**It would have  
been for free.**

**If I preregister I  
can't change my  
research design and  
hypothesis later.**

**I think I found all relevant articles!**

Great! Now let's  
do the survey.

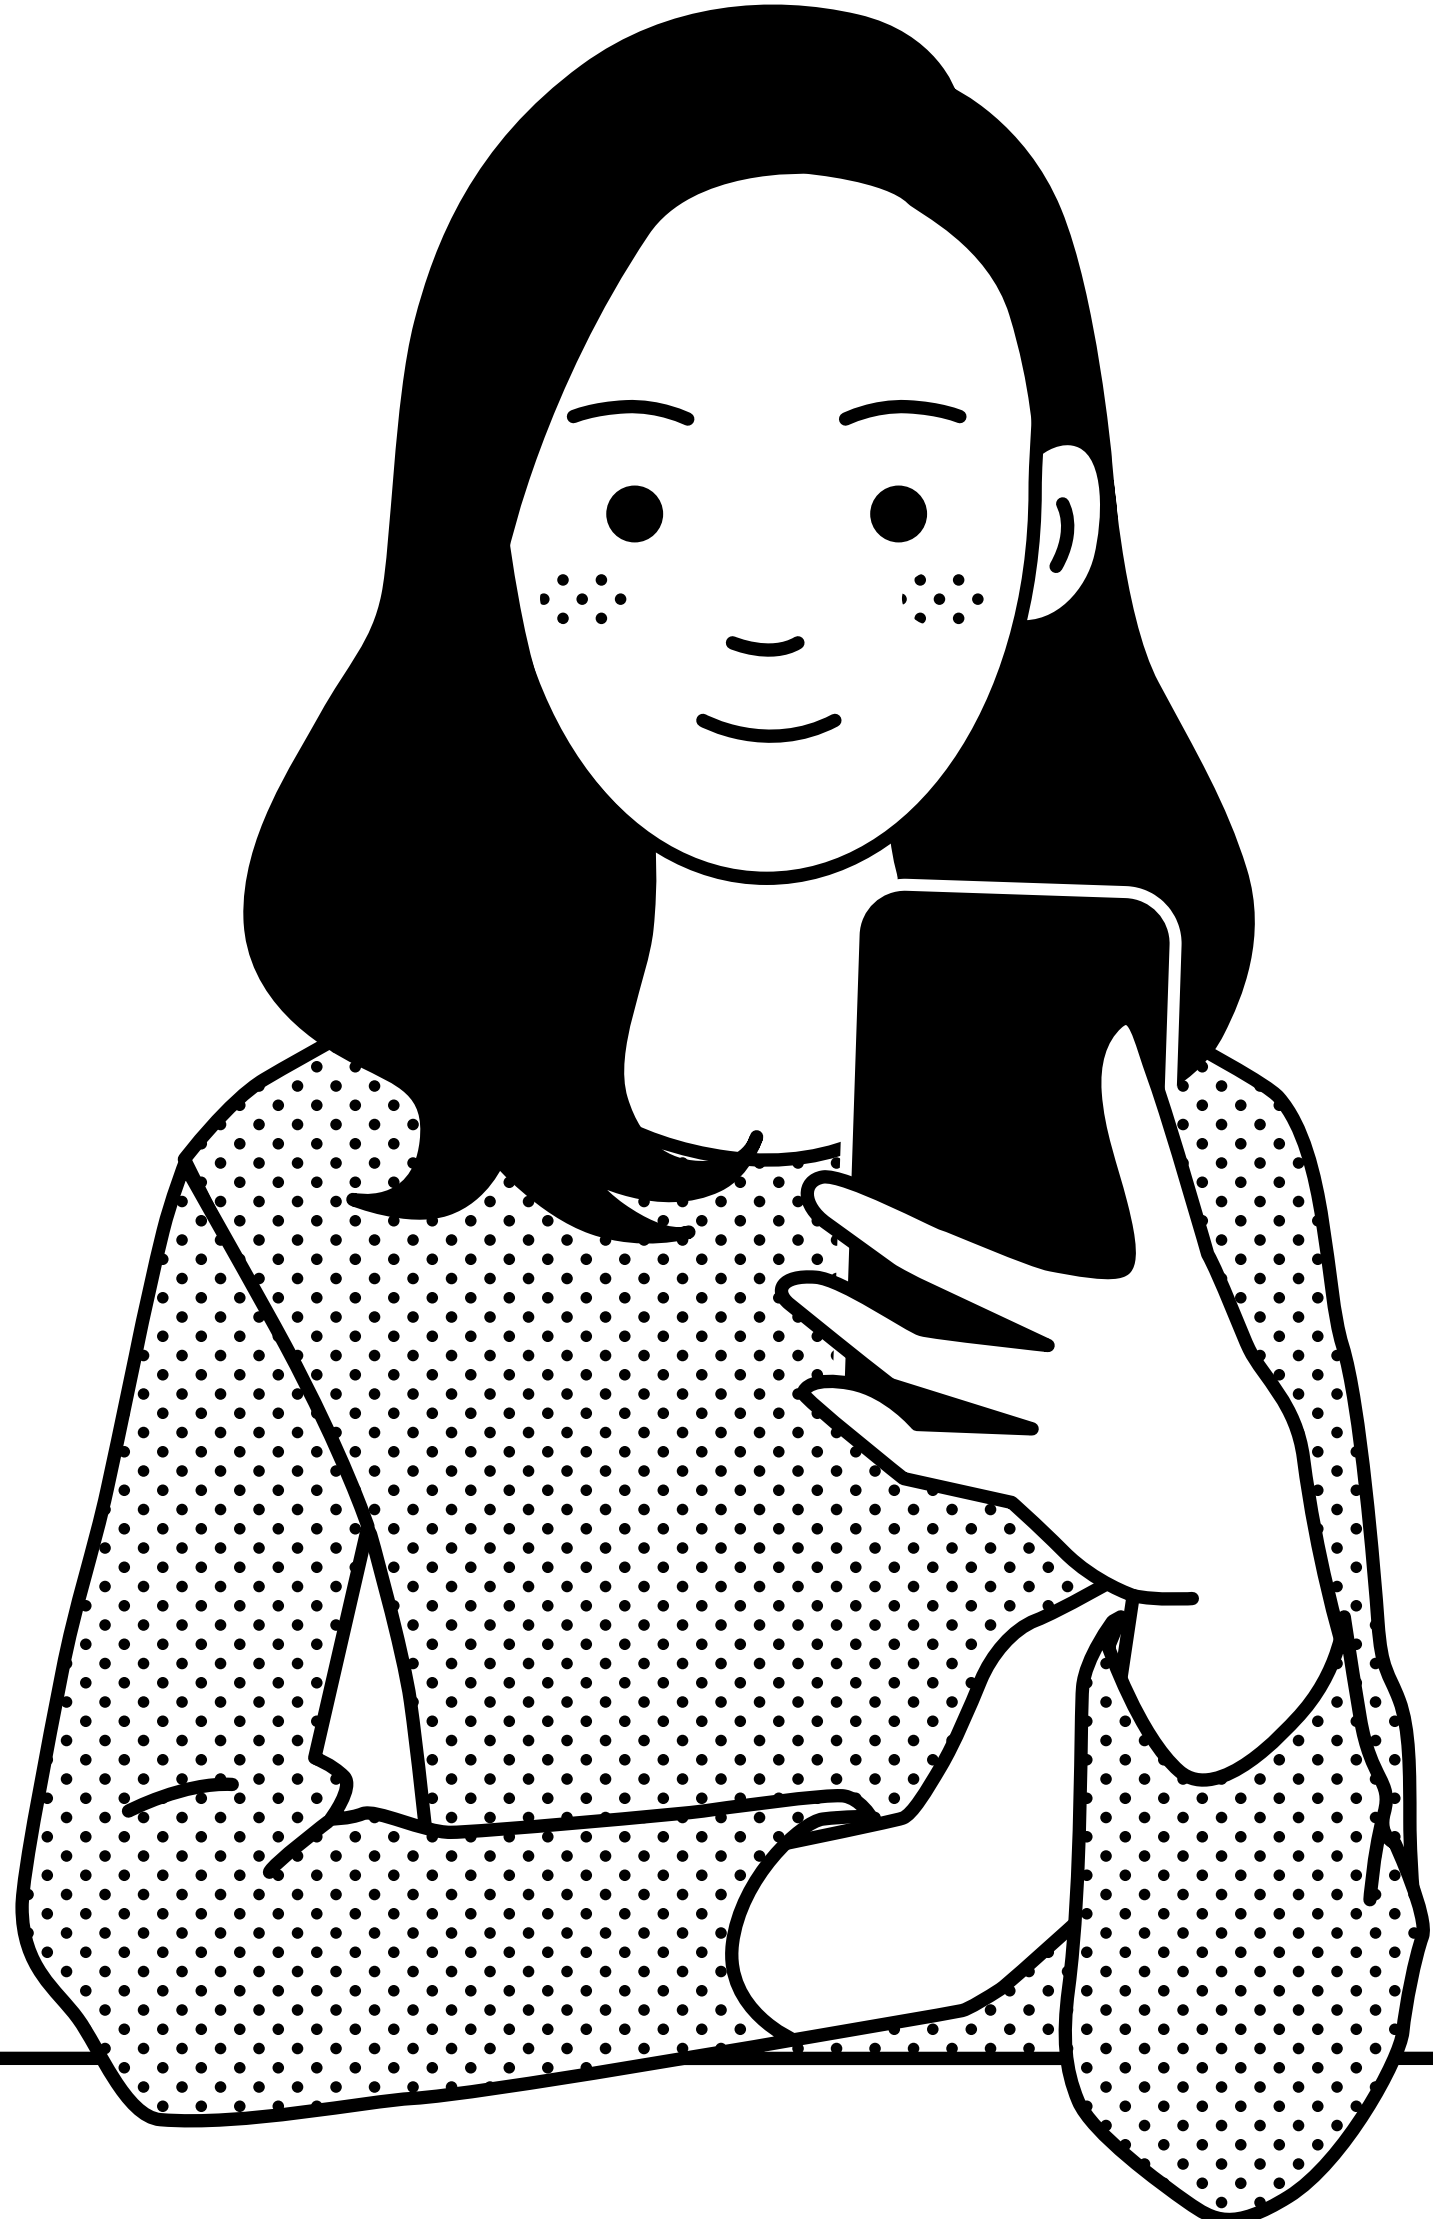

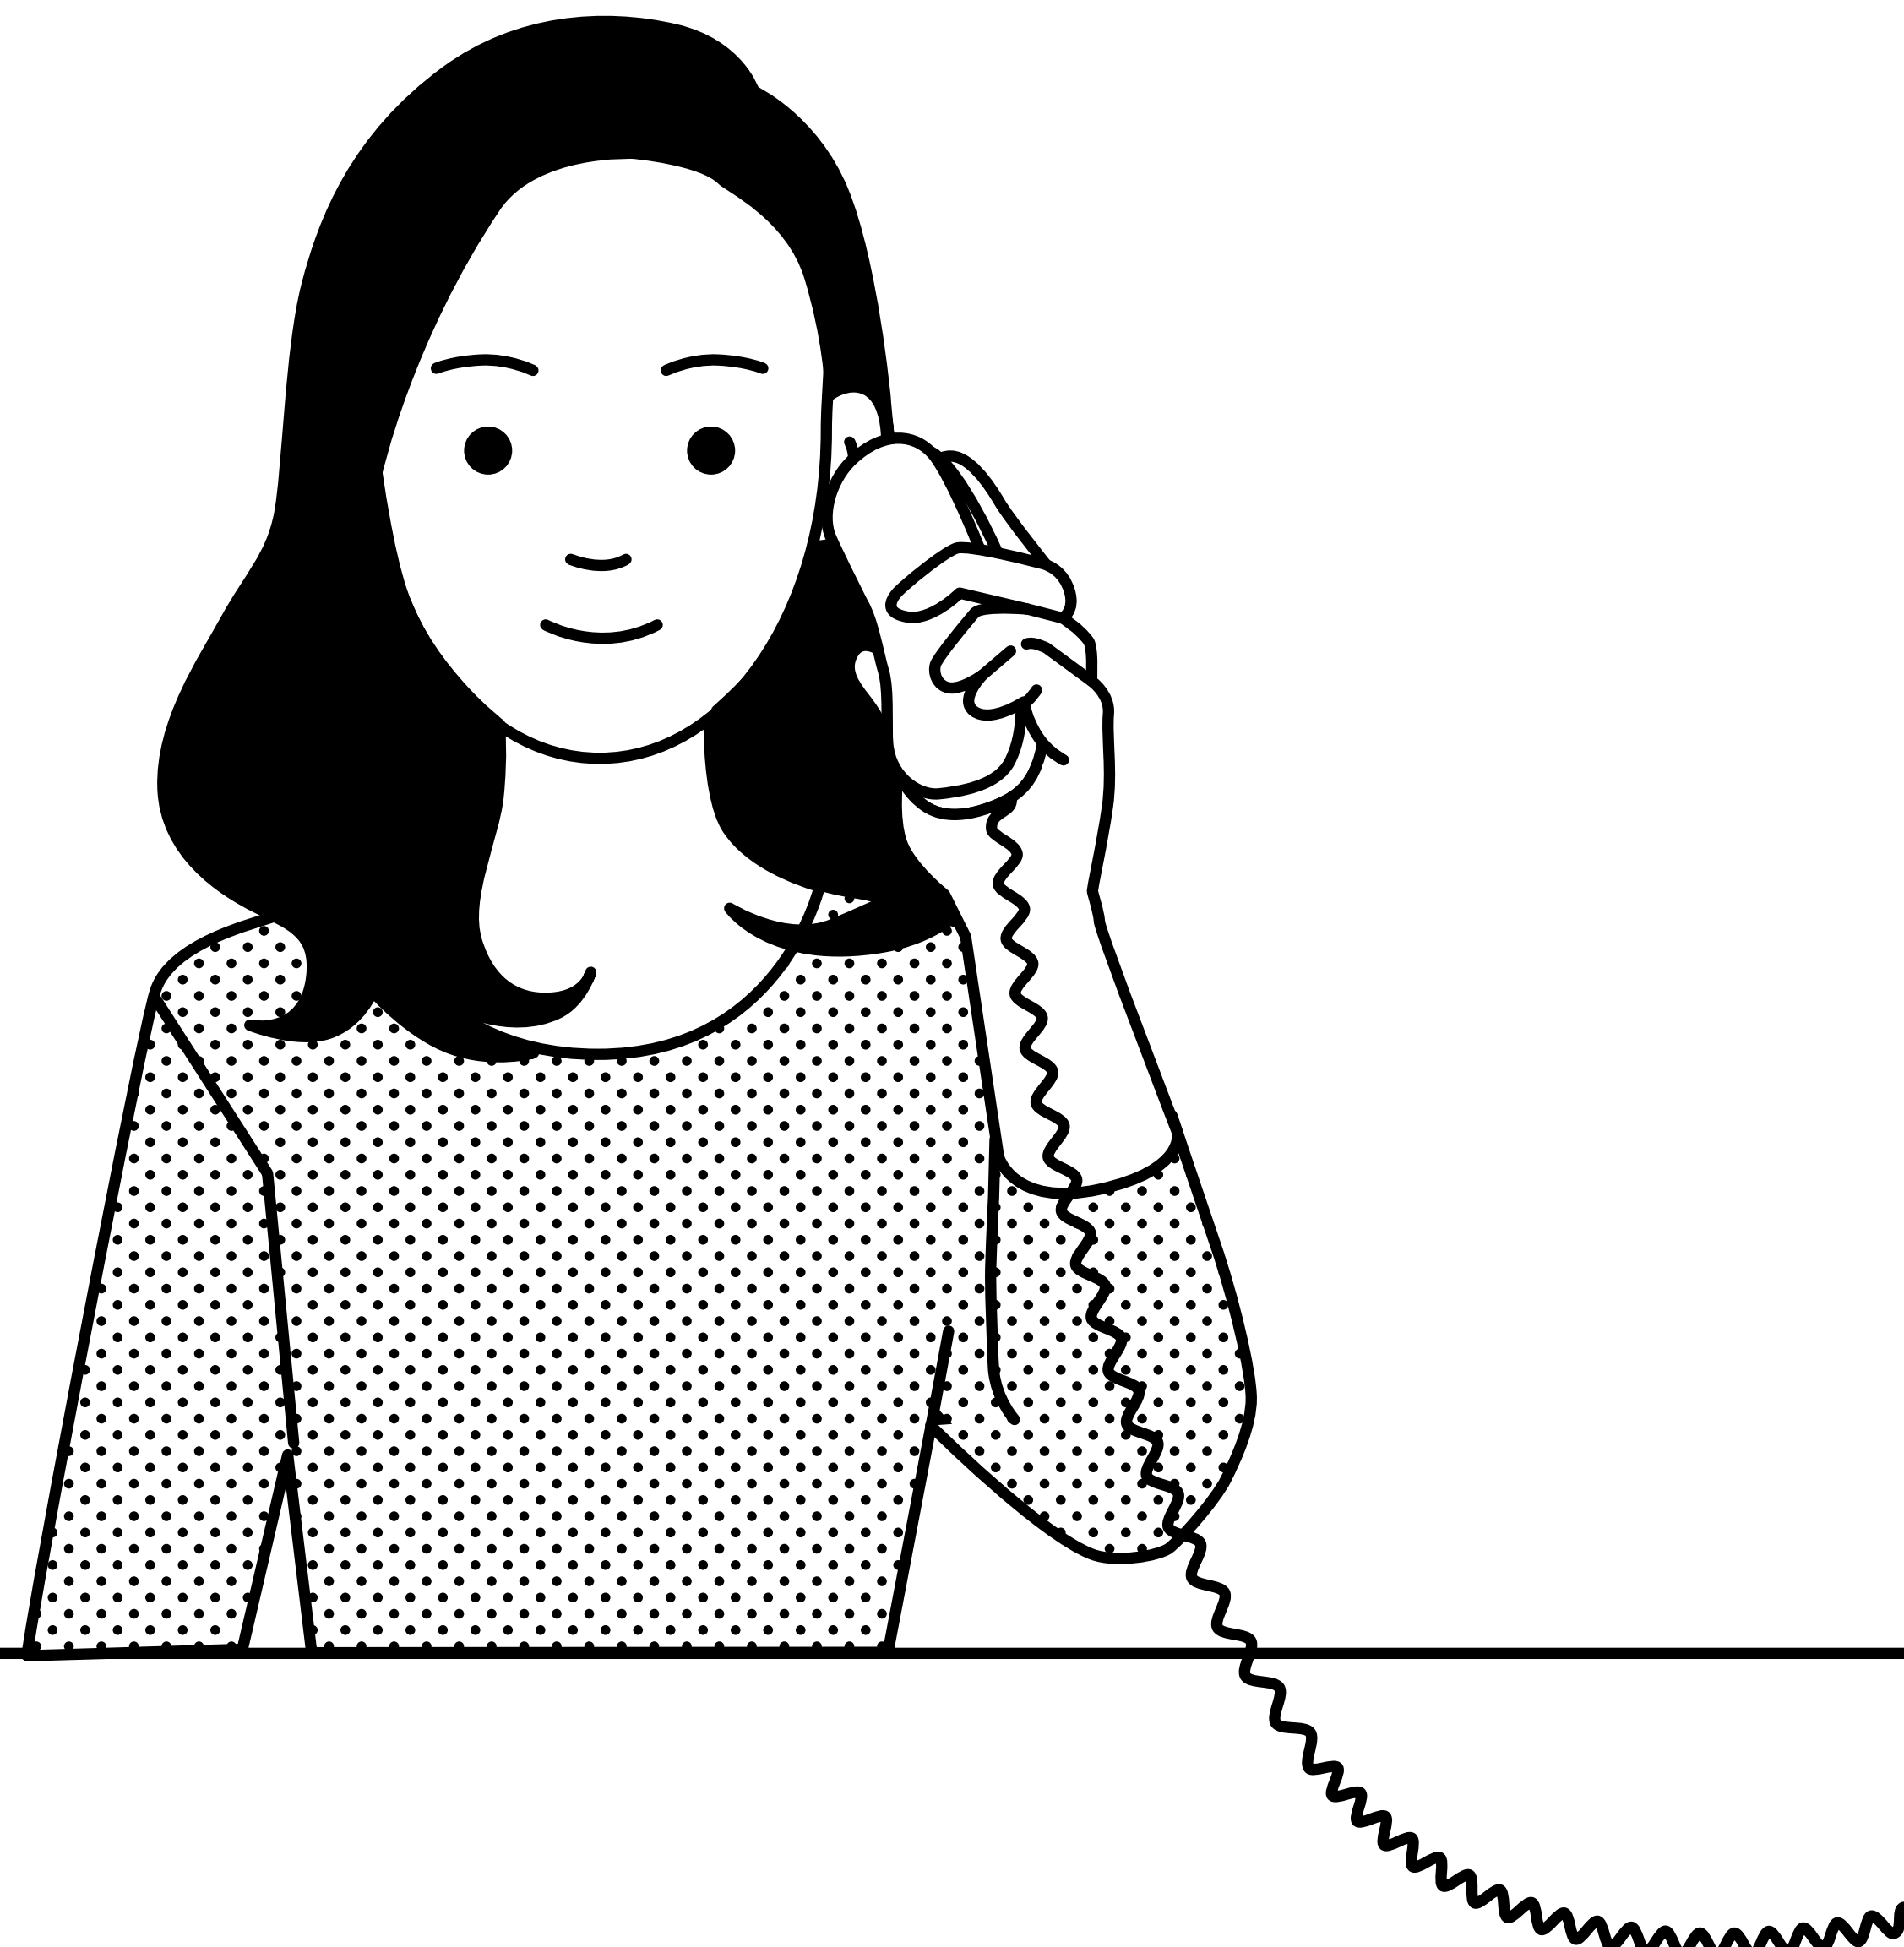

**It's not necessary  
at this point.**

**Hey! My science paper  
just got published!  
