we can't talk about *research* the way we did years and years ago

we can't talk about *research* the way we did years and years ago

we'll be able to *innovate* only when we'll feel *free* to experiment

we can't talk about *research* the way we did years and years ago

we'll be able to *innovate* only when we'll feel *free* to experiment

the future of open science is *now*

# open science and digital research data

the Open Science movement *encourages* researchers to *share* research output *beyond* the contents of a published academic article

**data as first-class citizens**  
**barriers to data sharing and**  
**how to overcome them**  
**open data outside the**  
**academic bubble**

# data as first-class citizens

barriers to data sharing and  
how to overcome them

open data outside the  
academic bubble

# data-informed science

experiments:  
empirical science

thousands  
of years ago

laws:  
theoretical science

last few  
hundreds years

simulations:  
computational  
science

last few  
decades

data:  
eScience

today

# data-informed science

experiments:  
empirical science

science

reproducibility (\*) spectrum

the idea is that **objects** that belong together should be linked to each other (and other objects), so that they can be **discovered** on the web

reproducibility is the minimum standard for research validity

REPRODUCIBLE

# the FAIR principles: guidance for data stewardship

the FAIR principles have been designed to assist **discovery** and **reuse** of research objects through the web

**FAIR != OPEN**

**FAIR comes in degrees**

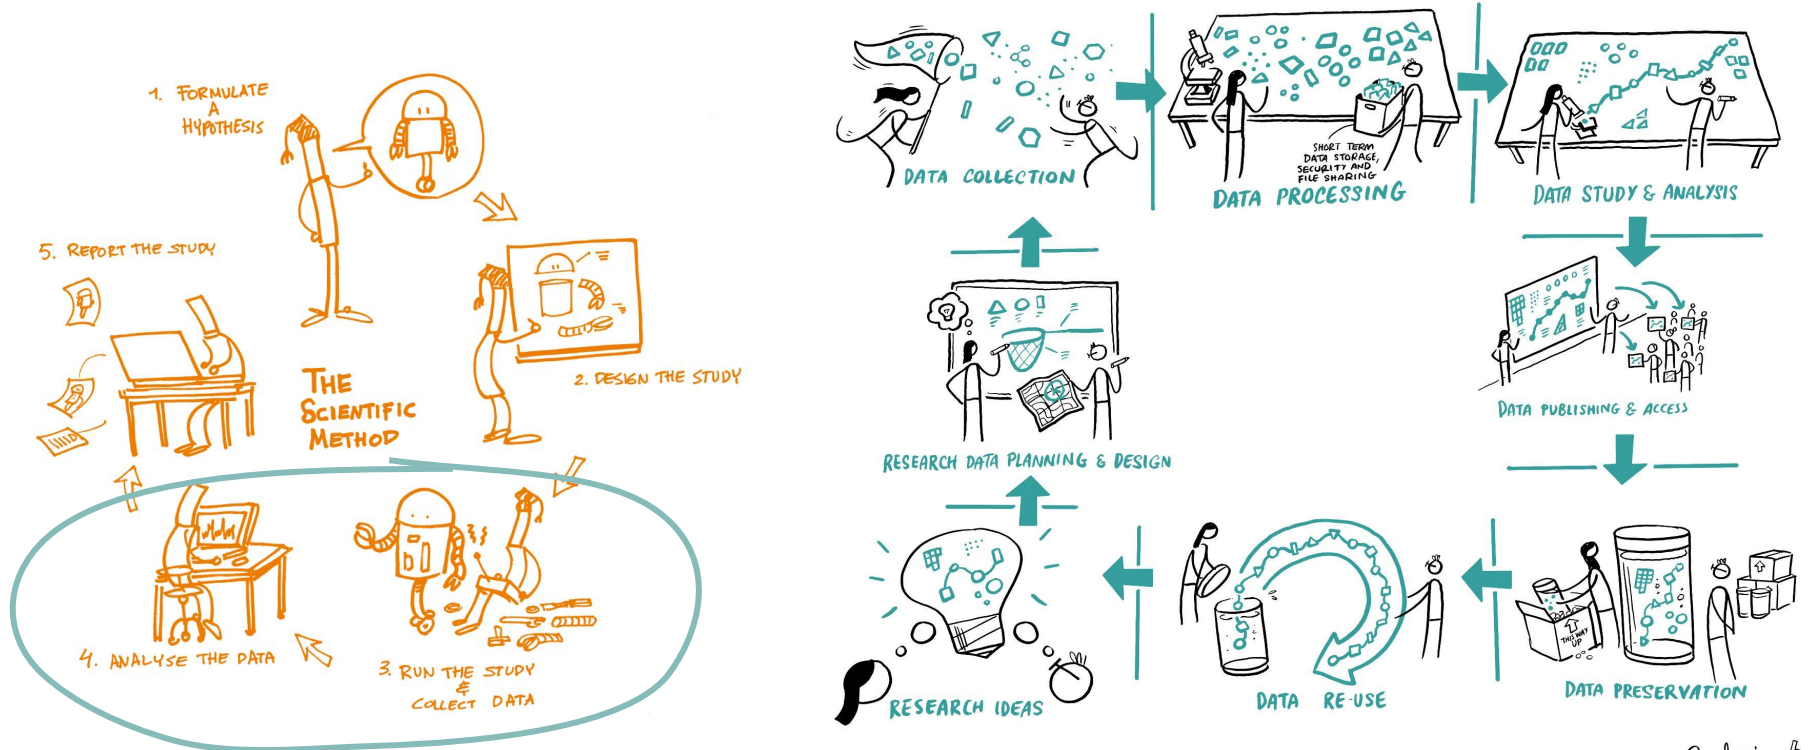

**FAIR = agnostic of technical implementations**

# data have a life cycle on their own

# data have a life cycle on their own

Scriberia

data as first-class citizens

**barriers to data sharing and  
how to overcome them**

open data outside the  
academic bubble

# why is data sharing so hard?

it requires  
additional skills

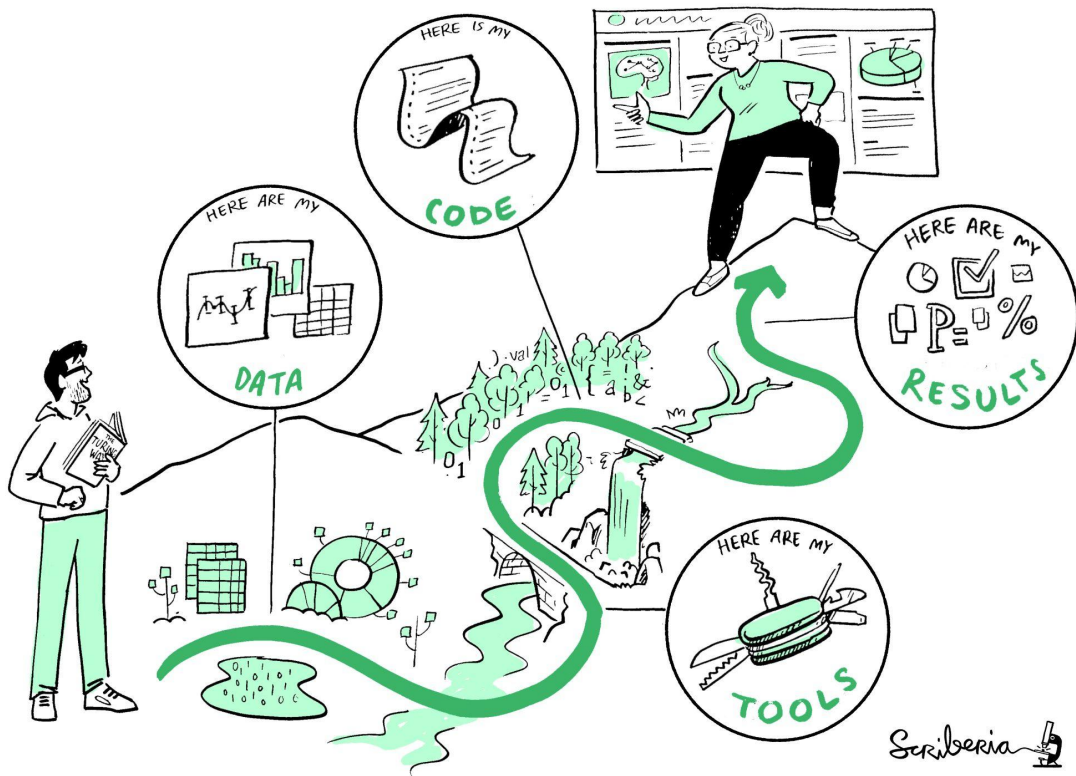

it takes time  
(on already very  
busy agendas)

it's not rewarding  
(enough?)

we tend to hold  
ourselves to higher  
standard than  
others

# a FAIR journey

# turning FAIR into practice

## FAIR Cookbook

---

Created by researchers and data managers professionals, the FAIR Cookbook is an online resource for the Life Sciences with recipes that help you to make and keep data Findable, Accessible, Interoperable and Reusable (FAIR).

