

SST in the *Marginal Ice Zone* of the Arctic Ocean

Michael Steele

& Suzanne Dickinson, Wendy Ermold, Sarah Dewey

***Polar Science Center, Applied Physics Lab, University of WA
Seattle, WA USA***

w/ input from Peter Minnett

&

not-ready-for-sharing analysis by Chelle Gentemann

SST in the *Marginal Ice Zone* of the Arctic Ocean

...preliminary work!

Michael Steele

& Suzanne Dickinson, Wendy Ermold, Sarah Dewey

*Polar Science Center, Applied Physics Lab, University of WA
Seattle, WA USA*

w/ input from Peter Minnett

&

not-ready-for-sharing analysis by Chelle Gentemann

Sea Ice Decline

September Arctic Sea Ice Extent
1979 - 2015

Sea Ice Decline

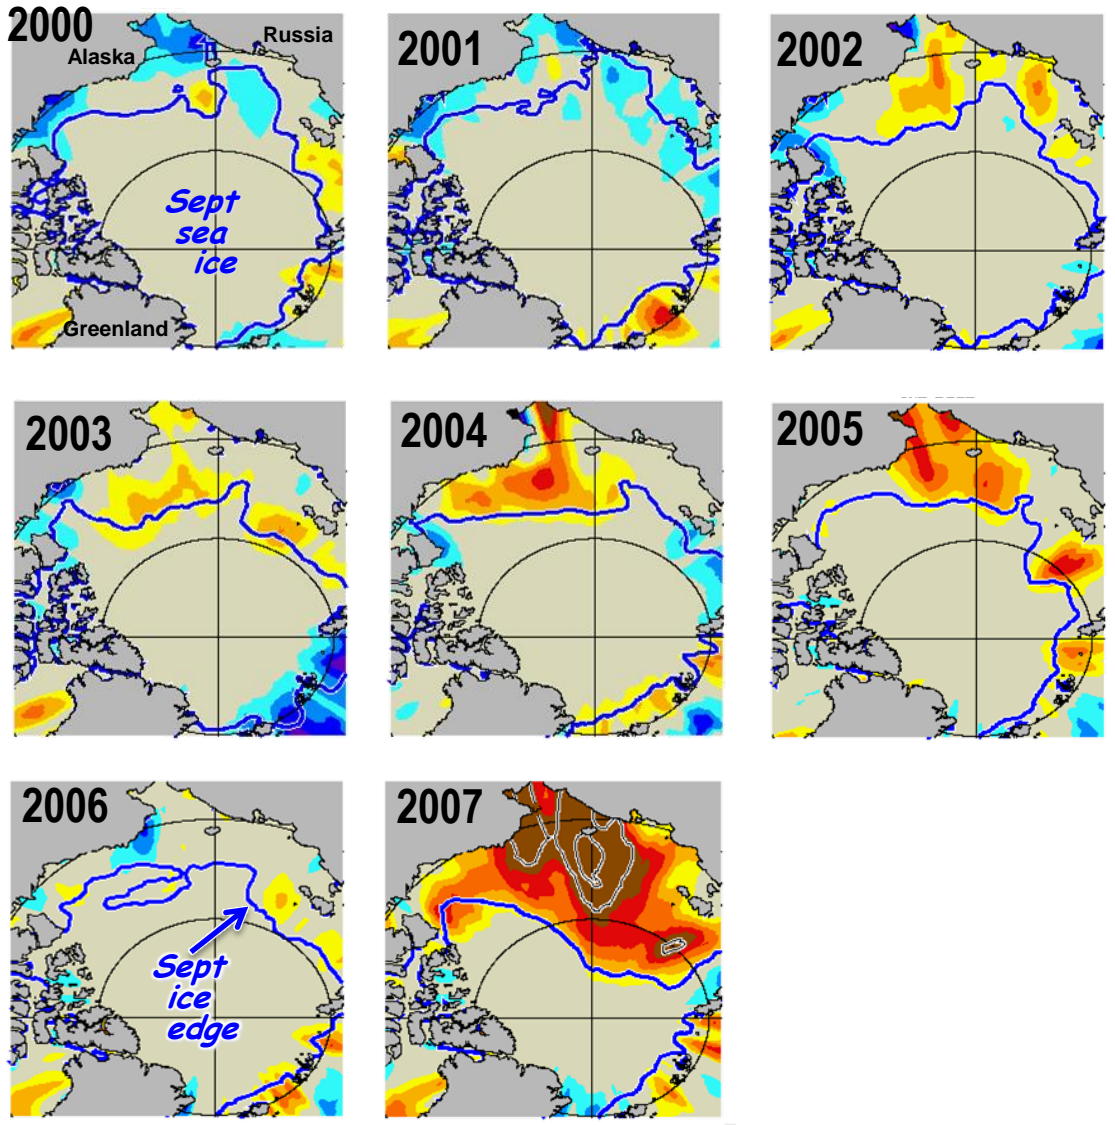

NSIDC (March, 2016):
"Another record low for
Arctic sea ice max.
winter extent"

