The Practical Applications of IIF Project Presents: A Seminar on Image Registration

Agenda:

- Welcome
- Brief introductions to each of our speakers and their work
- Discussion

Topics for Discussion:

- Why do we want to register images?
- How should we go about image registration? And how good is 'good enough'?
- How would we like to accomplish image registration in the future? Is there a place for IIF in these workflows?

Andrew Bruce

The National Gallery

Seminar on Image Registration

Andrew Bruce Photographer at the National Gallery

Image Registration Processes

- Mosaicking (Registering image to image to create a larger composite image).
Of **visible light** and **X-radiography** images.
- Aim is to image every painting with a spatial resolution of 600ppi (42.3 μ m).
- Producing 2 to 3 mosaicked images per week.

Visible light – composite
of 80 details.
11.03GB
47125x42182px

Transmission X-ray –
composite of 40 details.
523MB
24668x22259px

Imaging at high spatial resolution for mosacking and focus stacking

600ppi Tile

Hasselblad H5D 200MS, H 120mm mkII macro lens
Sensor Dims: 8176 x 6132px
Capture Area: 346 x 259mm

600 Pixels per inch
1px = 42.333 μ m
1mm = 23.6px

1200ppi Tile

Hasselblad H5D 200MS, H 120mm mkII macro lens
Sensor Dims: 8176 x 6132px
Capture Area: 173 x 129mm

1200 Pixels per inch
1px = 21.166 μ m
1mm = 47.24px

Focus-Stacked Photomacrograph

Canon 5D markIV, MP-E 65mm lens
Sensor Dims: 6720 x 4480px
Capture Area: 7.54 x 5.03mm

22638 Pixels per inch
1px = 1.122 μ m
1mm = 891.25px

 = 5mm

Precise imaging for precise registration

- Uniform and repeatable illumination, no matter the radiation source. Flat-field correct for uniformity.
- Whether the imaging device is stationary, and the painting is moving, or only the imaging device is moving and whether it is panning or tracking. Whether the radiation source is stationary or moving. These factors will influence the processing of the images and subsequent registration.
- Work with long focal length flat field lenses to minimising geometric distortion (Or a longer SID in X-radiography) and correct for distortion.
- Use lenses optimised for the magnification range you are capturing.
- Procedures for precise and repeatable alignment of the imaging device and painting.

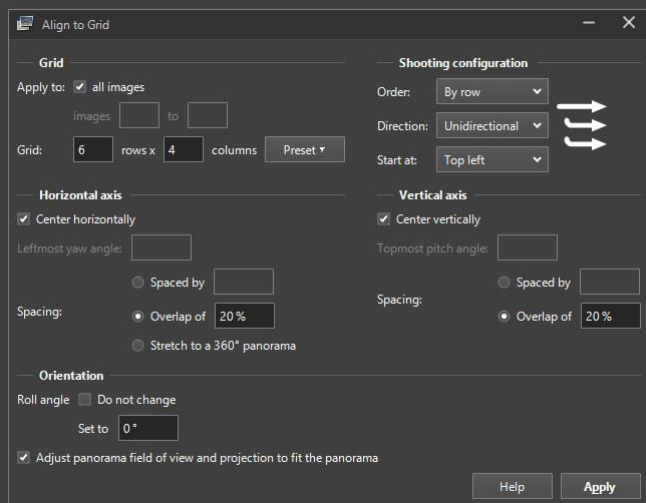

How?

Very manually...

Using PT Gui for mosaicking.

Superb software; very fast, very automated, very stable, easy to use, logical UI, multiband blending, smart seam placement, Lanczos16 interpolation, colour managed. But is designed for spherical panoramas and does not by default register images with the level of precision that we require.

Registration in PT Gui is accomplished through automated image to image feature identification – the offshoot of this process is that any errors in registration are cumulative, for paintings with significant warping (not perfectly flat surface) the resulting image suffers from geometric distortion due to the change in distance from the surface of the painting to the imaging device and resultant change of magnification.

