Agenda

1. ROR Identifier
2. Open Journal Systems
3. TIB Open Publishing
4. OJS-ROR integration

1. ROR Identifier

- Register for research organizations
- Permanent, unique identifiers
- Institutional discoverability
- Multilingual institutional names
- Scientific affiliation
- Controlled vocabulary
- Open API
- Synchronization with PID providers, e.g. Crossref

2. Open Journal Systems (OJS)

- The world's most widely used free, open source journal-management platform
- Functionality extensions through plugin infrastructure
- Numerous identifier plugins (Crossref, DataCite, ORCID)
- Standard application programming interfaces (OAI-PMH, REST)

3. TIB Open Publishing

- Open-access platform for publishing scientific journals and conference publications of Technische Informationsbibliothek (TIB)
- Library-supported, non-commercial publishing service
- Open to all disciplines, institutions, etc.
- Long-term sustainer of ROR plugin

4. OJS-ROR integration

- Enables automatic suggestion of organization names
- Pre-populates affiliations in a multilingual context
- Allows optional changes while maintaining integrity
- Licensed under a GNU Public License
- Demo
- https://github.com/withanage/ror/
