# **NFDI4Biodiversity – Biodiversity, Ecology and Environmental Data**

HeFDI, 11.02.2022

11.02.2022

# Research data

Research data is data created in the course of scientific activity, e. g. through observations, experiments, simulations, surveys, interviews, the study of sources, records, digitisation, or evaluations.

In actual research, one differentiates, although not always clearly, between **primary research data** and **secondary research data**, which documents and **contextualises** the process of creating primary data.

Rat für Informationsinfrastrukturen, 2016

# Origin of data

## publicly funded for example ...

... at over 400 universities and technical colleges

... at the non-university research institutions and the scientific academies

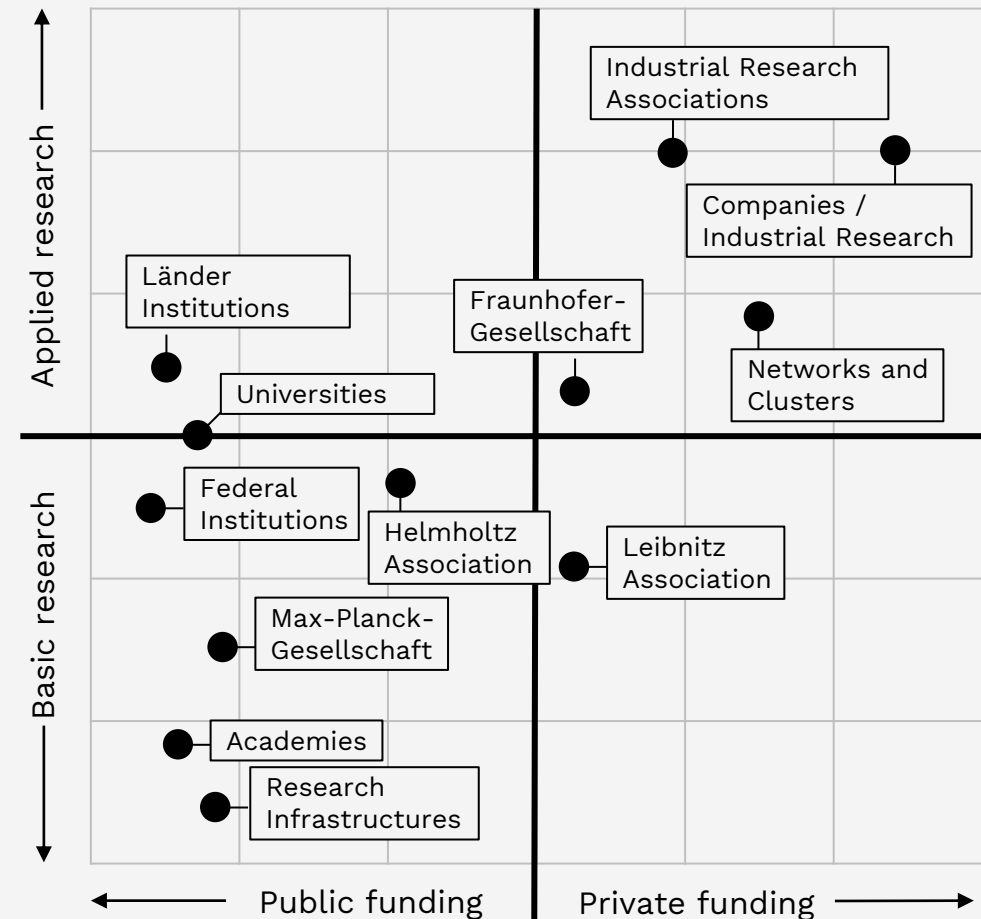

... in large, jointly funded research infrastructures

Area of activity of the Joint Science Conference  
of the federal government and federal states  
(Article 91b of the Basic Law)

