European Network of Open Education Librarians (**ENOEL**)

SPARC Europe

European Network of Open Education Librarians

The ENOEL was founded in **2018**

81 members
22 countries

In ENOEL we work **together**.
In ENOEL we **share**.
In ENOEL we **collaborate**.
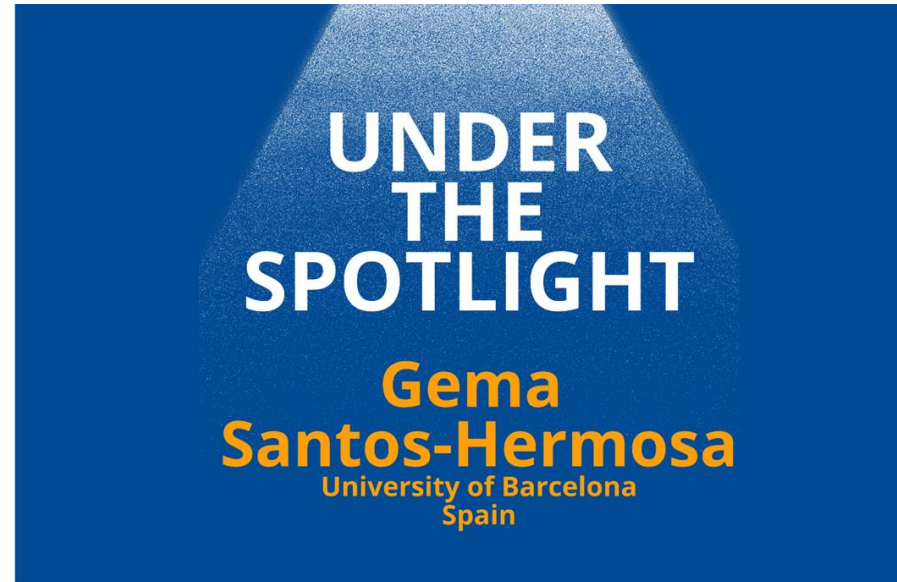

Under
the Spotlight

**"ENOEL practitioners under the spotlight"
webinar series**
ENOEL members guide us through their personal journeys
with OE. It is a a space for network members to ask questions,
to get to know each other better and learn from one another.

"OE Drops" short videos series... or taking a break
Very short videos explaining the basics of Open Education, to accompany newcomers while drinking a coffee, commuting, walking or taking a pause.

OE Drops

Work in progress. OE Drops will be collected in a playlist on ENOEL's Youtube channel

OE Champions

"OE Champions" series of interviews
Key OE advocates and actors discuss the importance of Open Education and share their experiences with facilitating the creation of Open Educational Resources.

18 August 2021

Open Education Champions

with
Gulia Boggiali, Politecnico di Milano
Student
Italy

Work in progress. OE Champions videos will be collected in a playlist on ENOEL's Youtube channel and added to the European Open Education Champions site https://openscholarchampions.eu/

OE Benefits

Open Education Benefits
ENOEL members are creating tools (Twitter cards, slides, leaflets) and resources to be reused, adopted, adapted by the large audience (not only librarians) to advocate for open and to disseminate the UNESCO OER Recommendation.

Work in progress. OE benefits tools will be shared with the community as easily adaptable files.

OE learning path for EU librarians

Open Education Learning path for EU librarians
Why "EU"? Because we need to adapt some resources to our scenarios and take into account the language related issues properly.

Expected output: a curated list of resources plus - in time - an adaptation of those that need to be referred to specific EU needs and requirements.

Work in progress. OE learning path resources will be shared with the community as easily adaptable files.

Open Education Librarianship: a learning path
Resources for librarians who support Open Education

OER BASIC

As a librarian considering Open Education, you need information about Open Education Practices (OEP) and Open Pedagogy, and you can use Open Educational Resources to provide and create freely accessible learning materials. What are the characteristics of OER? Download the 5Rs infographic. What are the differences between Open Educational Resources and Open Access resources?
This learning path will guide you through various aspects of finding and developing OER.

Finding & Evaluating OER #1

Librarians can play a key role in identifying and curating high quality OER collections for specific disciplines. Below is a set of resources to help you find relevant OER and evaluate their quality.

- **Curated collection:** Rhode Island College Open Educational Resources Library Guide
- **Exercise:** National Forum for the Enhancement of Teaching and Learning. Finding and Evaluating OER
- **Tool:** Evaluating OER: Quality criteria and rubrics

Licensing & copyright #2

An open license is essential for an educational resource to be 'open'. An open license on an educational resource tells other educators that the 5 R's of open education are enabled: that the resource can be reused, retained, revised, remixed and redistributed (David Wiley's definition). These can be used in conjunction with principles of fair use or fair dealing according to international and national copyright standards and legal frameworks.

Curated collection: CUNY: The OER Starter Kit Workbook Copyright and Open Licensing chapter Possible alternatives: LibreS Creative Commons overview; or OpenTextBC Self-Publishing Guide Chapter 4 Copyright and Open Licenses
Exercise: Algonquin College License Matching Activity
Tool: National Forum for the Enhancement of Teaching and Learning Open Licensing Toolkit

Developing and sharing resources #3

OE Resources from/for the network

Open Education Resources from/for the Network
A Wakelet page with categories to identify resources coming from the Network and resources useful for Network members, but also for anyone interested!

Work in progress. OE Resources from/for the Network will be added continuously in time

Challenges

Collaboration comes with challenges of its own
- Not all members are comfortable with **taking action at the same time**
- nor are they all always **ready to actively contribute**
- or confident in formulating their thoughts in **English as a second language**.

These challenges can only be overcome through a **welcoming** and **patient approach** and the attitude to **listen** and **include.**

The ENOEL demonstrates this. Together we:
- **share** ideas, problems, experiences and skills
- **negotiate** along the way on what to do and how
- **pool efforts** to solve common goals and challenges (busy but THERE!)

...and we enjoy our regular **monthly meetings**!

SPARC✳ Europe

European Network of Open Education Librarians

ENOEL is growing.
Let's build capacity! **Together.**

Help us grow!

European OE librarians, join us!
Help us represent ENTIRE Europe.