September Arctic Sea Ice Extent
1979 - 2015

Ice Retreat → Ocean Warming

Steele et al., GRL 2008

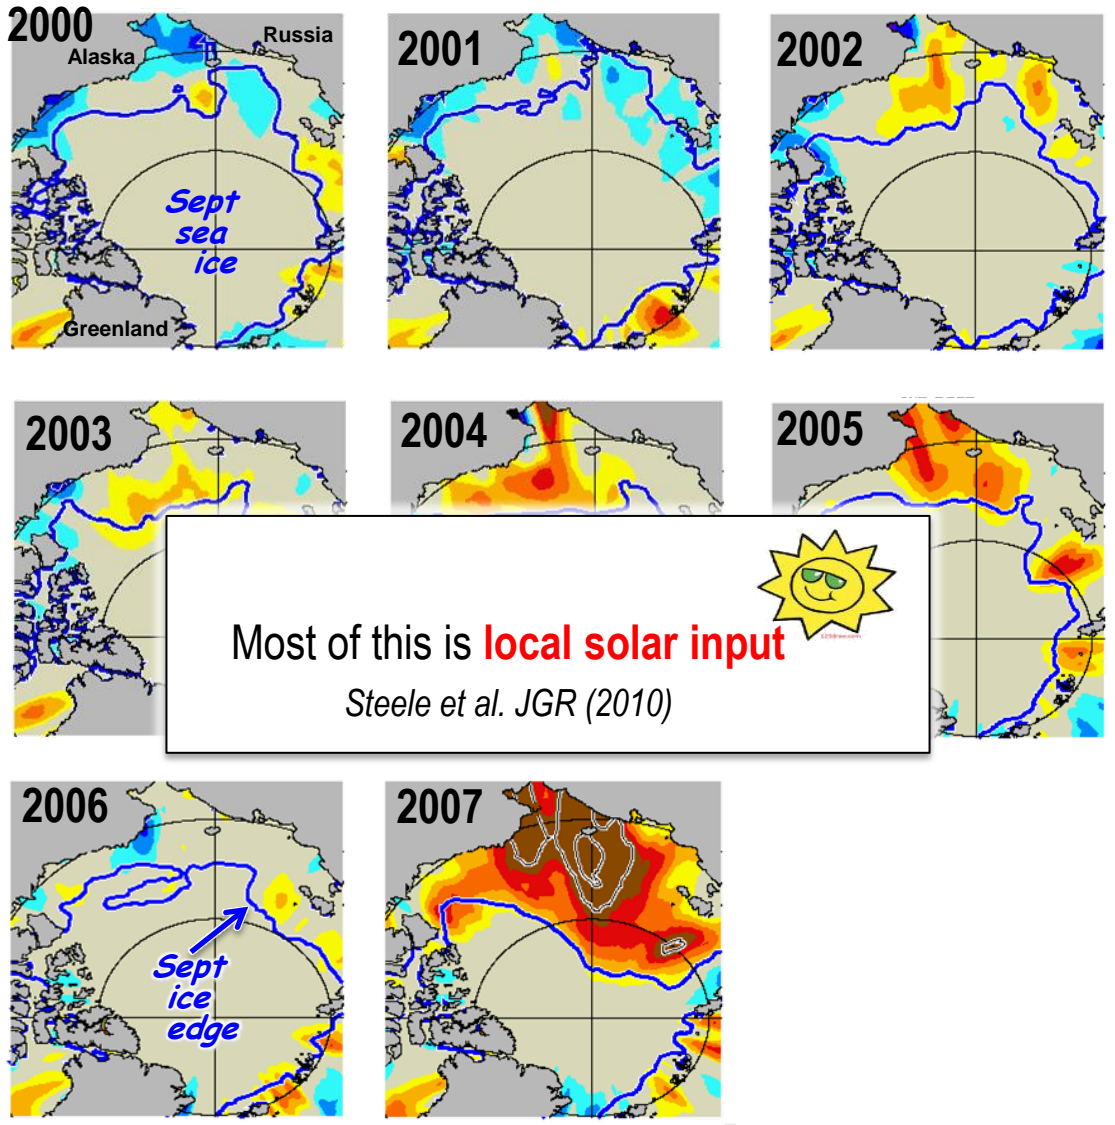

**Anomaly of Summer ≡ JAS
Sea Surface Temperature (°C)**
(relative to 1982-2007 mean)
daily OI.v2 (AVHRR only)

15% ice concentration
(NSIDC's NASA Team SSMIS 25 km)

