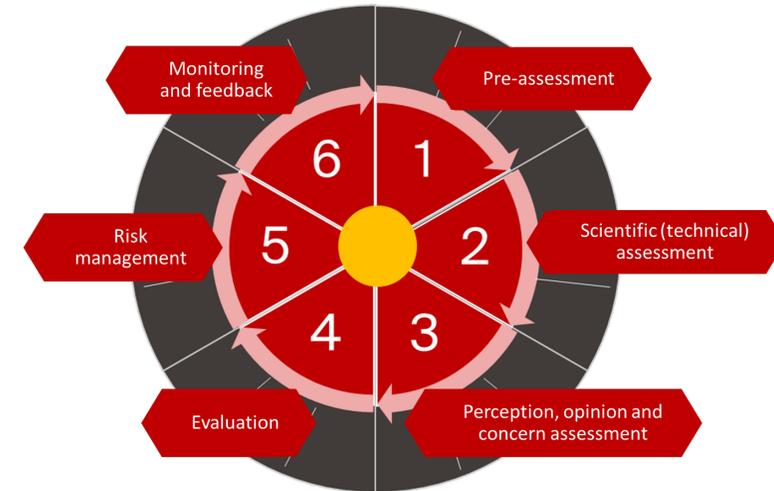

What would we miss without governance?

Who are the representatives of risk governance?

Nanoparticles released from synthetic turf fields!

Nanoparticles are used as raw material in rubber tyres and are released from rubber tyres due to wear and tear.

Rubber granulate, a recycling product from rubber tyres, is used on synthetic turf fields to give them the properties of a natural grass field.