Distortion
(Before/After)

Align to grid feature in PT Gui

NG5787 details. 4.2GB 26176x29216px

NG1314 detail. 31.8GB 106654x105532px

X-radiography parallax

NG253. Detail showing area of overlap from two X-radiographs.

Parallax issues with registering X-radiography caused by beam divergence.

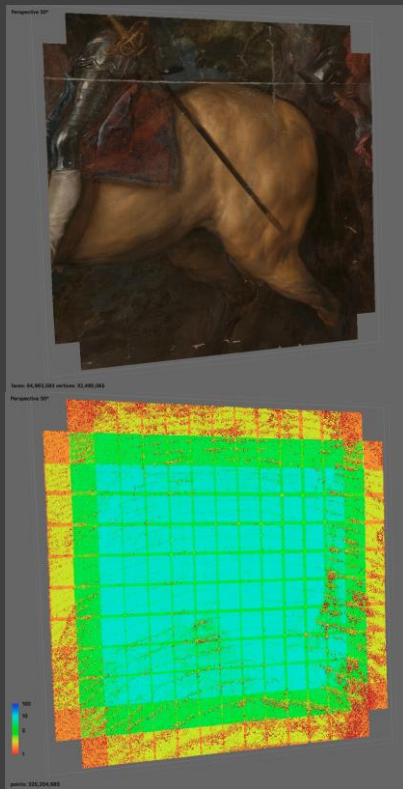

Mosaicking transmission X-radiographs so that all features register perfectly is impossible unless the source remains stationary throughout the capture process. This is often not practical or possible.

A large enough source to image distance is required so that the angle of beam divergence is kept as small as practically possible.

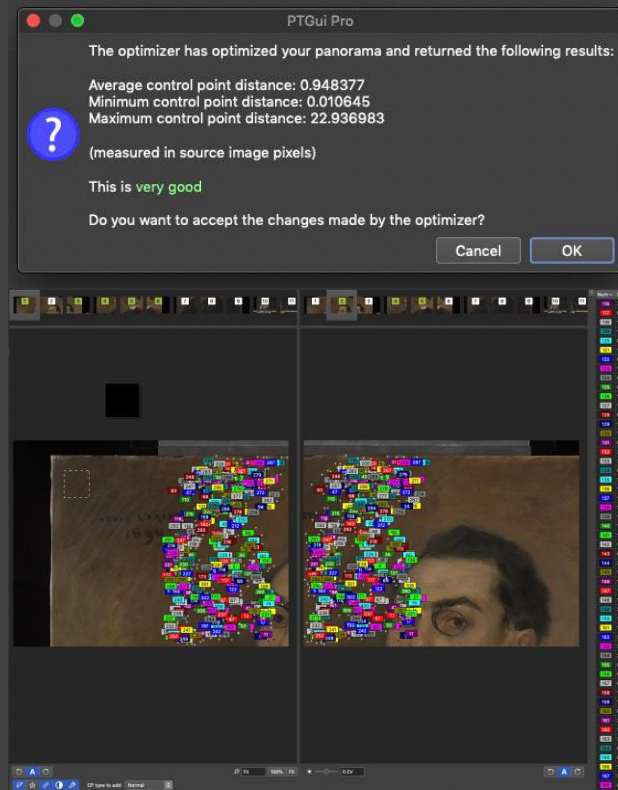

Some misalignment is inevitable, so software which places seams at points where there is minimal difference (so the resulting composite image at least doesn't have any visually jarring areas of misalignment).

How do we assess and express the precision with which images are registered?

- Confidence Heatmap within Agisoft Metashape (Photogrammetry Orthomosaic).
- Average, minimum and maximum pixel distance between control points in PT Gui.
- A script from Digital Transitions that produces a JPEG to aid visual inspection of composite image files made in Photoshop.

