# COVID X

DATA vs COVID-19

THE GAME CHANGERS

**OPEN CALL 2**

Results in a Nutshell

COVID-X Program targets European Start-Ups and SMEs [at TRL7] developing data and AI solutions tackling coronavirus. The call was closed on the 16th of September 2021, and the selected teams joined COVID-X Acceleration Program in November 2021 for 10-months to boost their launch to the markets.

SELECTION PROCESS

Selected game changers	**13**
Evaluations	**37**
Applications	**79**

Addressed clinical challenges

- Remote care — 5
- Early detection — 2
- Personalized care — 2
- Recovery — 3
- Healthcare continuity — 1

The 13 COVID-X Game Changers develop technology solutions supporting healthcare services to take better and more efficient care of COVID-19 patients. Each solution focuses on a specific clinical challenge related to prognosis, diagnosis or follow-up.

13 game changer solutions

- **23%** Single solutions
- **77%** Team solutions

3
Single Solutions implemented by a European technology company and validated by a COVID-X Pilot Site.

10
Team Solutions carried out by a European technology provider and a healthcare organization in charge of the piloting.

Involved countries

The funded solutions involve technology & healthcare organizations from

8
European member states
as well as one healthcare provider from India (not eligible for obtaining the direct funding)

23
organizations
joining the COVID-X Program through the OC#2

Game changing technologies

The Game Changing solutions deploy all AI & Data technologies in their fight against COVID-19. Their innovation is complemented with technologies that endorse the power of data.

AI & Data	Internet of Medical Things	DeepLearning algorithms	Connected medtech	Remote monitoring	Mobile and wearable technologies	X-Ray images
