# .How it started

## Preserving Digital Heritage

**"Member States need appropriate frameworks to secure the protection of their digital heritage. Market forces alone will not achieve this."**

**"The digital heritage of all regions, countries and communities should be preserved and made accessible, creating over time a balanced and equitable representation of all peoples, nations, cultures and languages."**

UNESCO Guidelines for the preservation of digital heritage, **2003**

April **2005**

Letter of 6 European Heads of State to the Commission

**"A digital library that is a single, direct and multilingual access point to the European cultural heritage."**

European Parliament, 27 September **2007**

**"A unique resource for Europe's distributed cultural heritage... ensuring a common access to Europe's libraries, archives and museums."**

Horst Forster, Director, Digital Content & Cognitive Systems Information Society Directorate, European Commission

# .How it started

2007

EDLnet starts building Europeana

2008

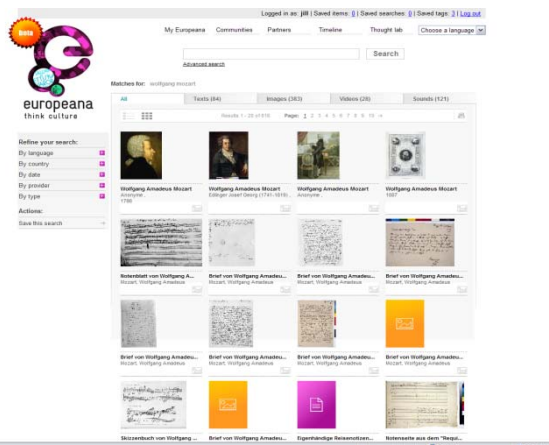

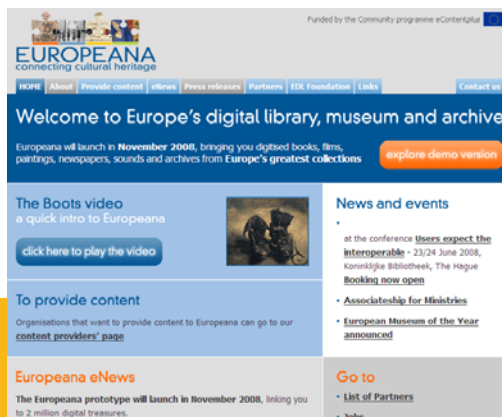

First Europeana projects:

- EDLocal (Local and Regional Content)
- Arrow (Orphan Works)
- Athena (Cultural Heritage Networks)
- EFG (Film)
- EPA (Documents & Archives)

November 2008

**Europeana prototype launched** (access to 4.5 Mio. data items)

# .2008

10 Years Europeana

# .Main aims

- bring Europe's digitised cultural heritage material **online** and to **promote** its cross-border visibility and use across Europe;
- offer solutions for the trans-European **interoperability** and **accessibility** of digital resources of European heritage;
- further improve the conditions for **re-use** and facilitate **take-up** of digital cultural content and metadata in other sectors, e.g. research, education, tourism or the creative industries; and
- provide a **multilingual, user-friendly access point** to Europe's rich and diverse heritage.

# Europeana Publishing Framework: Content

Bild (28,040,628)  
Text (21,830,388)  
Ton (796,025)  
Video (495,063)  
3D (17,183)

Here you see how the different content tiers of the Publishing Framework work. In this example, we use images. For video, audio, text and 3D, please see the Europeana Publishing Guide.