Check it out!**

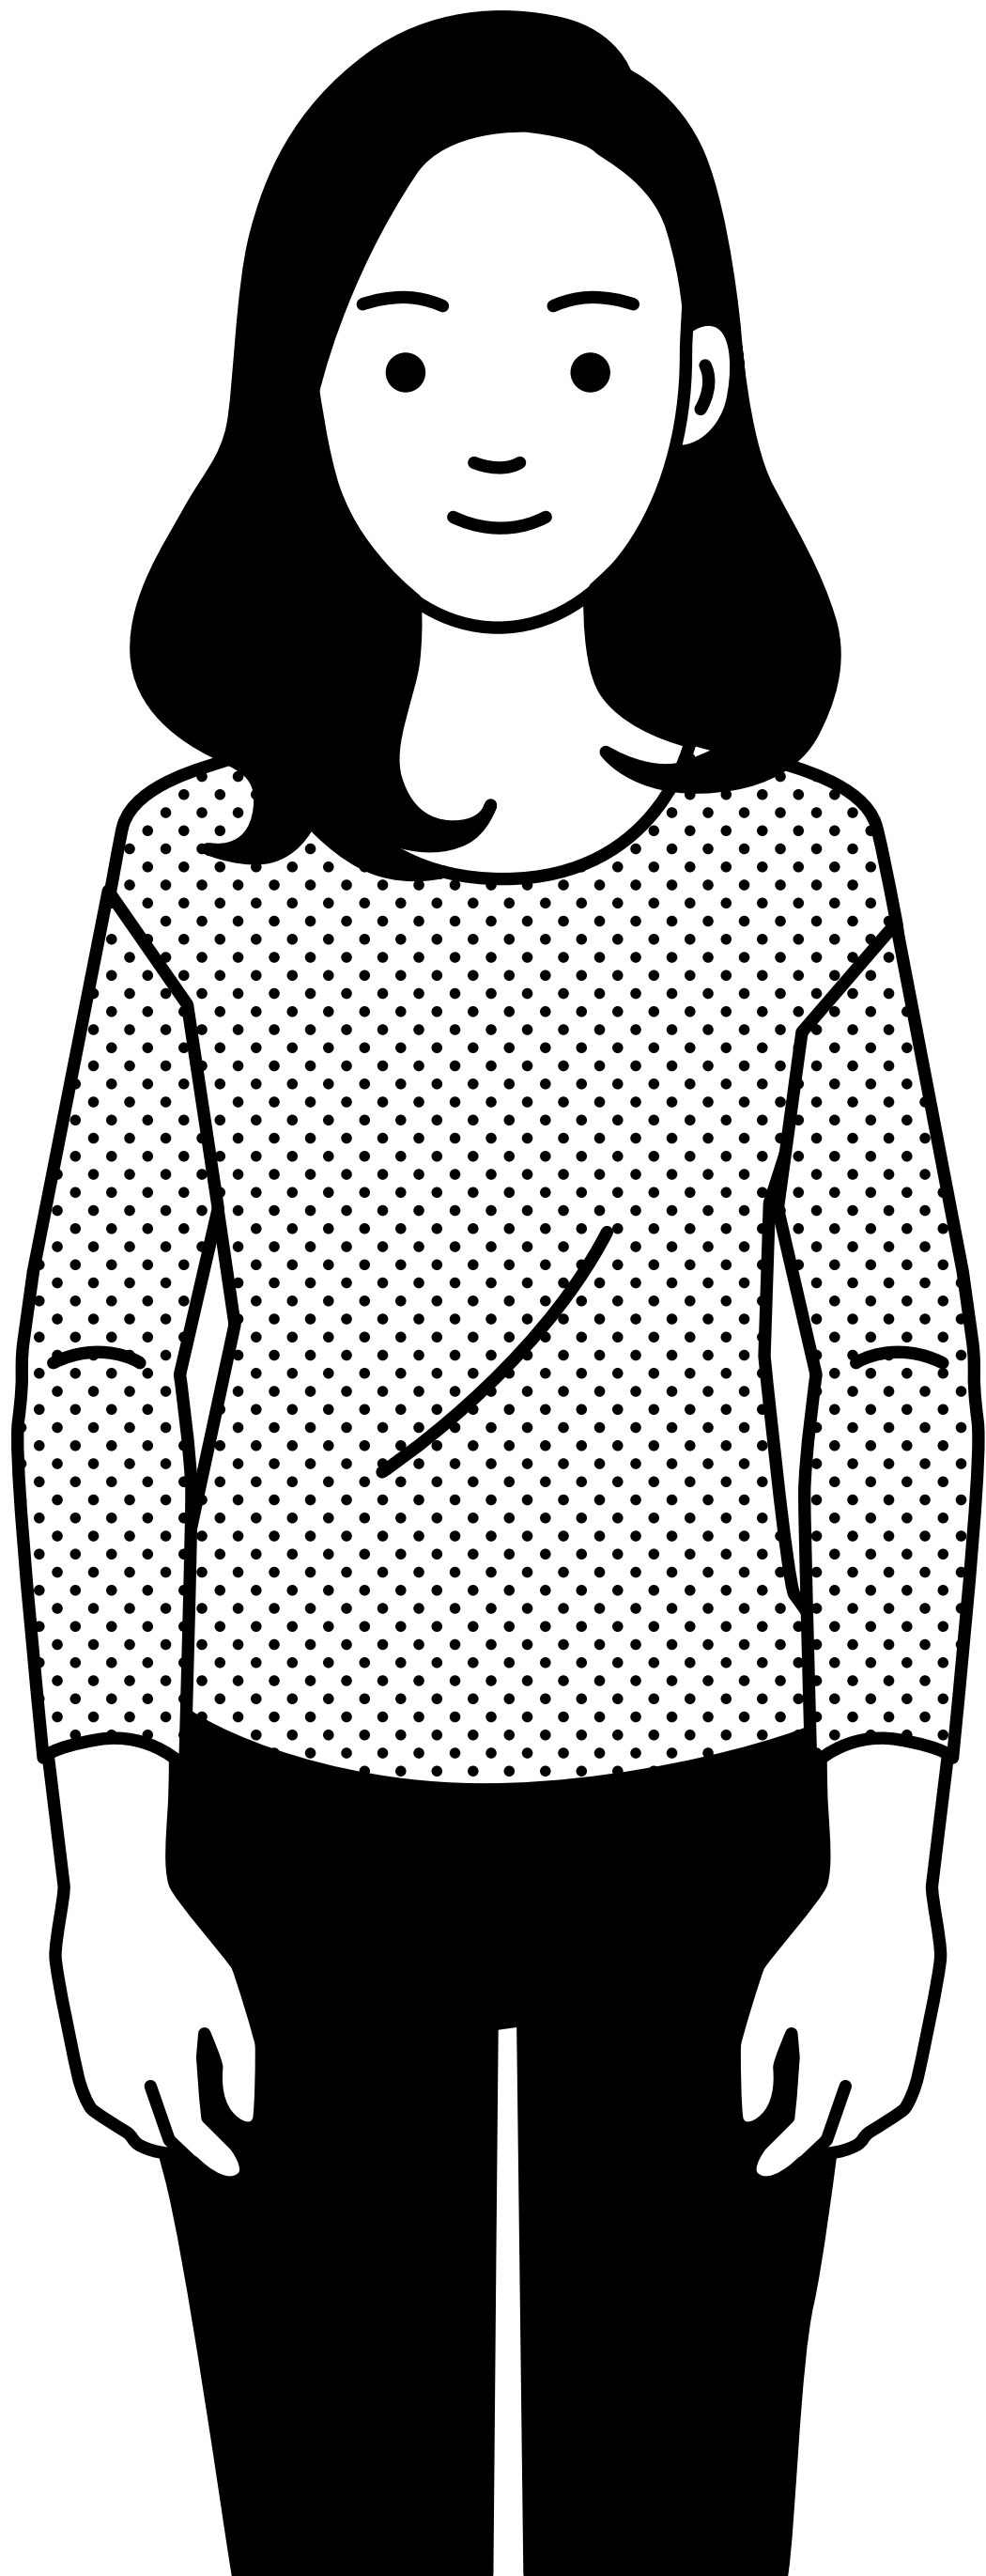

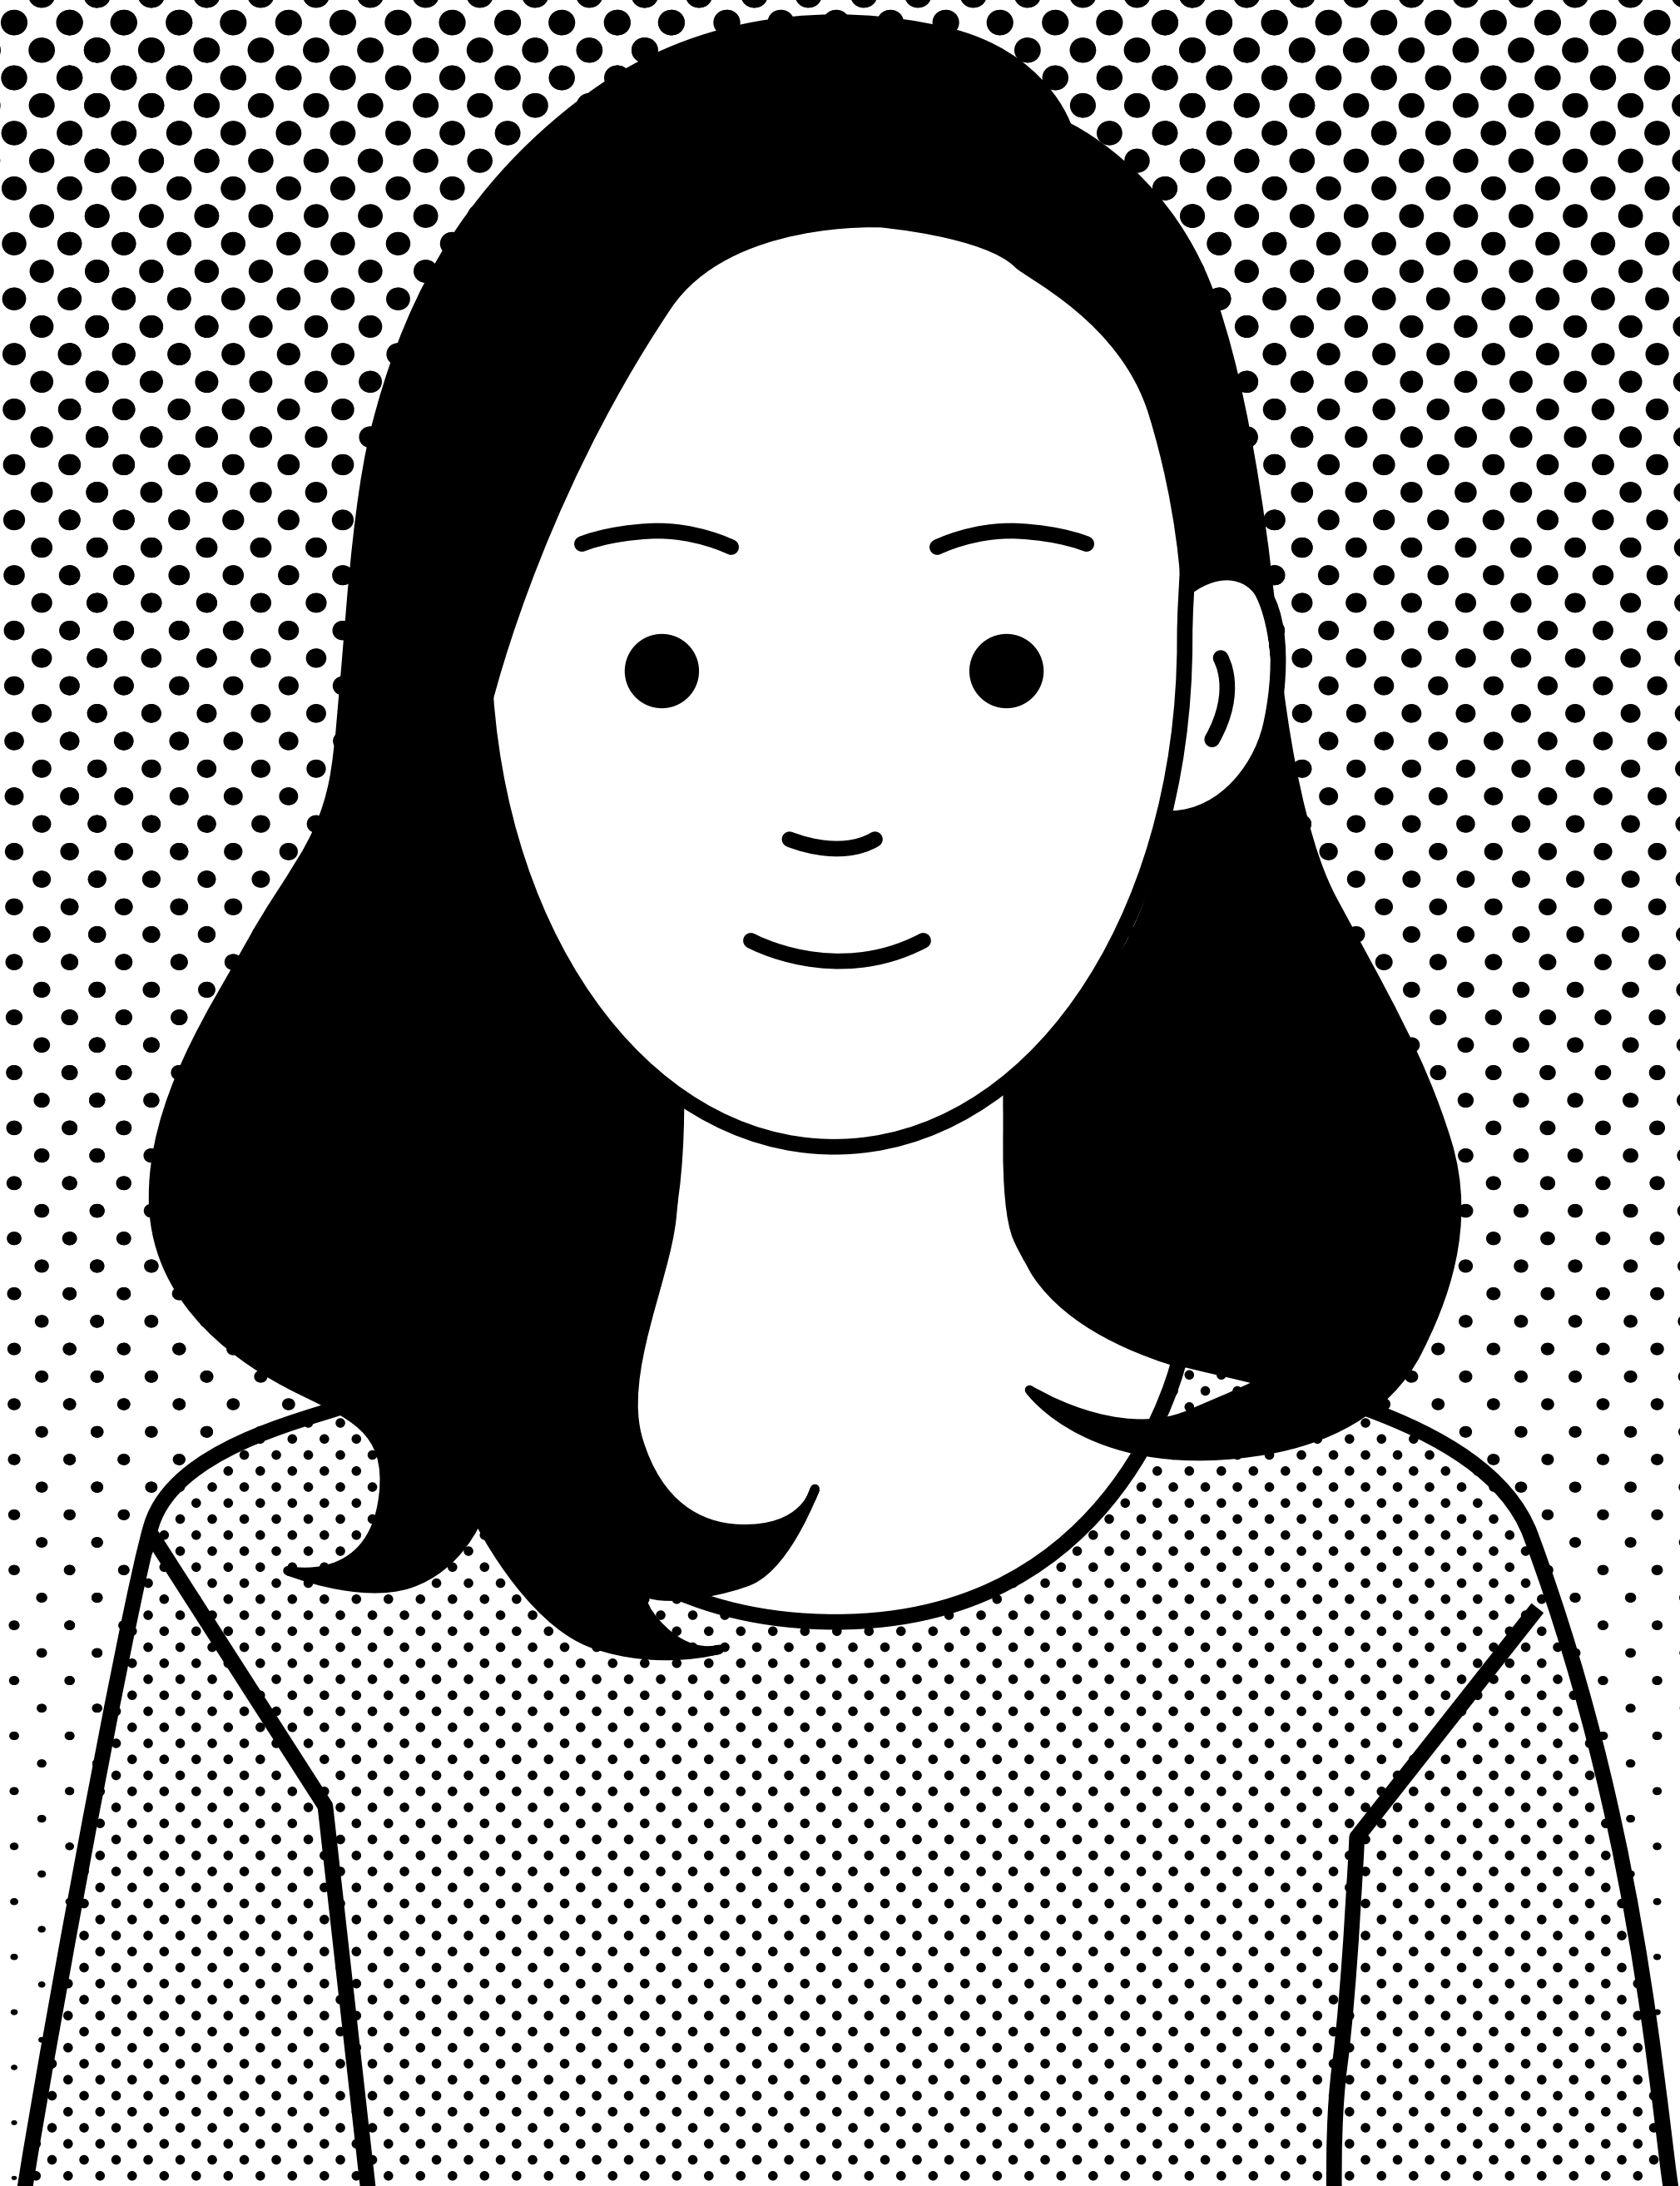

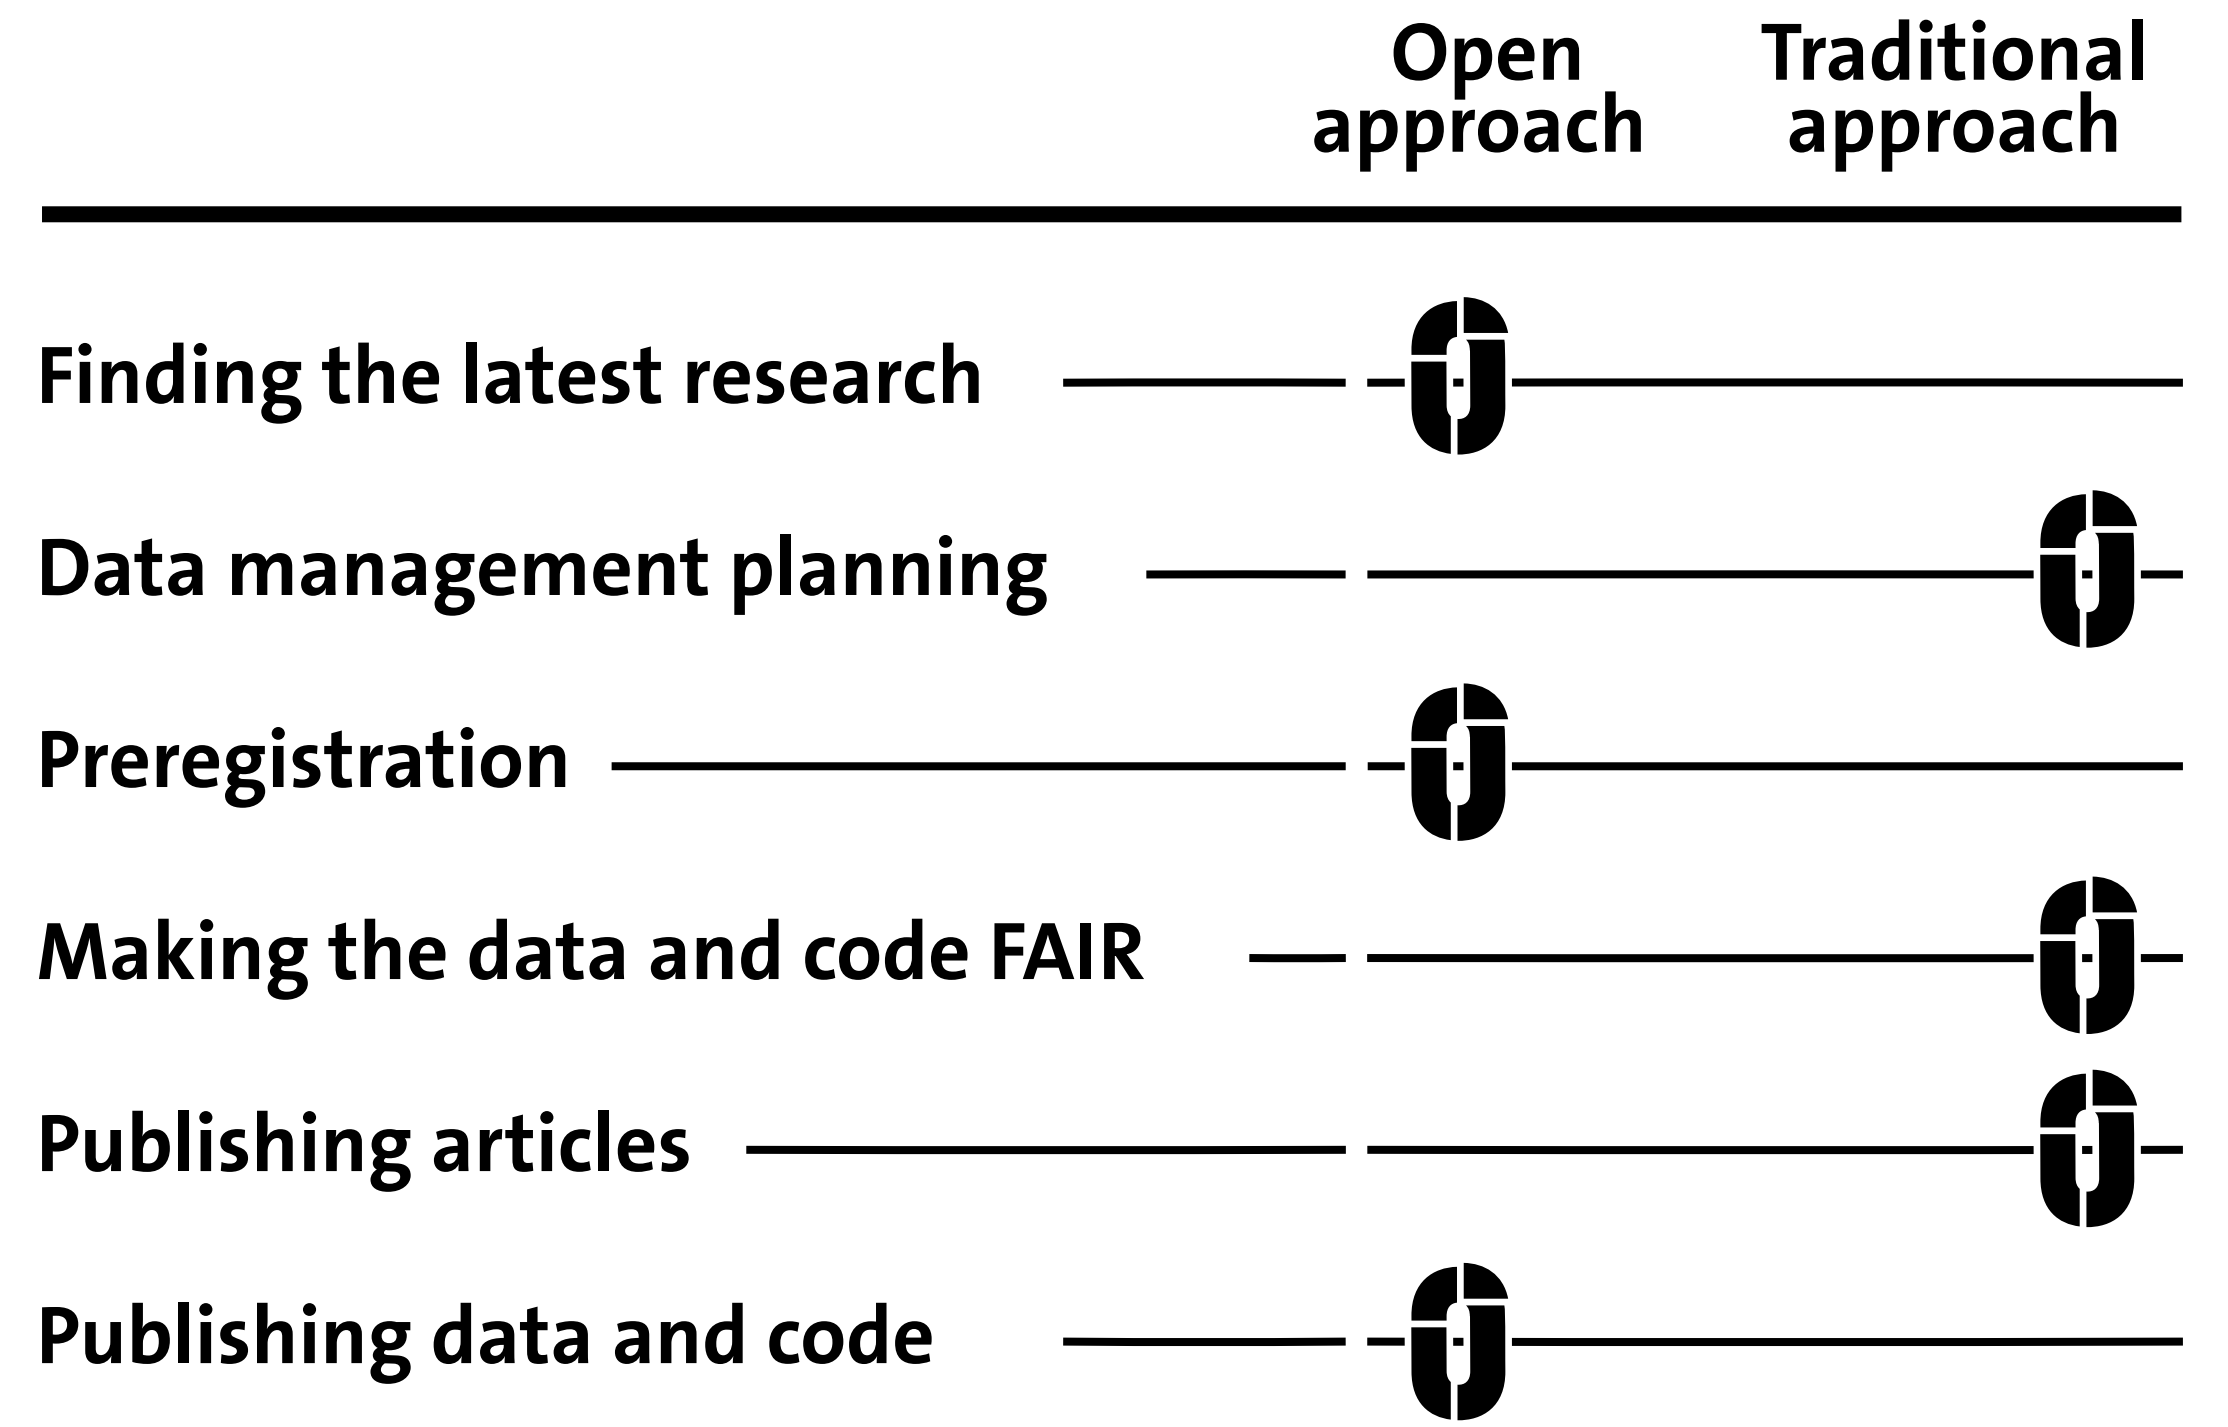

**How does science  
communication affect  
political behavior?**

# OPEN SCIENCE SCORE: 60%

**PLAY AGAIN**

**Publish the data  
and/or code**

**Do not publish the  
data or the code**

**i**

Open data and/or code refers to the unrestricted public availability of data/code on the internet. Restrictions might apply in the case of personal or sensitive data. In some cases, only the metadata and not the data itself can be made available.