## German R&D under the microscope

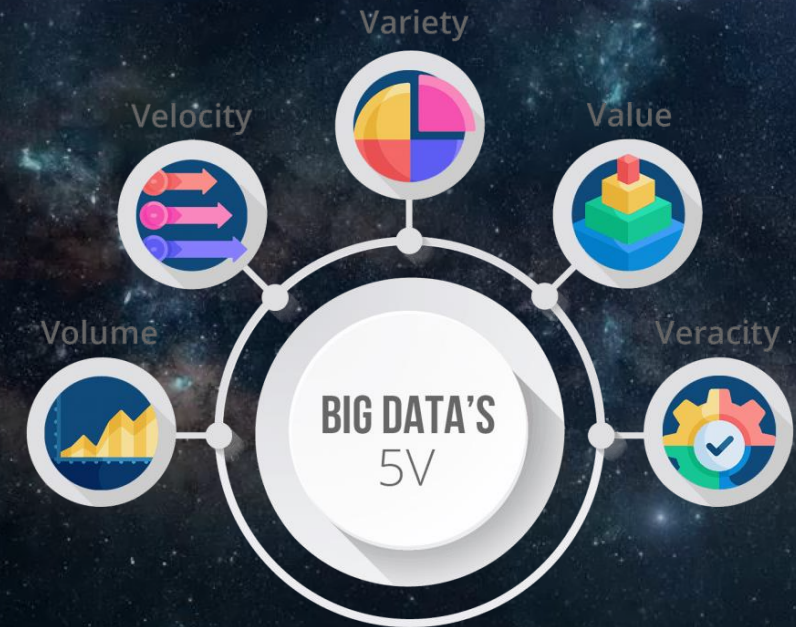

A self-ranked assessment of how public and private research organizations in Germany are funded and their research priorities.

# Acknowledging the need for coordinated action

The rising tide of data – nearly as many digital bits as there are stars in the universe.

Source: IDC's Digital Universe Study 2014  
<https://www.emc.com/leadership/digital-universe/2014iview/executive-summary.html>