TIER	DIRECT LINK TO OBJECT PROVIDED	RIGHTS STATEMENTS	EUROPEANA API DISPLAYS	BENEFITS (CUMULATIVE)
1 Europeana as a <b>search engine</b> . <i>'I want to search and browse collections online.'</i>	Yes. Minimum of 0.1 megapixel in size	Any from the <a href="#">Europeana licensing Framework</a>	Metadata plus direct link to object	<b>Findability</b> - indexed by search engines, linked data technology <b>Web traffic</b> - click-throughs to your site
2 Europeana as a <b>showcase</b> . <i>'I want to be guided through collections online.'</i>	Yes. Minimum of 0.42 megapixel in size	Any from the <a href="#">Europeana licensing Framework</a>	Metadata plus direct link to object	<b>Use in thematic collections</b> - providing context and relation to other collections on Europeana <b>More marketing</b> through Europeana
3 Europeana as a <b>distribution platform</b> for non-commercial reuse. <i>'I want to find, view and use collections in my own non-commercial projects.'</i>	Yes. Minimum of 0.95 megapixel in size	Any from the <a href="#">Europeana licensing framework</a> that allow for some re-use	Metadata plus direct link to object and can filter to show only re-usable objects	<b>Impressions</b> - collections viewed on platforms outside of Europeana <b>Use in Europeana's existing partnerships and projects</b> in e.g. education and research <b>Use in apps and services</b> by third parties
4 Europeana as a <b>free reuse platform</b> . <i>'I want to find, view and use collections in whatever way I choose.'</i>	Yes. Minimum of 0.95 megapixel in size	Any from the <a href="#">Europeana licensing framework</a> that allow free re-use	Metadata plus direct link to object and can filter to show only re-usable objects	<b>Use on open platforms</b> like Wikimedia <b>Use by creative industry</b> <b>Use in commercial apps and services</b>

# Metadata

## EDM Europeana Data Model

Europeana developed a Metadata model that allows for...

- different description depths
- domain-specific application profiles
- and enables the re-use of existing standards

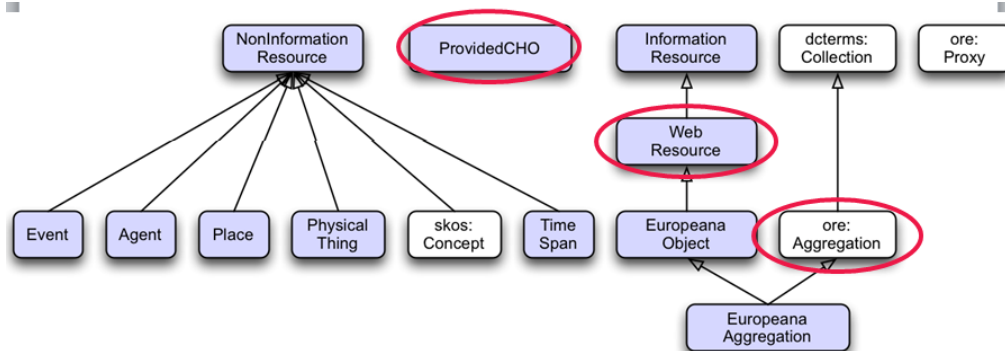

## EDM basis

- [OAI ORE](#) (Open Archives Initiative Object Reuse & Exchange) for organizing an object's metadata and digital representation(s)
- [Dublin Core](#) for descriptive metadata
- [SKOS](#) (Simple Knowledge Organization System) for conceptual vocabulary representation
- [CIDOC-CRM](#) for event and relationships between objects

## → Adopt Semantic Web representation principles (RDF)

- Re-use and mix different vocabularies together
- Preserve original data and still allow for interoperability

## Collections

## Cultural Heritage in 3D

This session from Europeana 2020 introduces principles and tips for digitising cultural heritage in 3D.

## How the first heritage video ever was stored on DNA - a case study

This presentation from Europeana 2020 demonstrates the potential of DNA as an archival storage mechanism.

## Human centred approach to AI

This session from Europeana 2020 highlights three areas of human centred approach to AI from across Europe that support cultural heritage professionals.

## Timematrix for researchers

This webinar - aimed at academic researchers in data mining and data science - explores the potential of adapting automatically produced descriptions of paintings to the time period when they were created.

## EuropeanaTech x AI: Introduction to the series and the "Saint George on a Bike" Project

This webinar explores the Saint George on a Bike project, which aims to improve the quality and quantity of open metadata associated with European cultural heritage imagery with Machine Learning.

