SSES in the OSI-SAF system

OSI SAF team
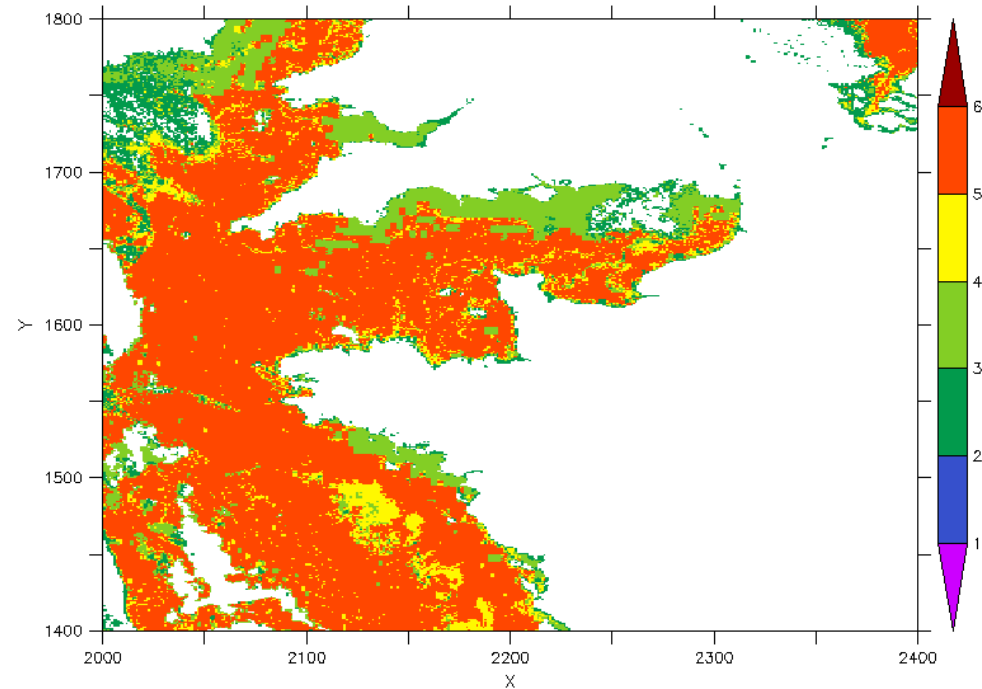

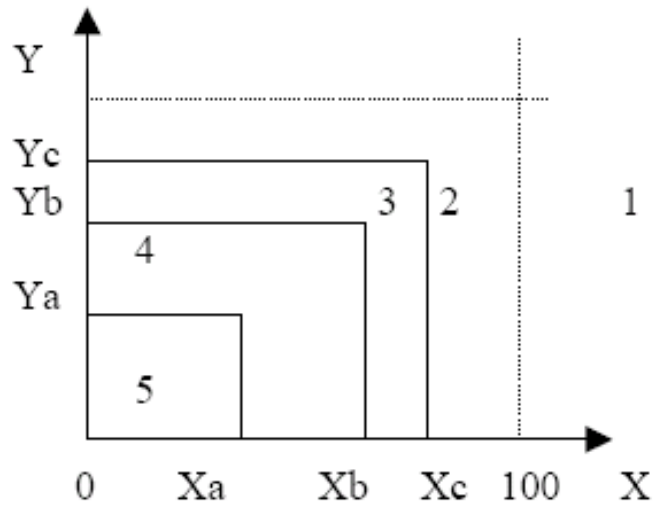

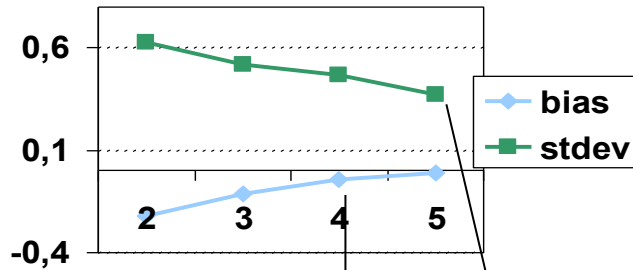

Centre de Météorologie Spatiale, Météo-France, Lannion, France

Schematic attribution of quality levels as a function of two risk factors

METOP-A MDB: global validation results per quality level, July 2007-July 2013

Conclusions

- SSES are determined by QL value at pixel
- Statistics are quite stable over time
- SSES are attributed after operational statistics are stabilized (some months after launch