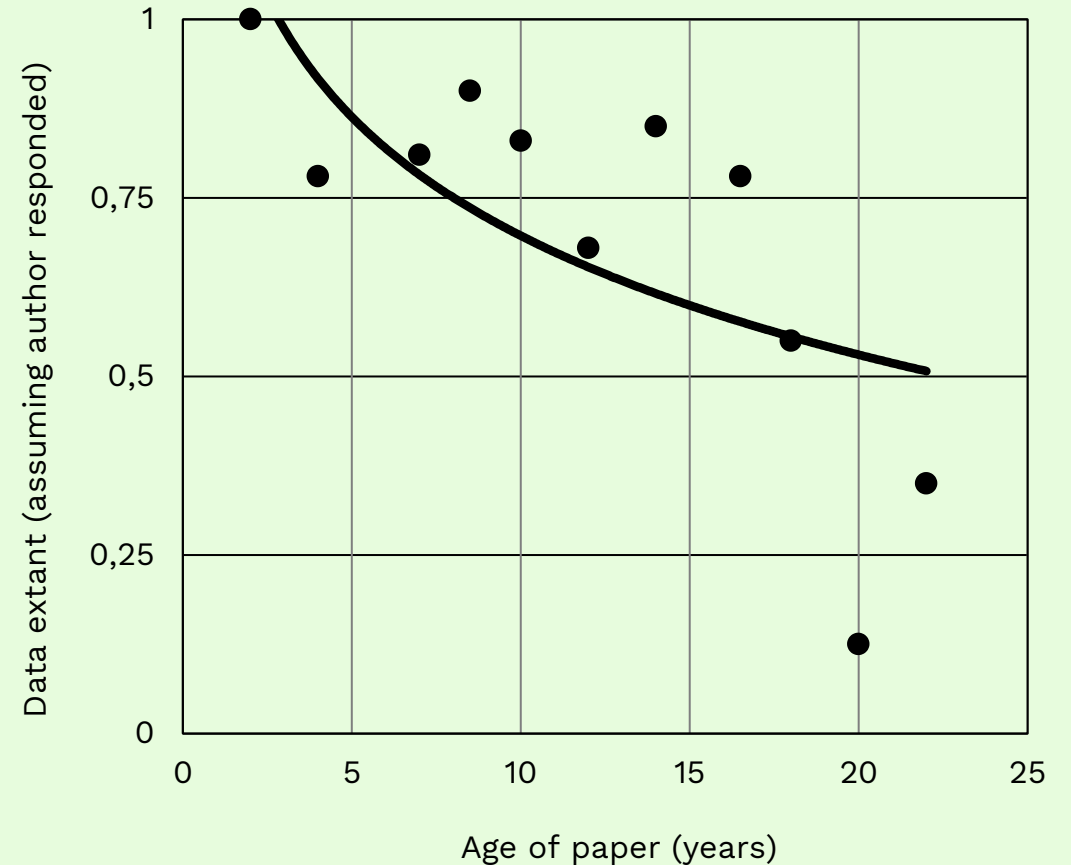

# Availability of research data with time

- Data being lost are estimated to increase by **17% in every** year after publication.
- Find a working e-mail address for the first, last, or corresponding author fell by **7% per year**.
- Overall, we only received **19.5%** of the requested data sets, and only 11% for articles published before 2000.

## Missing data

As research articles age, the odds of their raw data being extant drop dramatically.

# Forschungsdaten – for all and forever?

Das ungenutzte Potential, das in zahlreichen Forschungsdaten liegt, wollen wir effektiver für innovative Ideen nutzen. Den **Zugang zu Forschungsdaten** für öffentliche und private Forschung wollen wir mit einem Forschungsdatengesetz **umfassend verbessern** sowie vereinfachen und führen Forschungsklauseln ein. **Open Access** wollen wir als gemeinsamen **Standard etablieren**. Wir setzen uns für ein wissenschaftsfreundlicheres Urheberrecht ein. Die **Nationale Forschungsdateninfrastruktur** wollen wir **weiterentwickeln** und einen Europäischen Forschungsdatenraum vorantreiben. Datenteilung von vollständig anonymisierten und nicht personenbezogenen Daten für Forschung im öffentlichen Interesse wollen wir ermöglichen.

# The road towards NFDI

**2011-2015:**

## Structured exploration

Basic recommendations on how to adapt the organisation of scientific information infrastructures in the digital turn

**2016-2019**

## Realisation phase

Joint Science Minister Conference adapts RfII recommendation; DFG is tasked with the funding process

**KII  
2011**

**WR  
2012**

**RfII  
2014**

**GWK  
2016-2018**

**DFG  
2019**

**2020**

**2021**

**2022**

**2028 ff.**

## Operational phase of 10 years

3 rounds of funding decisions  
Founding of the NFDI e.V.

Parallel initiatives on the international level

# NFDI Facts and Figures

- Joint funding by Federal government and the *Länder*, initial period 2019-2028  
**90 Mio EUR** per year
- Funding of up to **30 domain-related** "consortia" (science-driven process)
- Association "**NFDI e.V**" founded October 2020 to organise the data landscape
- Over **200** scientific **institutions** joined the NFDI association and support its goals
- Over **1000** professional **staff** expected

**Lesehinweise:**  
Berechnungsbasis bilden Einrichtungen mit einer Beteiligung an einem oder mehreren der 19 Konsortien der Nationalen Forschungsdateninfrastruktur (NFDI) mit Stand Juli 2021.

# AMMOD use case

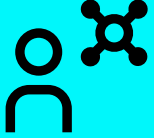

# NFDI4Biodiversity Community Services

Consortium for Biodiversity, Ecology and Environmental Data

# Services in NFDI4Biodiversity

With our experienced partners, we offer access to tried-and-tested tools for handling biodiversity and environmental data.

	Access to relevant data services from the domain
Front Office/Back Office Support for Research Data Management	
	Education and Training
Common Infrastructure (Research Data Commons)	

# Data types and archives

Typical types of data our partners can handle:

- Environmental data (e.g. temperature, rainfall, salinity)
- Trait data (e.g. seed number and mass)
- Molecular data (e.g. sequences)
- Experimental and laboratory measurements
- Multimedia (photographs, audio, video), f.e. of observed specimens
- Orthophotos produced using a drone
- Digital surface models produced using a drone and assigned software
- Model code
- Statistics