Ice Retreat → Ocean Warming

Steele et al., GRL 2008

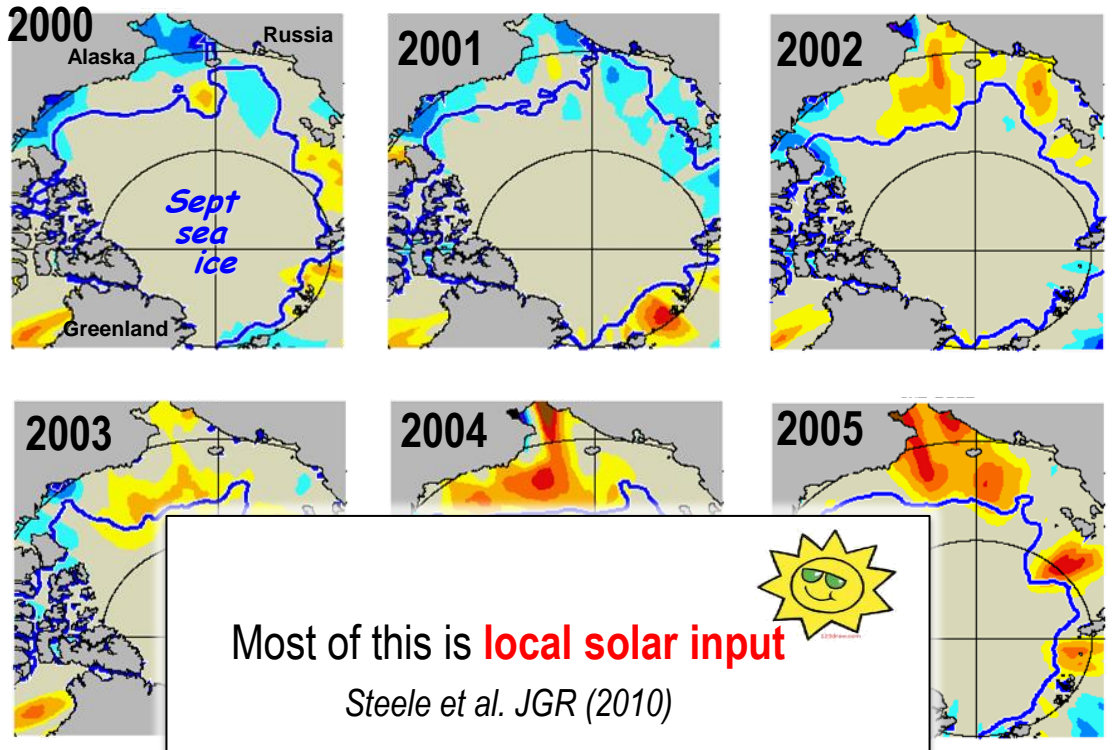

Anomaly of Summer \equiv JAS
Sea Surface Temperature ($^{\circ}\text{C}$)
(relative to 1982-2007 mean)
daily OI.v2 (AVHRR only)

Most of this is **local solar input**
Steele et al. JGR (2010)

15% ice concentration
(NSIDC's NASA Team SSMIS 25 km)

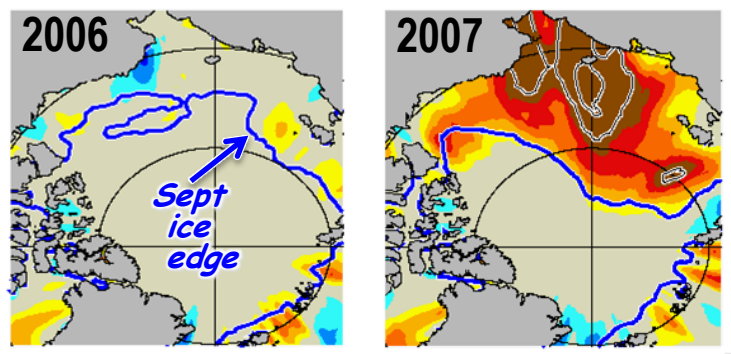

Ice Retreat → Ocean Warming

Steele et al., GRL 2008

Anomaly of Summer ≡ JAS
Sea Surface Temperature (°C)
(relative to 1982-2007 mean)
daily OI.v2 (AVHRR only)

