

Welcome to the playground of the stakeholders

- EFSA: “We cannot rule out a concern for genotoxicity”
 - Foodwatch: “The additive E171 is finally recognised as unsafe.”
 - TDMA: “We have all the evidence that confirms the safety of E171.”
1. Should we ban TiO₂?
 2. How would you *respond* to NGOs / industry?
 3. How could we improve the governance process?