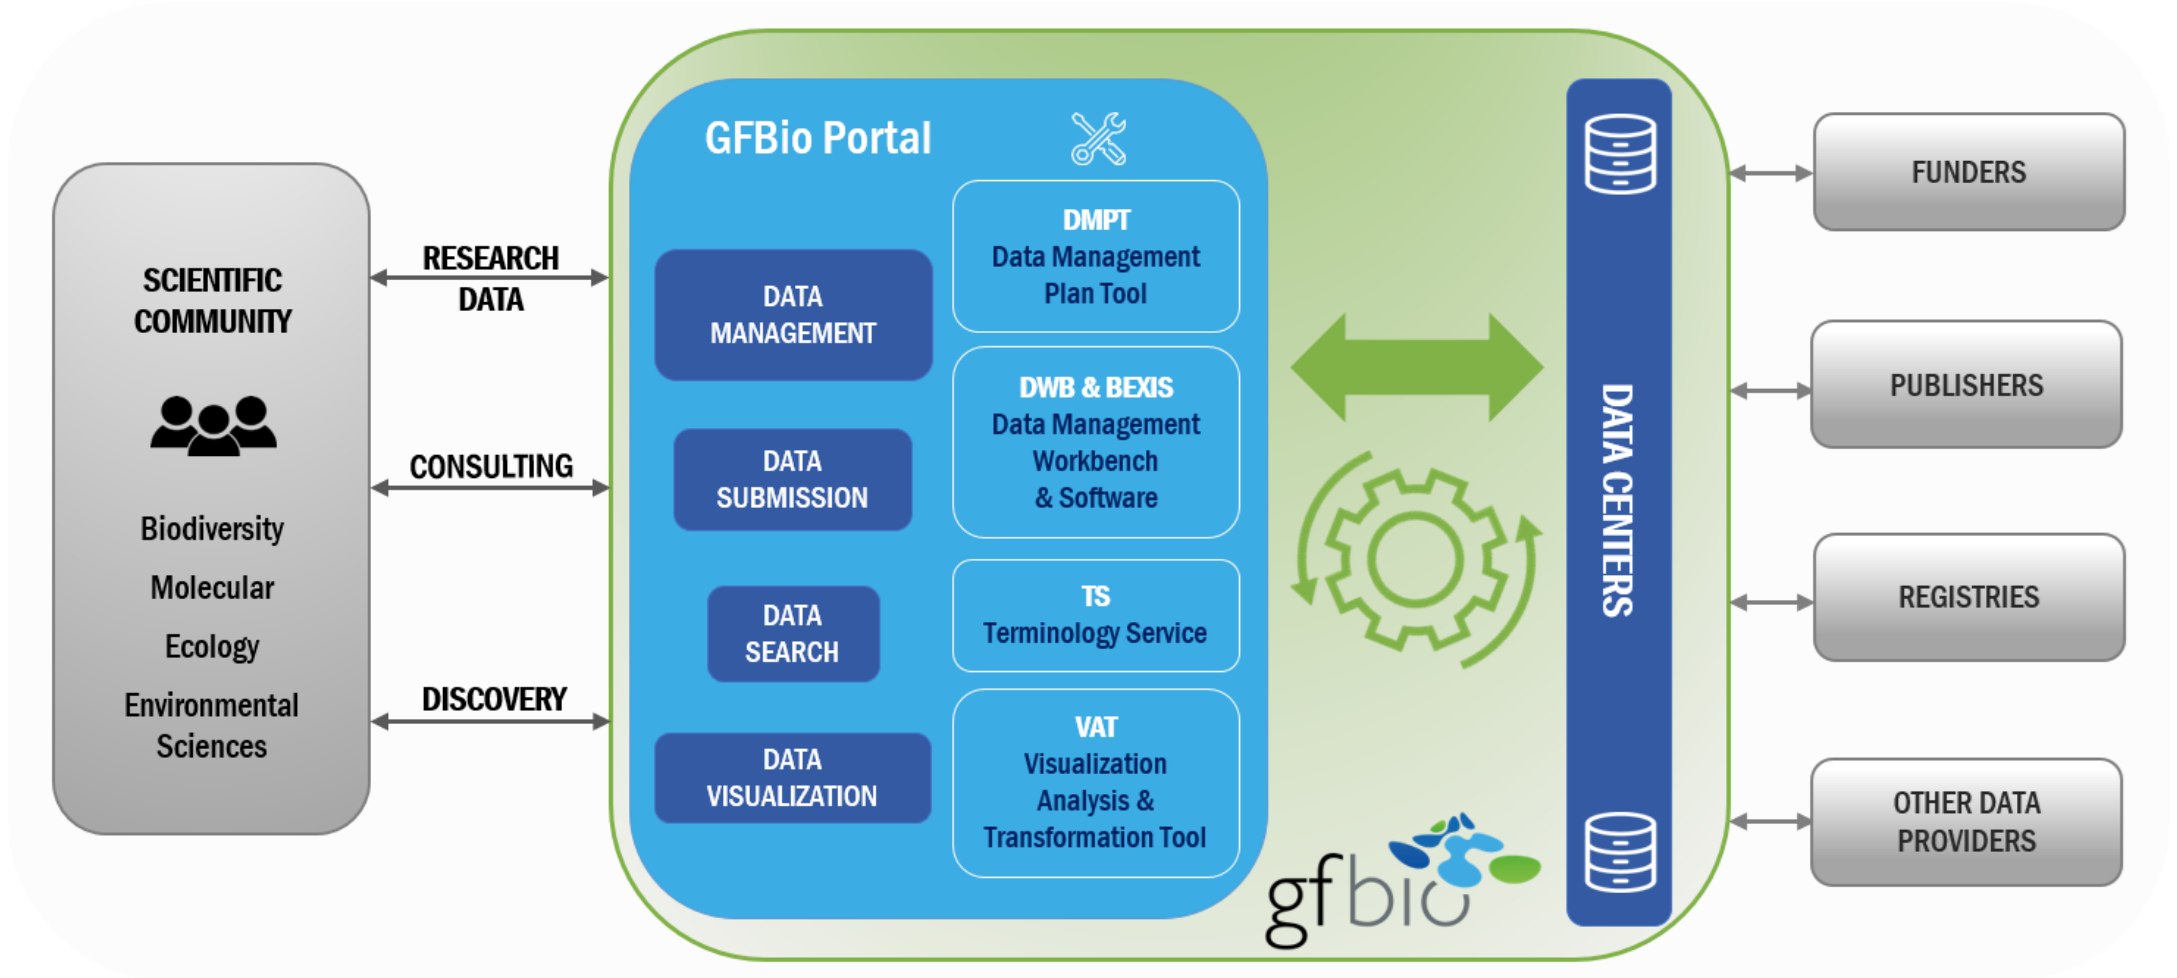

## Data Centers specialized on Nucleotide, Plant