Determining the vision for a credible research system and implementing it are altogether different challenges

# Implementation Issues and Factors

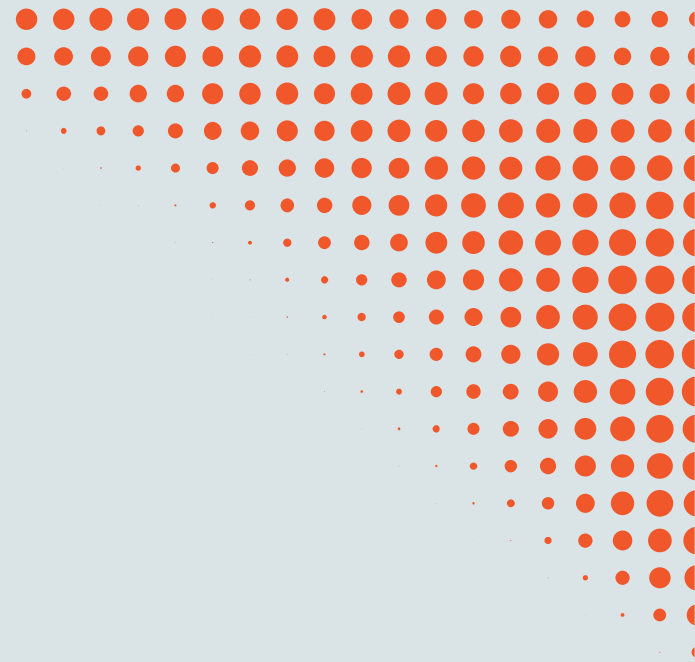

- Existing research culture
  - Centralization of authority
  - autonomy of key players for change
  - Research integrity
  - Lability of research culture
- Policymakers' priorities
- Large disconnect between large, umbrella level networks with grassroots level researchers

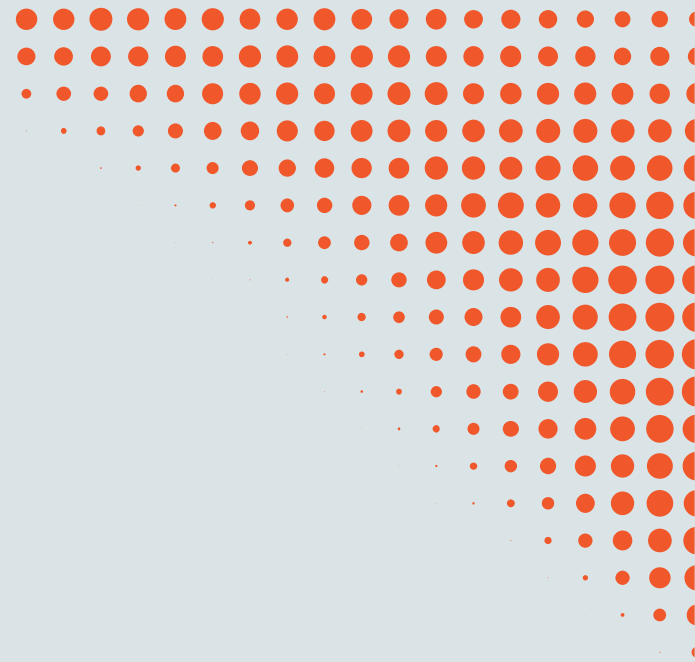

The goal is that every researcher,  
institution and system produces  
credible science – regardless of the  
journey

# Implementing Strategic Change

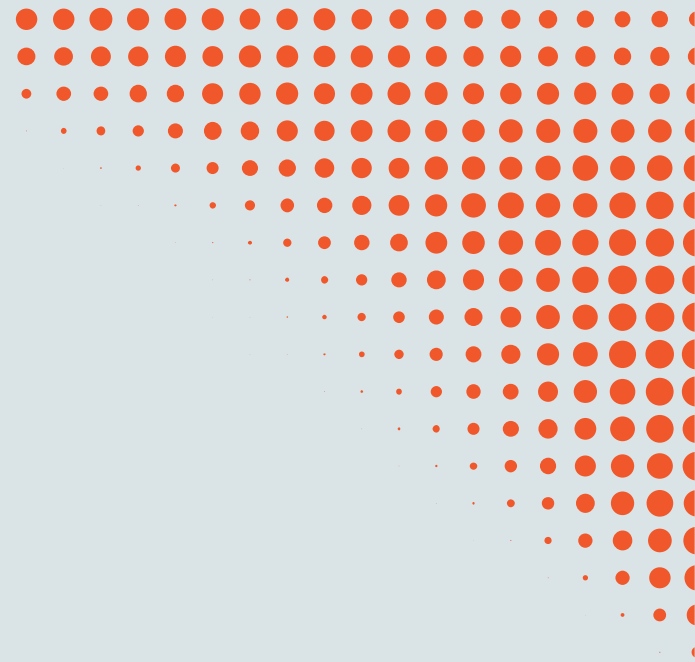

# 1. Navigate Competing Priorities

## 2. Be sensitive to culture

# 3. Co-Design, not Transfer

# ADVANCING SCIENCE IN SOUTHEAST ASIA WEB CONFERENCE 2021

SOUTHEAST ASIAN NETWORK FOR OPEN SCIENCE - INTERNATIONAL SCIENCE COUNCIL ASIA PACIFIC OFFICE - UNSW SYDNEY  
PSYCHOLOGY - CENTER FOR OPEN SCIENCE - WORLD CONFERENCES IN RESEARCH INTEGRITY FOUNDATION - CITIZEN SCIENCE  
ASIA - EMOTIONAL HEALTH FOR ALL FOUNDATION

***Advancing Science in Southeast Asia* is a region wide web conference organized by globally leading organizations. Join this event to learn about recent developments in science while covering core, fundamental topics as we realize the research potential of the region. All workshops will be subtitled in the major languages across Southeast Asia. For updates, follow @OpenScienceSEA on Twitter.**

For every idea we have pertaining  
to science as a whole, we must  
consider in which contexts it will  
work

# Thank you