NG1172

NG6691

NG6691. 1.7GB 15087x19695px

Approaches to the mosaicking and registration of images and spectroscopic imaging data at the National Gallery

Catherine Higgitt / Nathan Daly / Marta Melchiorre (Scientific)

Image modalities

- Visible light (incl. UV induced) at various magnifications
- Infrared reflectography
- X-radiography
- 3D imaging
- MA-XRF scanning
- Reflectance/Hyperspectral imaging

MA-XRF SCANNING

REFLECTANCE/HYPERSPECTRAL IMAGING

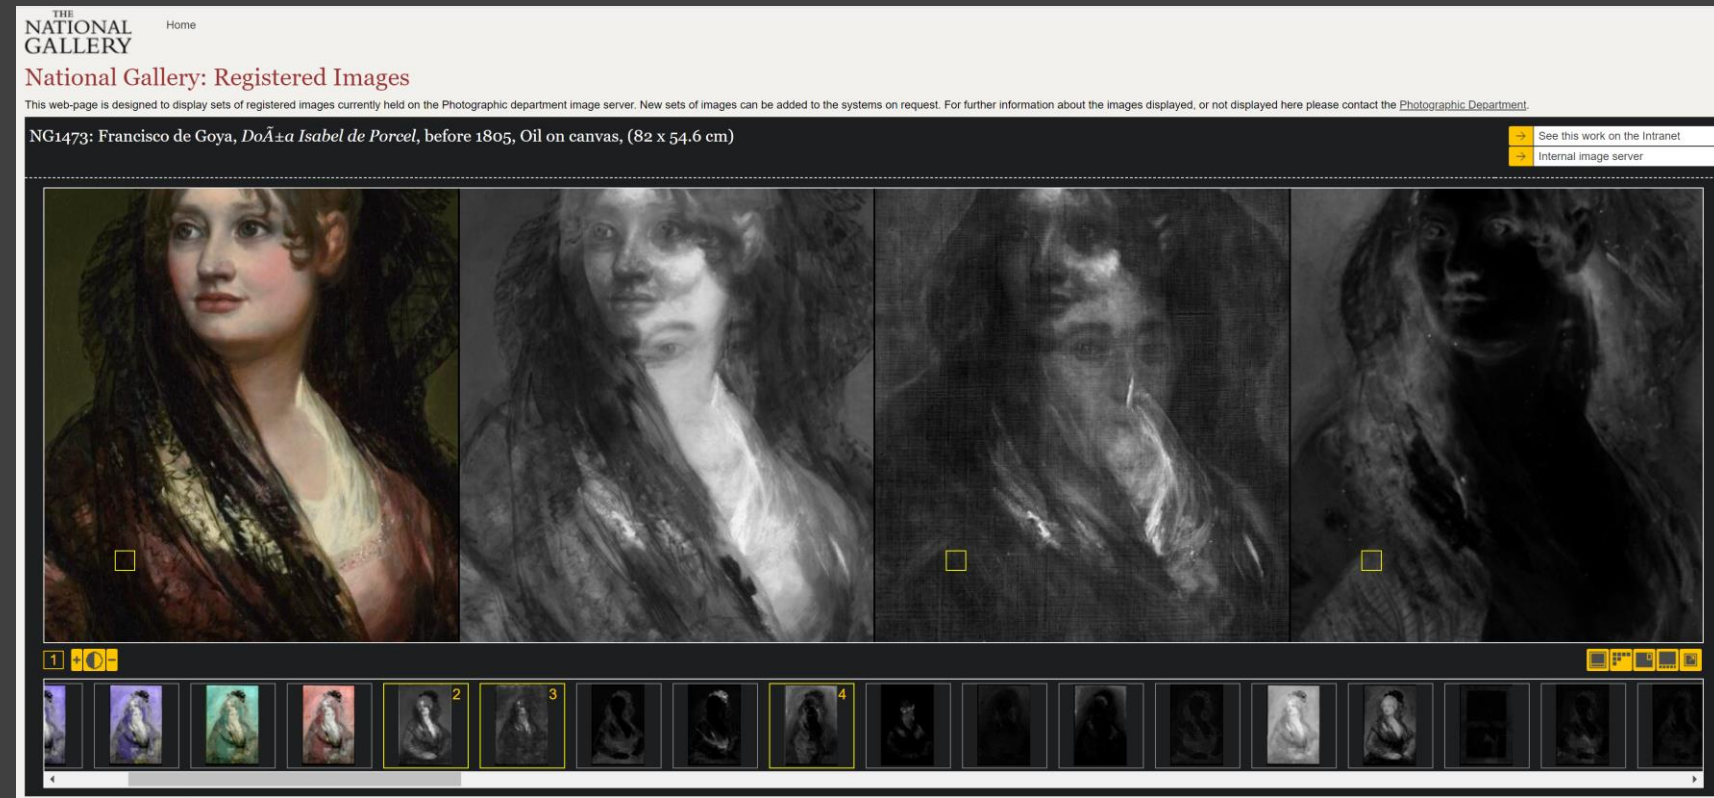

3D IMAGING (surface texture mapping)

Engaging with the registered images

– Those generating the technical images often using overlays in Photoshop or GIMP – very large files, not everyone can handle these and not good for external sharing

– Interested in alternatives for use within and outside the Gallery e.g. side-by-side viewer; curtain viewer

– With spectroscopic imaging techniques, ideally would be able to register entire data cubes for further spectral investigation

Difficulties

- Paintings are 3D objects – not entirely flat, signal in different modalities could be from different layers or components thereof
- Multi-modality challenges – difference in intrinsic distortions, signal type, resolution
- Mosaicking & registration challenges – error propagation, overlap regions
- Most registration approaches are feature-based, which can be challenged by multi-modal datacubes
- Other difficulties – datacube size/processing power, documentation of methods

Alfeld & Broekaert, 2013
[10.1016/j.sab.2013.07.009](https://doi.org/10.1016/j.sab.2013.07.009)

TITIAN, NG6420, lead XRF map

Other difficulties

- How to deal with the regions of overlap?
- How to balance sub-images or sub-datacubes when combining?
- File sizes (and formats in some cases)
- Computing power requirements
- How to record information about image or datacube processing including mosaicking/registration steps and how to associate image sets etc.
- Need to register/mosaic images by different means or against different target images depending on intended use of the images, etc.

Image Comparator (IMCOMP)

Shrinivasan Sankar, Abhishek Dutta and Andrew Zisserman

Overview

Image Comparator (or, IMCOMP) is a web application to automatically compare a pair of images using geometric and photometric transformations. It is an [open source](#) project maintained by the [Visual Geometry Group](#).

Here are some features of IMCOMP:

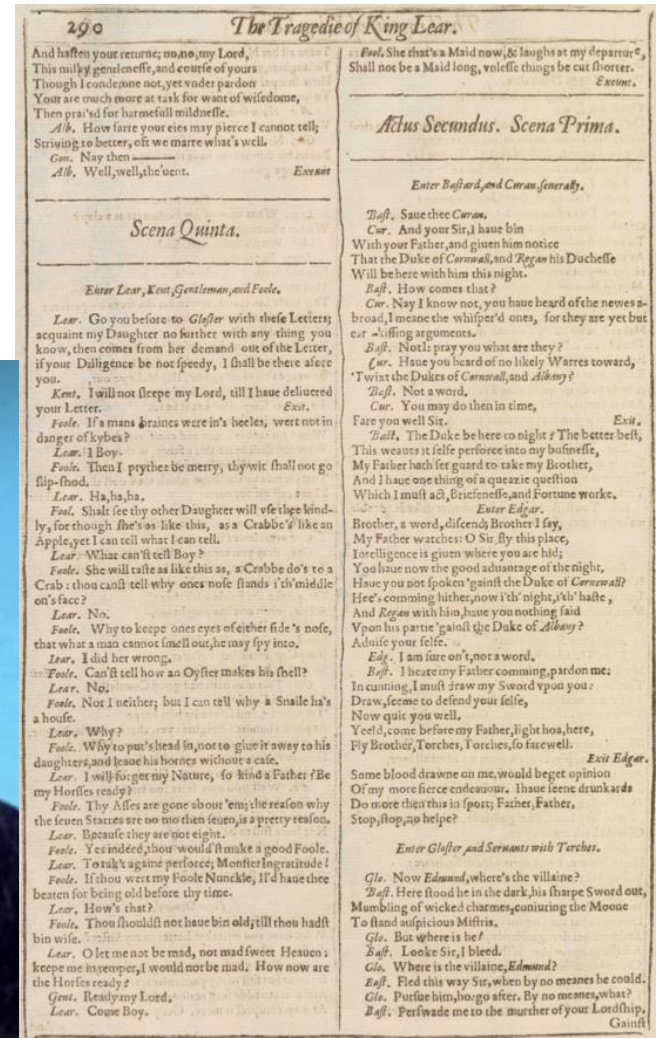

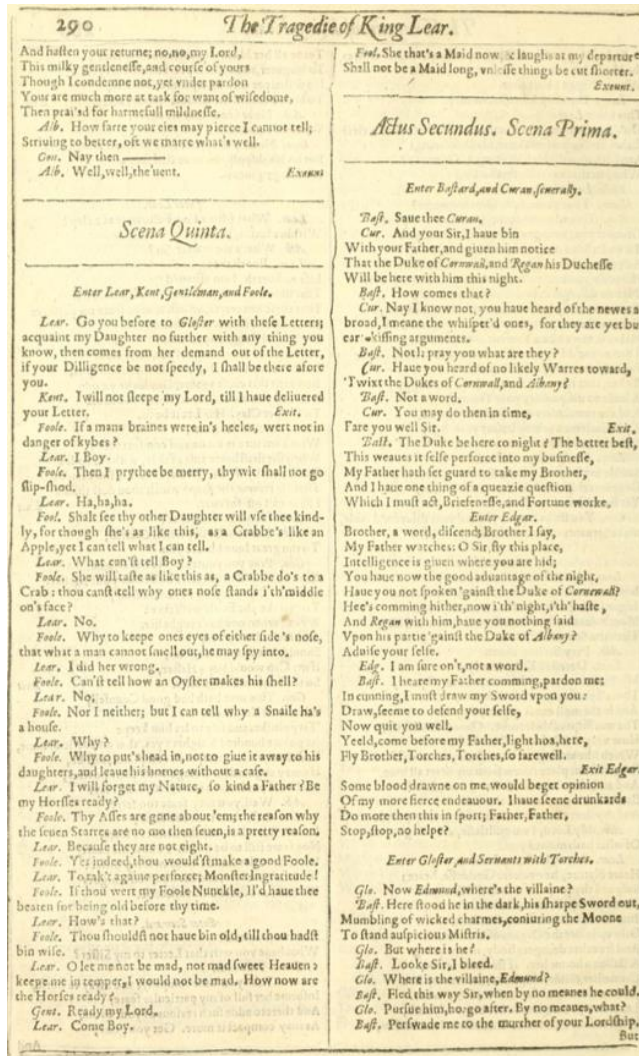

- available as an online tool that can be accessed from any modern web browser
- a large number of visualizations are available to help users spot the difference between two images
- Supports photometric transformation to compensate for colour differences between two images
- Supports different types of geometric transformations (e.g. similarity, affine, thin-plate spline, etc.) to enable comparison of images containing many types of deformations.
- Results can be saved as an image.

Online Application

Click here to load the IMCOMP online tool

Cor. You may
Fare you well Sir.
Doff. The Duke
This weaves it selfe
My Father hath set &
And I haue one thin
Which I must ad, B

Scena Quinta.

Enter Lear, Kent, Gentleman, and Foole.

Lear. Go you before to *Gloster* with these Letters
acquaint my Daughter no further with any thing you
know, then comes from her demand out of the Letter,
if your Diligence be not speedy, I shall be there afore
you.

Kent. I will not sleepe my Lord, till I haue deliuered
your Letter. Exit.

