The DMP´s test

- What is the researcher's perception regarding the elaboration of a DMP?

- What are the difficulties and doubts in creating a DMP?

- What kind of support does the researcher need to prepare a DMP?

- What can be implemented in a DMP tool to facilitate completing forms?

- 4 major Fiocruz Projects in differet health domains
- From August to December 2020

Public DMPs

After the researchers' responses, we researched the main DMP tools (DMPTool, DMPOnline and Argos) to see how researchers answer metadada questions.

128 public data management plans available in these tools were analyzed.

- DMPOnline: 50 data management plans

- Argos: 8 data management plans (all available in the tool)
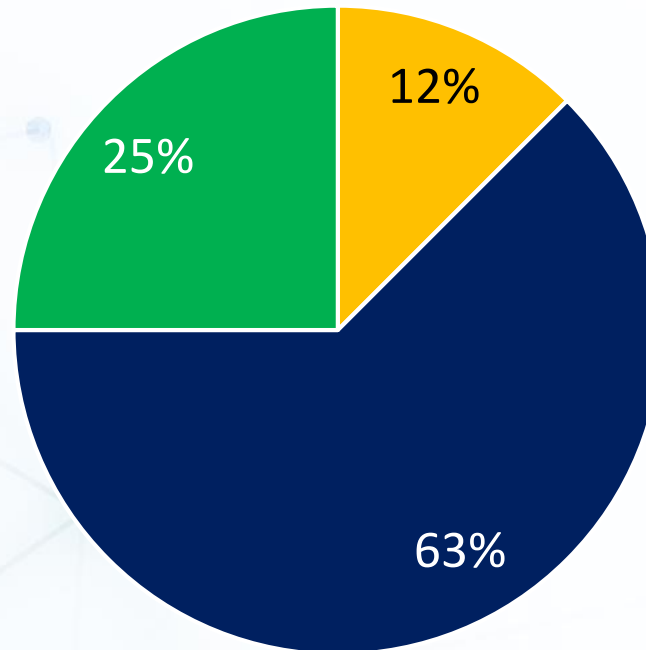

- DMPTool : 70 data management plans

DMP & METADATA

## DMPTool

9%
8%
83%

- Did not answer the question or answered incorrectly
- Filled in correctly
- It just mentioned that a readme file will be made

Argos

12%
25%
63%

- Reported only the metadata standard without specifying the metadata
- Did not answer the question or answered incorrectly
- Filled in correctly

DMPOnline

2%
8%
90%

- Reported only the metadata standard without specifying the metadata
- Did not answer the question or answered incorrectly

CHALLENGES

- Importance of an institutional infrastructure

- Dissemination of instructional materials

- Metadata

  - Periodic training

  - Data Steward Team