---

### Turning FAIR into practice

The **FAIR Principles** put specific emphasis on enhancing the ability of machines to automatically find and use the data, in addition to supporting its reuse by individuals. However, the FAIR Principles are aspirational and generic. The FAIR Cookbook guides *researchers* and *data stewards* in their FAIRification journey; and also provides *policy makers* and *trainers* with practical examples to recommend in their guidance and use in their educational material.

# too easy not to do

## F Findability

### Exemplar recipes:

- 🔍 Unique, persistent identifiers
  - 🔍 Search engine optimization
- 

→ [More about Findability](#)

## A Accessibility

### Exemplar recipes:

- ☁ Transferring data with SFTP
  - ☁ Downloading data with Aspera
- 

→ [More about Accessibility](#)

## I Interoperability

### Exemplar recipes:

- 🧩 Selecting terminologies and ontologies
  - 🧩 Creating a metadata profile
- 

→ [More about Interoperability](#)

## R Reusability

### Exemplar recipes:

- ♻ Data licenses
  - ♻ Declaring data's permitted uses
- 

→ [More about Reusability](#)

# we need to invest more in data stewardship

WORLD VIEW | 25 February 2020

## Invest 5% of research funds in ensuring data are reusable

It is irresponsible to support research but not data stewardship, says Barend Mons.

cost of not having FAIR research data estimated at least **€10 billion** each year in the academic sector alone, and **€16 billion** in *lost* innovation opportunities

# we need to invest more in data stewardship

WORLD VIEW | 25 February 2020

## Invest 5% of research funds in ensuring data are reusable

It is irresponsible to support research but not data stewardship, says Barend Mons.

Cultural obstacles to research data management and sharing at TU Delft

## “Red zones” in Sicily: a story of civic hacking

### ORDINA

#### Articolo 1

*(Ulteriori disposizioni urgenti per i Comuni di Acquaviva Platani, Alessandria della Rocca, Barcellona Pozzo di Gotto, Calascibetta, Cattolica Eraclea, Marianopoli - istituzione della zona rossa -)*

1. In aggiunta alle vigenti misure contenitive del contagio, nei territori dei Comuni di Acquaviva Platani, Alessandria della Rocca, Barcellona Pozzo di Gotto, Calascibetta, Cattolica Eraclea, Marianopoli, dall'8 aprile 2021 fino al 22 aprile 2021 compreso, si applicano le disposizioni di cui al decreto legge 1 aprile 2021, n. 44, nonché al decreto del Presidente del Consiglio dei ministri del 2 marzo 2021 e sue modificazioni e/o integrazioni per la c.d. zona rossa.

#### Articolo 2

*(Proroga della zona rossa per i Comuni di Caltavuturo e San Mauro Castelverde)*

1. Per il Comune di San Mauro Castelverde è prorogata, fino al 6 aprile 2021, l'efficacia delle disposizioni di cui all'Ordinanza contingibile e urgente del Presidente della Regione n. 20 del 10 marzo 2021.
2. Per il Comune di Caltavuturo è prorogata, fino al 6 aprile 2021, l'efficacia delle disposizioni di cui all'Ordinanza contingibile e urgente del Presidente della Regione n. 21 del 15 marzo 2021.

### Covid-19 | 2021 | Comuni siciliani attualmente in zona rossa

# data and industry

## The FAIR Toolkit for Life Science Industry

Use cases and methods have been collated by data science professionals from leading companies in the pharmaceutical, agrifood and biotechnology sectors

<https://fairtoolkit.pistoiaalliance.org/>

the most relevant benefit of FAIR data to **any organization** is much greater reusability beyond the initial and primary purpose

the **linked metadata** provide value as the permanent scientific record, even when the original data has lost immediate value, if it is archived or eventually deleted as part of the data life cycle

# Thank you