Foole. If a mans braines were in's heeles, wert not in
dang' of kybes?

Lear. I Boy.

Foole. I prythee be merry, thy wit shall nor go
slip from.

Lear. Ha, ha, ha.

Foole. Shall see thy other Daughter will vse thee kindly,
for though she's as like this, as a Crabbe's like an
Apple, yet I can tell what I can tell.

Lear. What can't it tell Boy?

Foole. She will taste as like this as, a Crabbe do's to a
Crab; thou canst tell why ones nose stands i'th' middle
on's face?

Lear. No.

Foole. Why to keepe ones eyes of either side's nose,
that what a man cannot smell out, he may spy into.

Lear. I did her wrong.

Foole. Can't it tell how an Oyster makes his shell?

Lear. No.

Foole. Nor I neither; but I can tell why a Snaille ha's
a house.

Lear. Why?

Foole. Why to put's head in, not to giue it away to his
daughters, and leaue his homes without a case.

Lear. I will forget my Nature, so kind a Father? Be
my Horfles ready?

Foole. Thy Affes are gone about 'em; the reason why
the fieren Starres are no mo then seuen, is a pretty reason,
Lear. Because they are not eight.

Foole. Yes indeed, thou would'st make a good Foole.

Lear. To ask'st againe perforce; Monster Ingratitude!

Foole. If thou wert my Foole Nunckle, I'd haue thee
beaten for being old before thy time.

Lear. How's that?

Foole. Thou should'st not haue bin old, till thou had'st
bin wile.

Lear. O let me not be mad, not mad (sweet Heauen) keepe
me in temper; I would not be mad. How now are
the Horfles ready?

Genl. Ready my Lord.

Lear. Come Boy.

Foole. She that's a Maid now, & laughs at my departure,
Shall not be a Maid long, vntill she be cut flower. Exit.

Actus Secundus. Scena Prima.

Enter Bostard, and Coran generally.

Doff. Saue thee
Cor. And your?
With your Father, and giuen him notice
That the Duke of *Corwall*, and *Regan* his Duchesse
Will be here with him this night.

Doff. How comes that?

Cor. Nay I know not, you haue heard of the newes a-
brood, I meane the whisper'd ones, for they are yet but
our kissing arguments.

Doff. Not; pray you what are they?

Cor. Have you heard of no likely Warres toward,
'Twixt the Dukes of *Corwall*, and *Albany*?

Doff. Not a word.

Cor. You may do then in time,
Fare you well Sir. Exit.

Doff. The Duke be here to night? The better best,
This weaves it selfe perforce into my businesse,
My Father hath set guard to take my Brother,
And I haue one thing of a queazie question
Which I must ad, Bricefence, and Fortune worke.

Scena Quinta.

Enter Lear, Kent, Gentleman, and Foole.

Go you before to *Gloster* with these Letters;
acquaint my Daughter no further with any thing you
know, then comes from her demand out of the Letter,
if your Diligence be not speedy, I shall be there afore

Doff. Not a word.

Cor. You may do then in time,
Fare you well Sir. Exit.

Doff. The Duke be here to night? The better best,
This weaves it selfe perforce into my businesse,
My Father hath set guard to take my Brother,
And I haue one thing of a queazie question
Which I must ad, Bricefence, and Fortune worke.

Actus Secundus. Scena Prima.

Enter Bostard, and Coran generally.

Doff. Saue thee
Cor. And your?
With your Father, and giuen him notice
That the Duke of *Corwall*, and *Regan* his Duchesse
Will be here with him this night.

Doff. How comes that?

Cor. Nay I know not, you haue heard of the newes a-
brood, I meane the whisper'd ones, for they are yet but
our kissing arguments.

Doff. Not; pray you what are they?

Cor. Have you heard of no likely Warres toward,
'Twixt the Dukes of *Corwall*, and *Albany*?

Doff. Not a word.

Cor. You may do then in time,
Fare you well Sir. Exit.

