

Open Science and Scholarly Communication in Greece

amplifying understanding and
building capacity through synergies

#OpenScienceGreece

Elli Papadopoulou, ATHENA Research and Innovation Center / OpenAIRE; @elli_lib
Natalia Manola, ATHENA Research and Innovation Center / OpenAIRE; @nataliamanola
Athanasia Salamoura, Scholarly Communication Unit, HEAL-Link; @AthanasiaSal
Giannis Tsakonas, University of Patras / HEAL-Link; @gtsakonas

context

- Two OpenAIRE members build bridges between academic and research communities:
 - “Athena” Research Center (NOAD).
 - “HEAL-Link”, the consortium of academic libraries.
- A steady collaboration that aims at supporting researchers, RPOs, RFOs and EOOSC at national level, by providing sustainable Open Science options.
- Engage in Open Science community building.
- Research Data Services development.

data infrastructures & services

Research Data Services and Tools

- Joint efforts to develop **interconnected infrastructures** for Research Data.
 - Hellenic Data Service "HELIX" (<https://hellenicdataservice.gr/main/>)
 - University data repositories "HARDMIN" (<https://hardmin.heal-link.gr>)

OpenAIRE effect

- **Open Science compliant** institutional repositories (literature and data).
- Argos for machine actionable **DMPs**.
- **Amnesia** for anonymization of data.

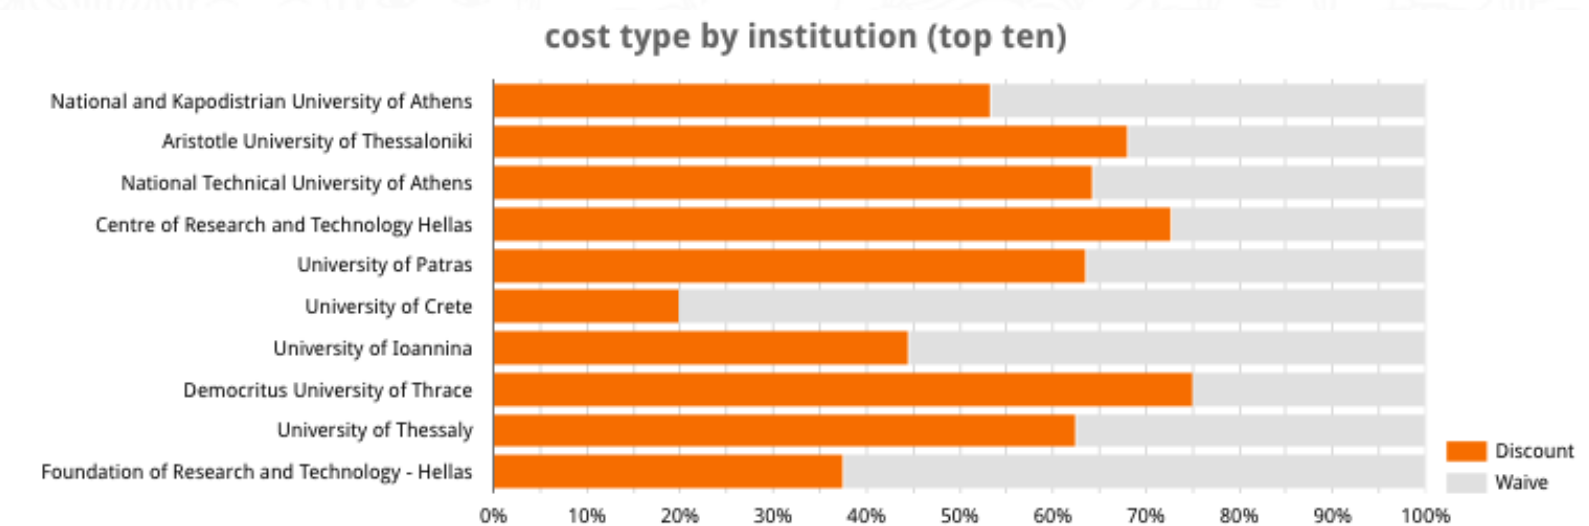

support services

Librarians

- Prepare [material for librarians](#) to promote OA and OS.
- Establish a [help-desk about OA options](#); further support with two tools:
 - inventory of eligible OA journals.
 - listing of publishers' options.
- [Monitor and report](#) about the progress of HEAL-Link Open Access programmes (<https://scholarly.heal-link.gr/monitoring/>).

