ORION TRAINING AND DISSEMINATION

Executive Summary

In Task 4.4 of the ORION project trainings were planned and conducted that aimed at sharing the knowledge already available within the consortium among all project partners. This also included training of partners in the use of new tools produced/adopted. Later in the project Task 4.4 will also contribute to the dissemination of new ORION results by providing trainings for external partners.

According to the ORION project plan, the deliverable D4.1 specifies that until M12 the ORION project has to provide “Two internal training workshops for ORION partners”.

The ORION project performed the following training activities in 2018; some of them also open for EFSA / ECDC and selected other EJP projects:
