* “SID” represents the IDs of each word in the *Tibeto-Burman phonology and lexicon* (Sun et al 1991). “S100” represents the IDs of the 100 core words referred from Swadesh (1971). If there is no “S100” in a word table, it means that this word is added in the revised list (see 2.2). “Y35” means that this word is an item of Yakhontov’s 35 word list.

1 Column “Lid” represents the language IDs, the corresponding language names are showed in Appendix I.

2 The numbers in column “COR” represent the corresponding words of 51 Tibetan-Burman languages (the method of corresponding words identification is described in 2.3). For example, in this table, language 10 (Pumi _Taoba) and language 11 (Pumi _Qinghua) share the same “COR” number, which means that the word “I” in these languages are corresponding words.

3 Words in Column “form” are referred from *Tibeto-Burman phonology and lexicon* (Sun et al 1991).