Researchers

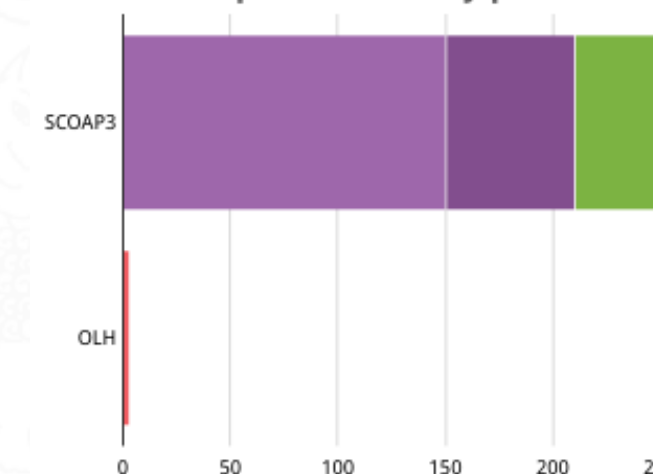

- [Horizon 2020 projects](#) (OpenAIRE Advance)
- [Supporting material](#): e.g. translation of the Open Research Europe guidelines, OpenAIRE factsheets.

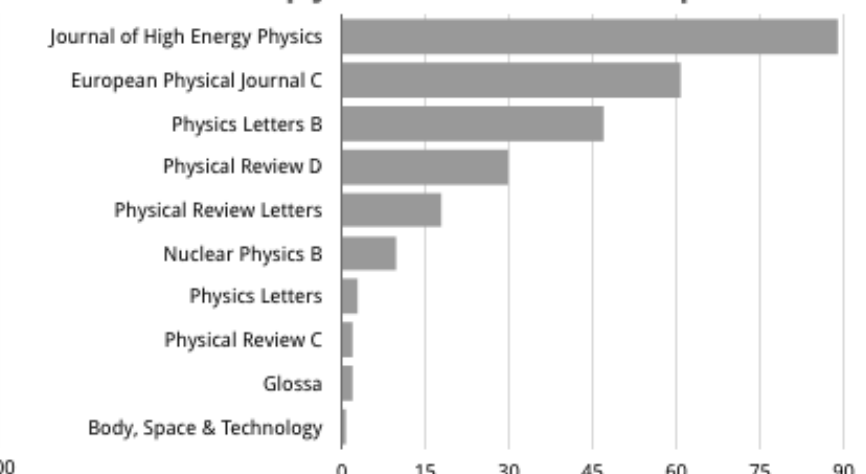

MEMBERSHIPS

National-wide funding by HEAL-Link in the form of membership in two schemes, one for Humanities (Open Library for Humanities) and another for High Energy Physics (SCOAP3). Record Count 263