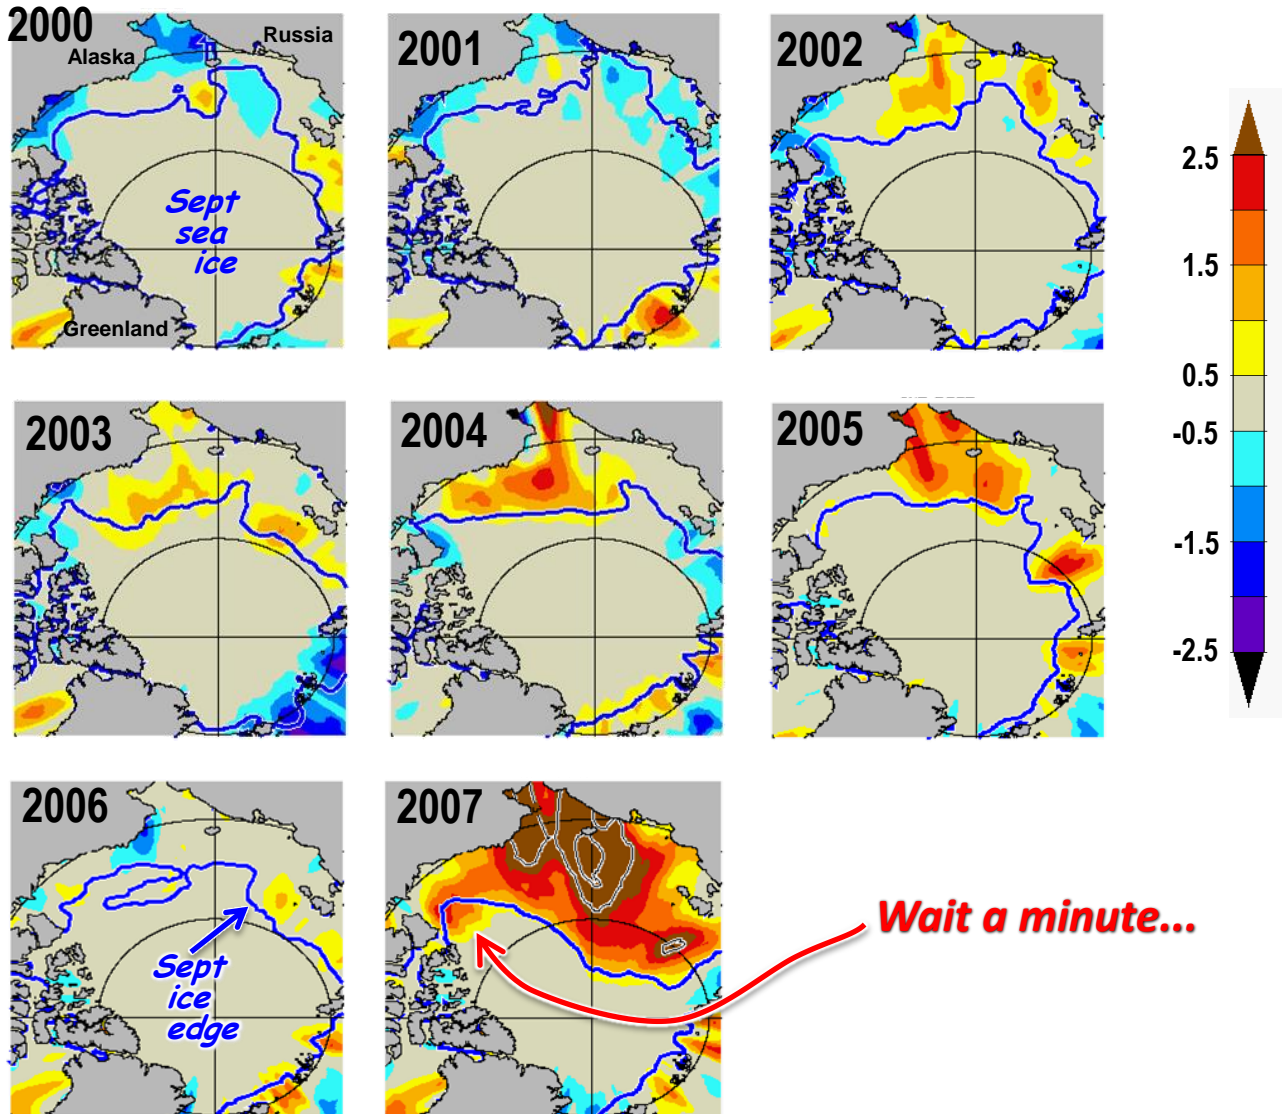

15% ice concentration
(NSIDC's NASA Team SSMIS 25 km)

So what?

- ecosystems
- air-sea fluxes
- sub-surface T_{max} layers
- ice edge "loitering" (Steele et al., 2015)
- ice-albedo fdbk

Ice Retreat → Ocean Warming

Steele et al., GRL 2008

Anomaly of Summer \equiv JAS
Sea Surface Temperature ($^{\circ}\text{C}$)
(relative to 1982-2007 mean)
daily OI.v2 (AVHRR only)

Warm SST under the ice?!

...not the anomaly

SST: August 15, 2007

OI.v2 (AVHRR only)

This is built into (all?) L4 SSTs

...but how realistic is it?

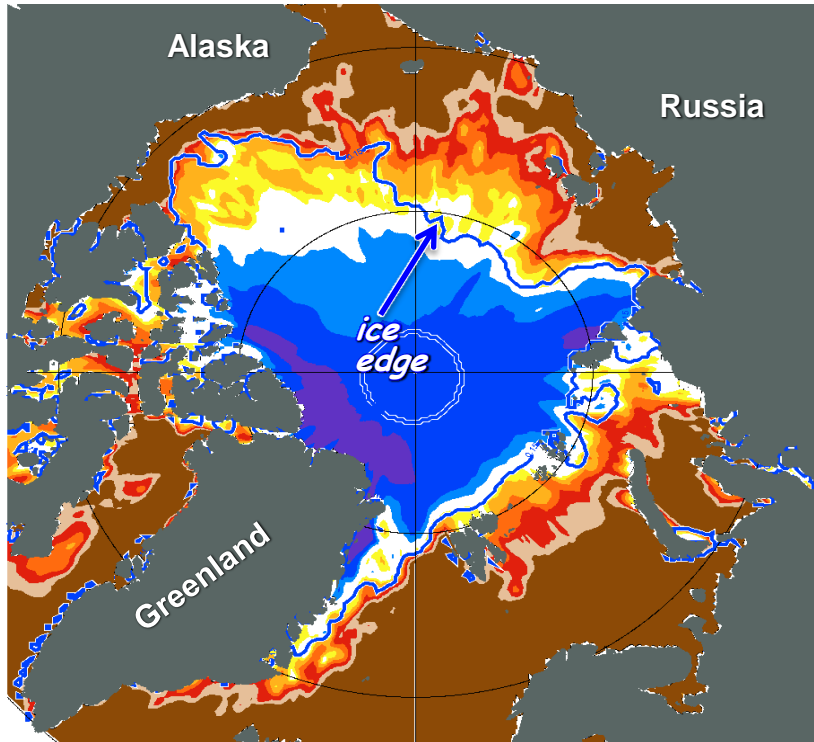

Warm SST under the ice?!

...not the anomaly

SST: August 15, 2007

OI.v2 (AVHRR only)

This is built into (all?) L4 SSTs

...but how realistic is it?

↑
 T_f

Here, most of the Arctic Ocean SST > T_f

Ice pack SST (*summer*)

warm SST?

- How **warm**?
- How **deep**?
- **Wind, solar forcing?**

$0 < \text{ice concentration} < 100\%$

Ice pack SST

"SHEBA" project

Oct 1997 - Sep 1998 drift

Ice pack SST

"SHEBA" project

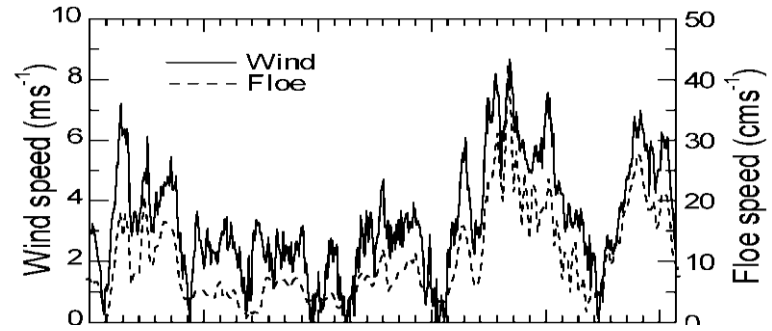

Oct 1997 - Sep 1998 drift

CTD obs in a lead

Summer, 1998

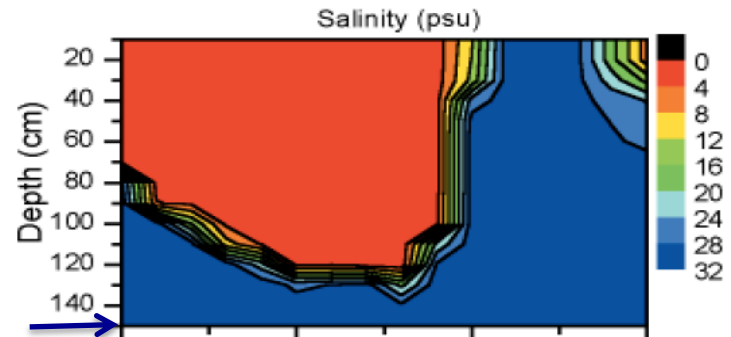

Ice pack SST

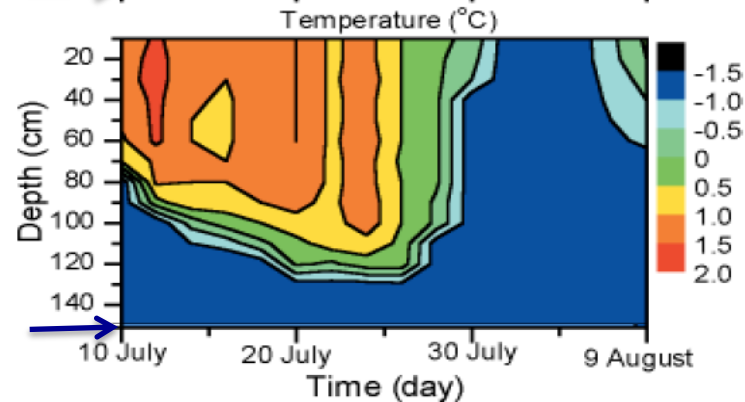

"SHEBA" project
 Oct 1997 - Sep 1998 drift

CTD obs in a lead

1.5
 meters!

1.5
 meters!

Ice pack SST

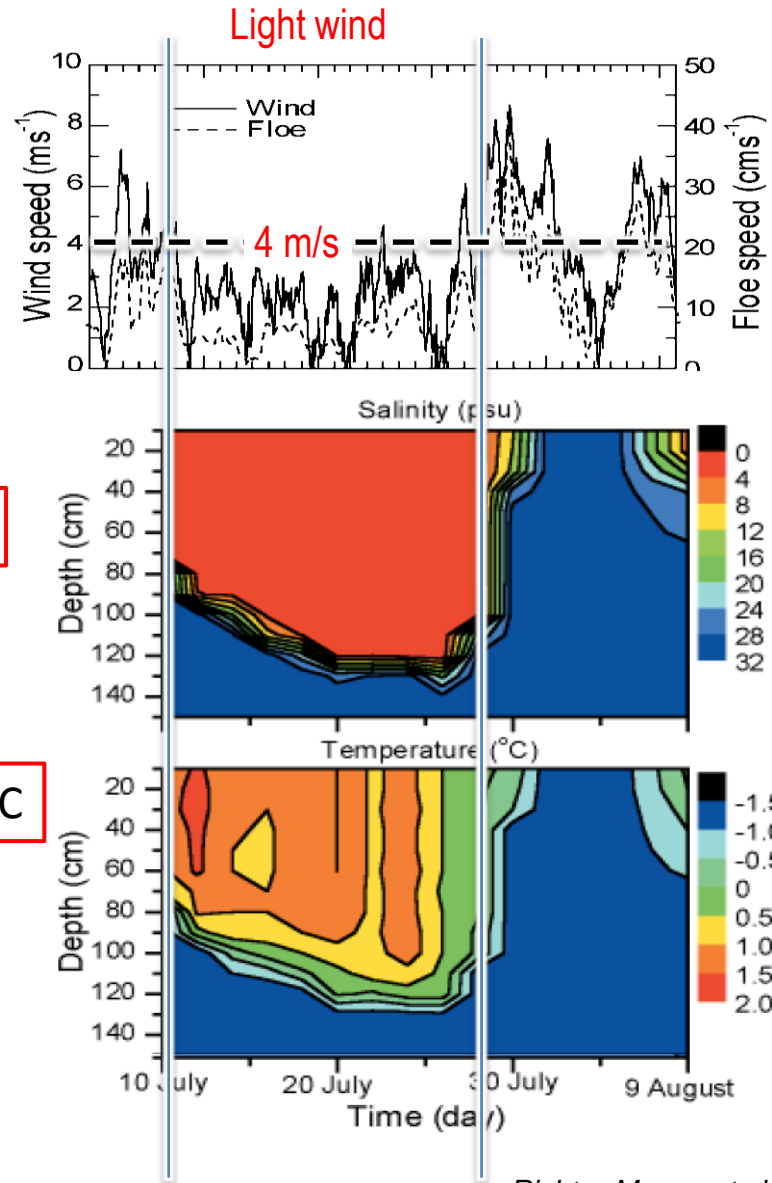

"SHEBA" project
 Oct 1997 – Sep 1998 drift
CTD obs in a lead

2-4 psu!

up to 1.5°C

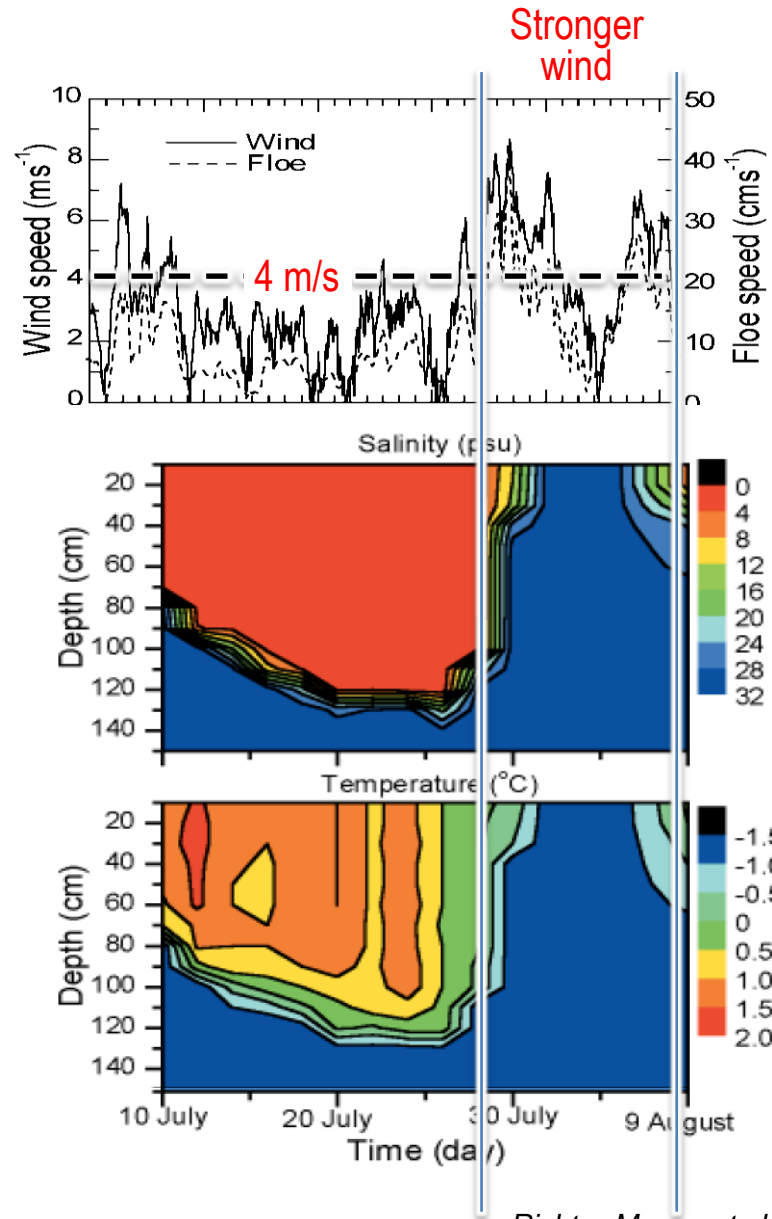

...or about 3°C above T_f

Ice pack SST

"SHEBA" project
 Oct 1997 – Sep 1998 drift
CTD obs in a lead

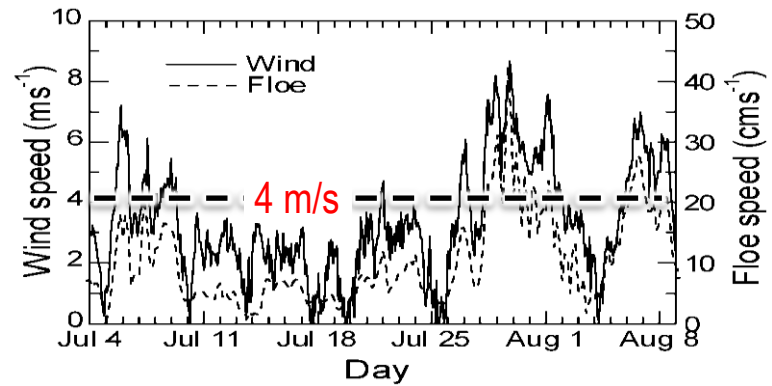

salty

cold

Ice pack SST

“Light vs. strong winds”
 How often?
 ...hmmm...