## EuropeanaTech x AI - Cultural AI Lab: Responsible AI and the Politics of Metadata

The Amsterdam based Cultural AI Lab accelerates research on the intersection of humanities and artificial intelligence. Explore the lab and its projects in this webinar.

## Representation of Diverse Histories in Europeana

Members of Europeana's Collection Engagement team present on the 'Representation of Diverse Histories in Europeana' at the 13th International Conference on the Inclusive Museum.

## ESACH Talks! Museums, Art and Cultural Heritage

Raul Gomez Hernandez, Collections Engagement Intern at Europeana Foundation, discusses promoting diversity and inclusion with digital collections through #reinventingBeethoven.

## A research project about Virtual Reality (VR) & accessibility

This session from Europeana 2020 presents a research project on Extended Reality (XR), accessibility, and uses of these technologies for people with reduced mobility.

## Easy language in audiovisual content

In this session from Europeana 2020 participants gain an awareness of new audiovisual accessibility needs.

## Introduction to Accessibility for UX Designers

This session from Europeana 2020 aims to help participants get a better understanding of (web) accessibility.

## Making Sense: Exploring Moving Images Through Non-visual Multi-Sensory Experiences

This presentation from Europeana 2020 explores research aimed at improving access for visually impaired audiences.

# Semantics

<https://pro.europeana.eu/page/semantic-mindmap>

# Europeana APIs

Europeana provides various APIs for re-use in the cultural and creative communities.

## EXPLORE OUR APIS

### Europeana REST API

The Europeana REST API allows you to build applications that use the wealth of our collections drawn from the major museums and galleries across Europe. Find the API documentation about the Europeana REST API.

### Search API

The Search API provides a way to search for metadata records and media on the Europeana repository, for instance, "give me all results for the word "Vermeer".

### Record API

API documentation explaining how to use the Europeana Record API. The Record API provides direct access to the Europeana data, which is modeled using the Europeana Data Model (EDM).

### Entity API

API documentation explaining how to use the Europeana Entities API. The Entities API allows you to retrieve named entities from Europeana's Entity Collection.

### Annotations API

API documentation explaining how to use the Europeana Annotations API. The Annotations API allows you to create and retrieve user and machine created annotations on Europeana objects or media.

### IIIF APIs

The IIIF APIs offer an alternative and complementary means to group, search and access information about the digital objects specifically tailored for the display of newspaper materials.

# ChIA search

The screenshot displays the ChIA search interface. At the top, a blue arrow points to the search bar. The search bar contains the text "vocab.getty.edu/page/aa" and a dropdown menu set to "-- Any field --". Below the search bar, there are three identical sections, each labeled "ChIA Vocabulary". Each section contains a search bar with the same text and a dropdown menu set to "-- Any field --". Below these sections, there is a "Facets" section with a dropdown menu set to "Color palette" and a dropdown menu set to "Any". Below the facets, there is a "Search on Europeana" button and a dropdown menu set to "100". Below the search bar, there is a message "Showing results: 1 - 100 of 284064". Below this message, there is a pagination bar with buttons for 1, 2, 3, 4, and 10, followed by a message "Query exceeded maximum of 1000 results". Below the pagination bar, there are two buttons: "List" and "Grid". Below the buttons, there are five result cards. Each card has a title, a source, a description, and an image. The titles are "Scharrelend gevogelt...", "Hoenderhof", "Studies van een haan...", "Kippen en vogels", and "Kippen, een haan en ...". The source for all cards is "Rijksmuseum". The descriptions are "Blad 13 verso uit een schetsboek met 15 bladen.", "Blad 22 verso uit een schetsboek met 28 bladen.", and "Blad 22 verso uit een schetsboek met 28 bladen.". The images are sketches of birds and a landscape.

# ChIA & Europeana

The development and provision of the ChIA search platform was realised by the Europeana aggregator Europeana Local Austria.

Europeana Local Austria was one of the first aggregators to Europeana and has been cooperating with Europeana since 2008.

The Europeana Local Service Centre is located in Graz, Austria, at ALT Applied Information Technique – and lead by Gerda Koch.