publications by partner

top journals in memberships

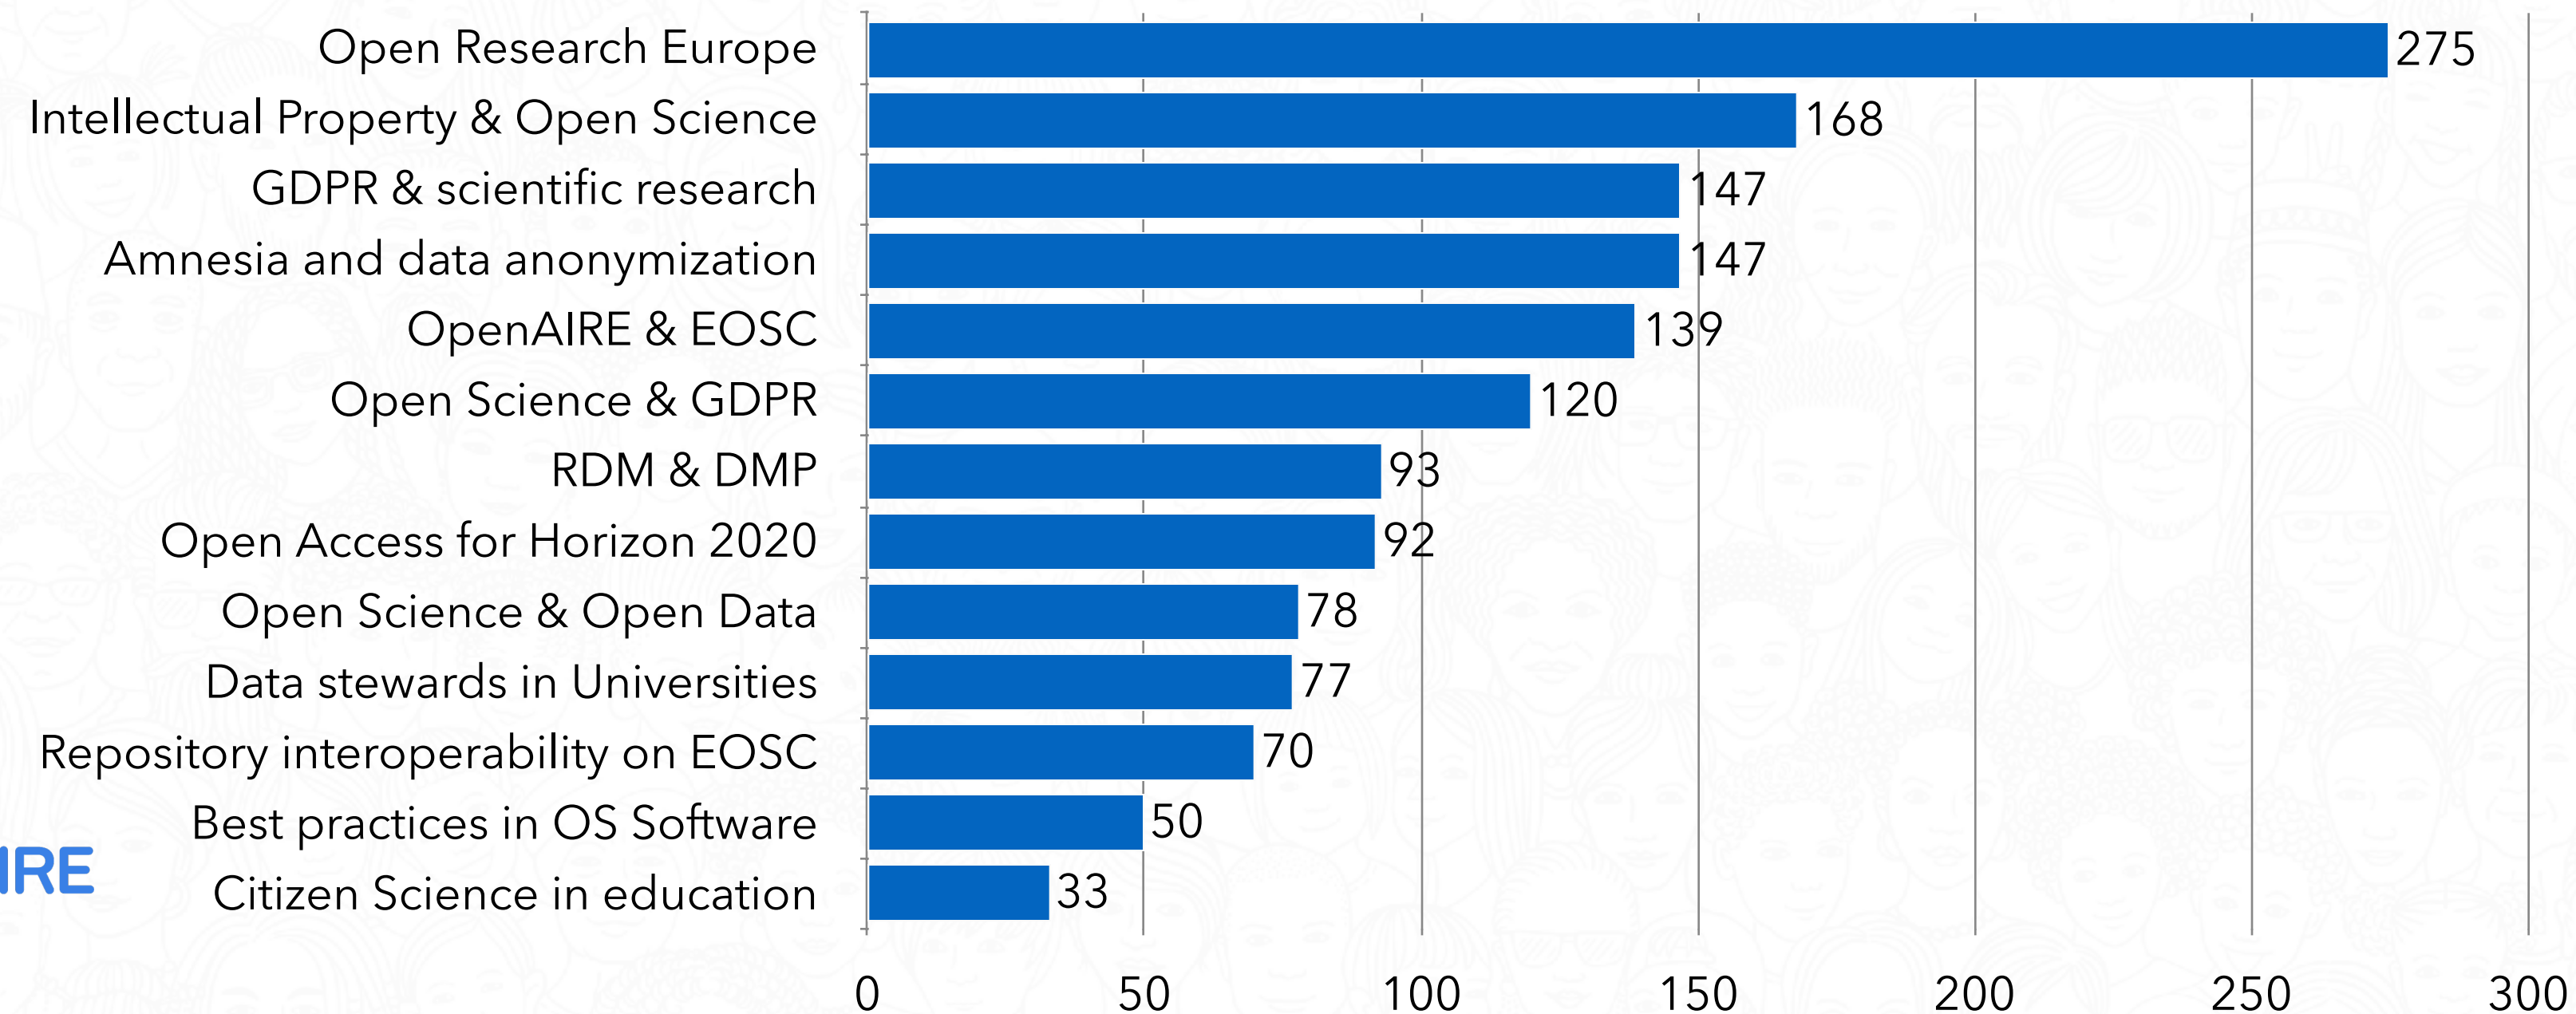

skills & awareness

Librarians

- [Upskilling and reskilling](#) the research support workforce -> emphasis on RDM.
- Engage with the [OA Monographs](#) community to highlight the state and the opportunities in the Greek context.

Researchers

- Wide number of [events on the developments and best practices](#) for Open Access options, Research Data Management and Data Management Plans, EOSC, Open Research Europe, etc.

policies and EOSC alignment

National level

- Co-development of the proposal for a Greek National Open Science Plan (<https://doi.org/10.5281/zenodo.3908953>).

Institutional level

- Co-development of policy templates that promote the FAIR principles in a uniform way.

|---|--|
|  | Safe, fast, and reliable access to the Internet for all |
|  | A digital state offering better digital services to the citizens for all life events |
|  | Development of digital skills for all citizens |
|  | Facilitate the transformation to digital enterprise |
|  | Support and strengthening of digital innovation |
|  | Making productive use of public administration data |
|  | Incorporating digital technologies to all economic sectors |

https://digitalstrategy.gov.gr/vivlos_pdf

covid-19

- Capture the needs and response of the research community.
- Series of webinars and training events that facilitated productive discussions and synergies by presenting:
 - clinical trials and studies,
 - national research infrastructures for computing data for fighting Covid-19,
 - tools that facilitate data management and analysis, such as Argos, OpenRefine, Galaxy, etc.,
 - tools that estimate the bibliographic impact of research publications, such as BIP! Finder.
- Monitor and report about the Greek OA publications on Covid-19.