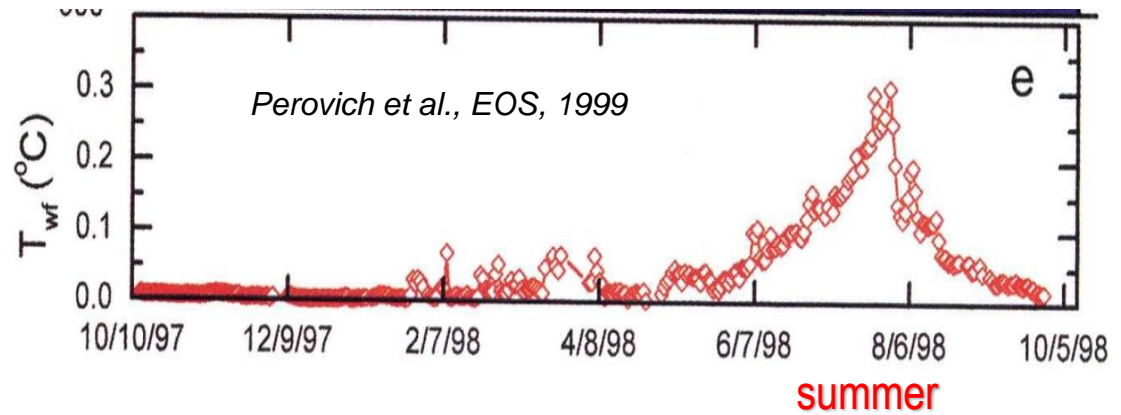

Ice pack SST

"SHEBA" project
 Oct 1997 – Sep 1998 drift

**CTD obs in
 the mixed layer**

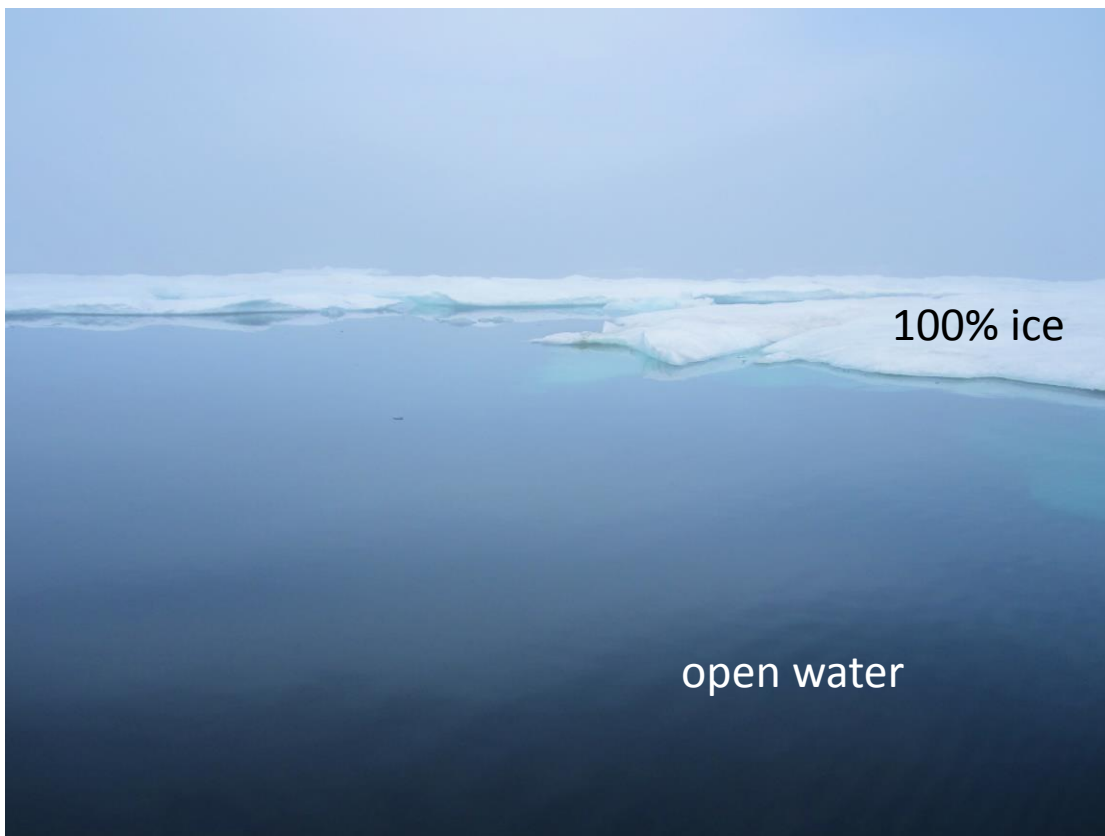

$$T_{\text{mixed layer}} - T_f$$

...only up to 0.3°C above T_f

The Ice Edge

Sometimes it's sharp

The Ice Edge

Sometimes it's sharp

Aqua MODIS

SST (T_i) 100% ice

SST (obs.)

open water

The Ice Edge

Sometimes it's sharp

...but often it's not!

The Marginal Ice Zone (MIZ)

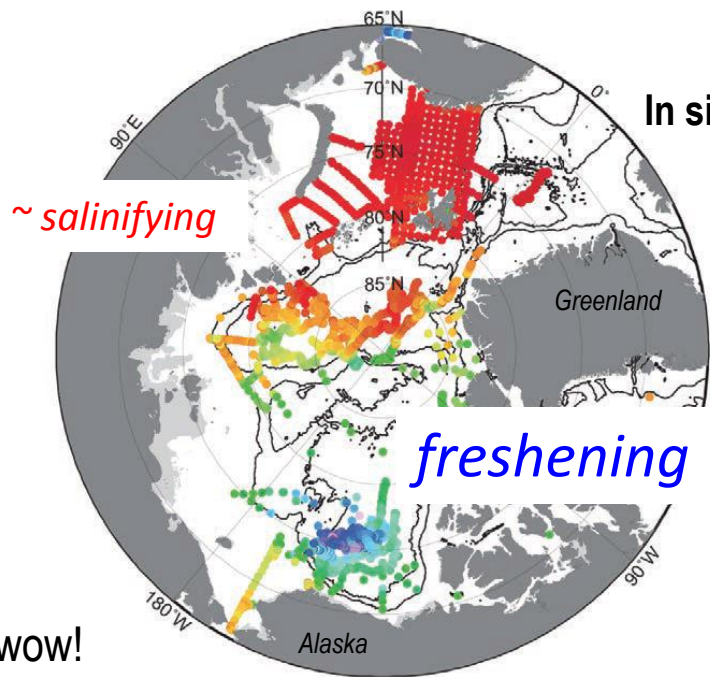

~ 100 km

$$T_f = T_f(S)$$

In situ salinity @ 20 m depth
(2013: ship CTD, buoys)
...mostly **summer**

wow!

Timmermans et al. (BAMS, 2014)

$$T_f = T_f(S)$$

In situ salinity @ 20 m depth
(2013: ship CTD, buoys)
...mostly **summer**

annual mean
⟨Arctic Ocean⟩
under-ice
SST = -1.6°C

Stroh et al. (JGR, 2015)

Timmermans et al. (BAMS, 2014)

MIZ SST Summary

- summer MIZ SST is $> T_{f-}$
...but (some?) L4 data sets are **too warm**
↳ *more L4's, more in situ obs*

MIZ SST Summary

- summer MIZ SST is $> T_{f-}$
...but (some?) L4 data sets are **too warm**
↳ *more L4's, more in situ obs*
- Wind/SST matchups

MIZ SST Summary

- summer MIZ SST is $> T_{f-}$
...but (some?) L4 data sets are **too warm**
↳ *more L4's, more in situ obs*
- Wind/SST matchups
- Seasonal, geographic vars
*e.g., Arctic/Antarctic
winter/summer*

MIZ SST Summary

- summer MIZ SST is $> T_{f-}$
...but (some?) L4 data sets are **too warm**
↳ *more L4's, more in situ obs*

- Wind/SST matchups
- Seasonal, geographic vars
e.g., winter/summer
Arctic/Antarctic
- "coupled variables"
e.g., MIZ SSS, surface stress

MIZ SST Summary

- summer MIZ SST is $> T_{f-}$
...but (some?) L4 data sets are **too warm**

└──→ *more L4's, more in situ obs*

- Wind/SST matchups
- Seasonal, geographic vars
e.g., winter/summer
Arctic/Antarctic
- "coupled variables"
e.g., MIZ SSS, surface stress

Thank
you