Doff. The Duke be here to night? The better best,
This weaves it selfe perforce into my businesse,
My Father hath set guard to take my Brother,
And I haue one thing of a queazie question
Which I must ad, Bricefence, and Fortune worke.

Stop, stop, no helpe?

Enter Gloster, and Seruants with Torches.

Glo. Now *Edmond*, where's the villaine?
Doff. Here stood he in the dark, his sharpe Sword out,
Mumbling of wicked charmes, coniuering the Moone
To stand auspicious Mistris.
Glo. But where is he?
Doff. Looke Sir, I bleed.
Glo. Where is the villaine, *Edmond*?
Doff. Fled this way Sir, when by no meanes he could.
Glo. Pursue him, ho: go after. By no meanes, what?
Doff. Perswade me to the murder of your Lordship,
Gainst

290 The Tragedie of King Lear.

And hasten your returne; no, no, my Lord,
This milky gentlenesse, and courtesie of yours
Though I condempne not, yet vnder pardon
You are much more at task for want of wisdom,
Then pra'is'd for harmefull mildnesse.

Alb. How farr your eyes may pierce I cannot tell;
Striving to better, oft we marre what's well.

Cor. Nay then ———

Alb. Well, well, the'uent. Exit

Actus Secundus. Scena Prima.

Enter Bostard, and Coran generally.

Doff. Saue thee
Cor. And your?
With your Father, and giuen him notice
That the Duke of *Corwall*, and *Regan* his Duchesse
Will be here with him this night.

Doff. How comes that?

This weaves it selfe perforce into my businesse,
My Father hath set guard to take my Brother,
And I haue one thing of a queazie question
Which I must ad, Bricefence, and Fortune worke.

Scena Quinta.

Enter Lear, Kent, Gentleman, and Foole.

Go you before to *Gloster* with these Letters;
acquaint my Daughter no further with any thing you
know, then comes from her demand out of the Letter,
if your Diligence be not speedy, I shall be there afore
you.

Lear. I will not sleepe my Lord, till I haue deliuered
your Letter. Exit.

Foole. If a mans braines were in's heeles, wert not in
dang' of kybes?

Lear. I Boy.

Foole. I prythee be merry, thy wit shall not go
slip from.

Lear. Ha, ha, ha.

Foole. Shall see thy other Daughter will vse thee kindly,
for though she's as like this, as a Crabbe's like an
Apple, yet I can tell what I can tell.

Lear. What can't it tell Boy?

Foole. She will taste as like this as, a Crabbe do's to a
Crab; thou canst tell why ones nose stands i'th' middle
on's face?

Lear. No.

Foole. Why to keepe ones eyes of either side's nose,
that what a man cannot smell out, he may spy into.

Lear. I did her wrong.

Foole. Can't it tell how an Oyster makes his shell?

Lear. No.

Foole. Nor I neither; but I can tell why a Snaille ha's
a house.

Lear. Why?

Foole. Why to put's head in, not to giue it away to his
daughters, and leaue his homes without a case.

Lear. I will forget my Nature, so kind a Father? Be
my Horfles ready?

Foole. Thy Affes are gone about 'em; the reason why
the fieren Starres are no mo then seuen, is a pretty reason,
Lear. Because they are not eight.

Foole. Yes indeed, thou would'st make a good Foole.

Lear. To ask'st againe perforce; Monster Ingratitude!

Foole. If thou wert my Foole Nunckle, I'd haue thee
beaten for being old before thy time.

Lear. How's that?

Foole. Thou should'st not haue bin old, till thou had'st
bin wile.

Lear. O let me not be mad, not mad (sweet Heauen) keepe
me in temper; I would not be mad. How now are
the Horfles ready?

Genl. Ready my Lord.

Lear. Come Boy.

Actus Secundus. Scena Prima.

Enter Bostard, and Coran generally.

Doff. Saue thee
Cor. And your?
With your Father, and giuen him notice
That the Duke of *Corwall*, and *Regan* his Duchesse
Will be here with him this night.