and Environmental Data

## Data Centers at Natural Science Collections

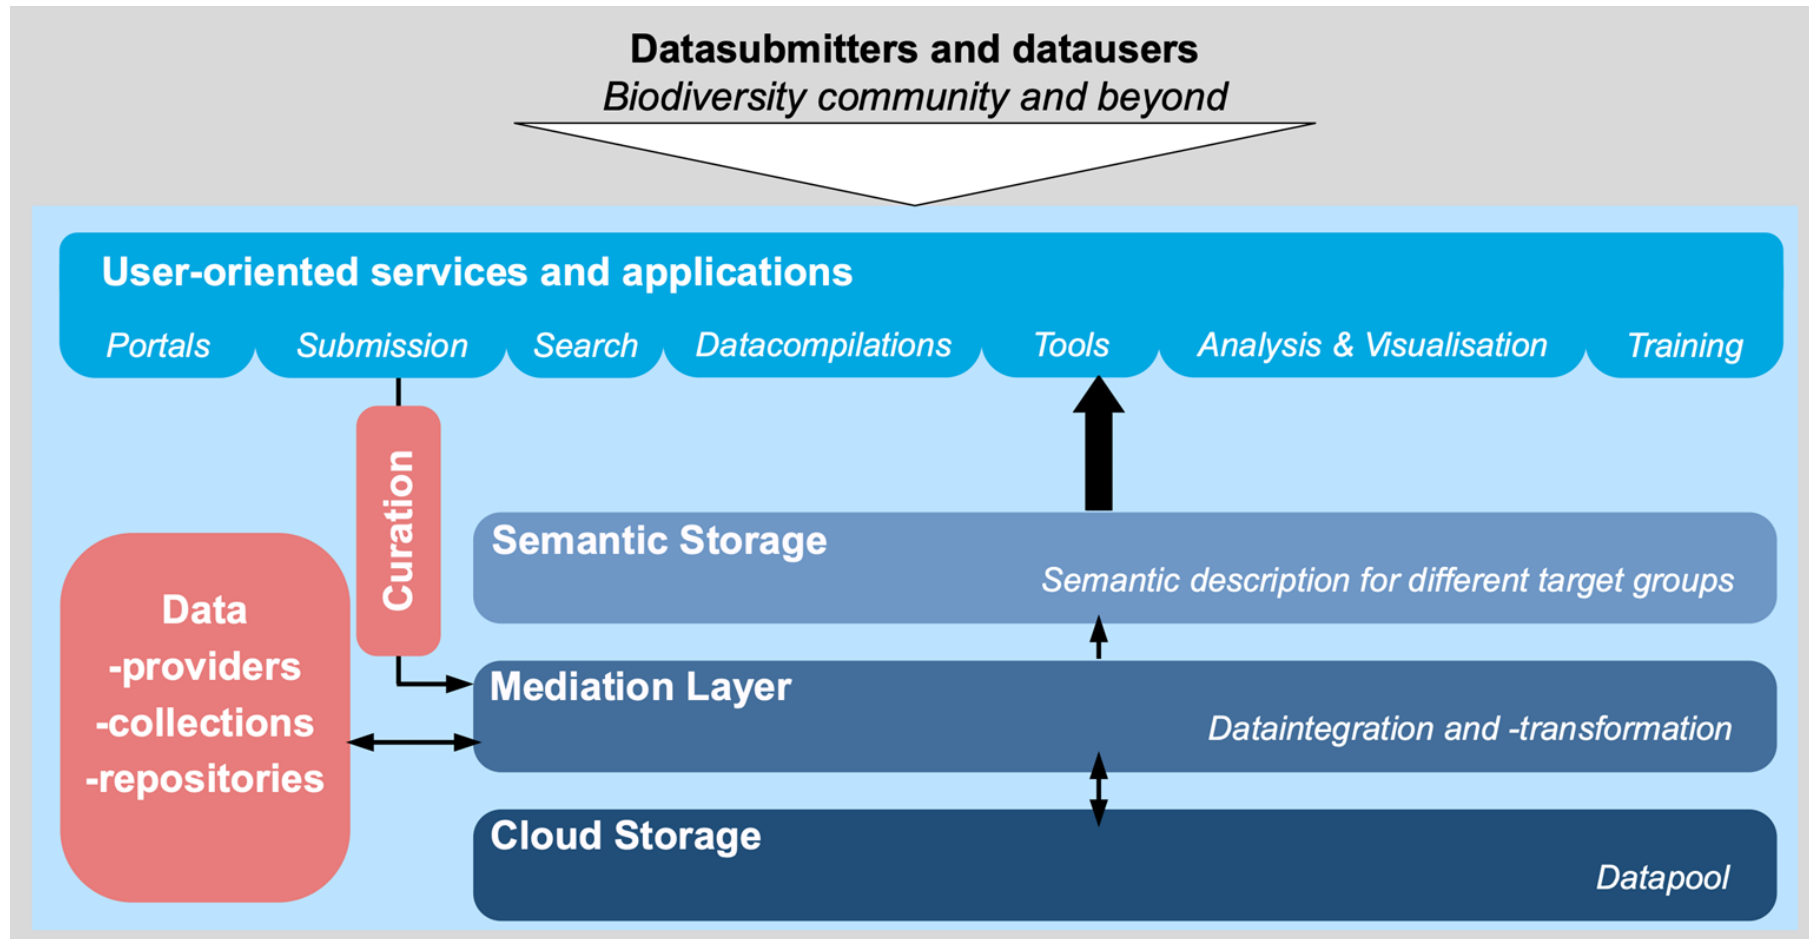

# Goal: Joint delivery of services along the data life cycle

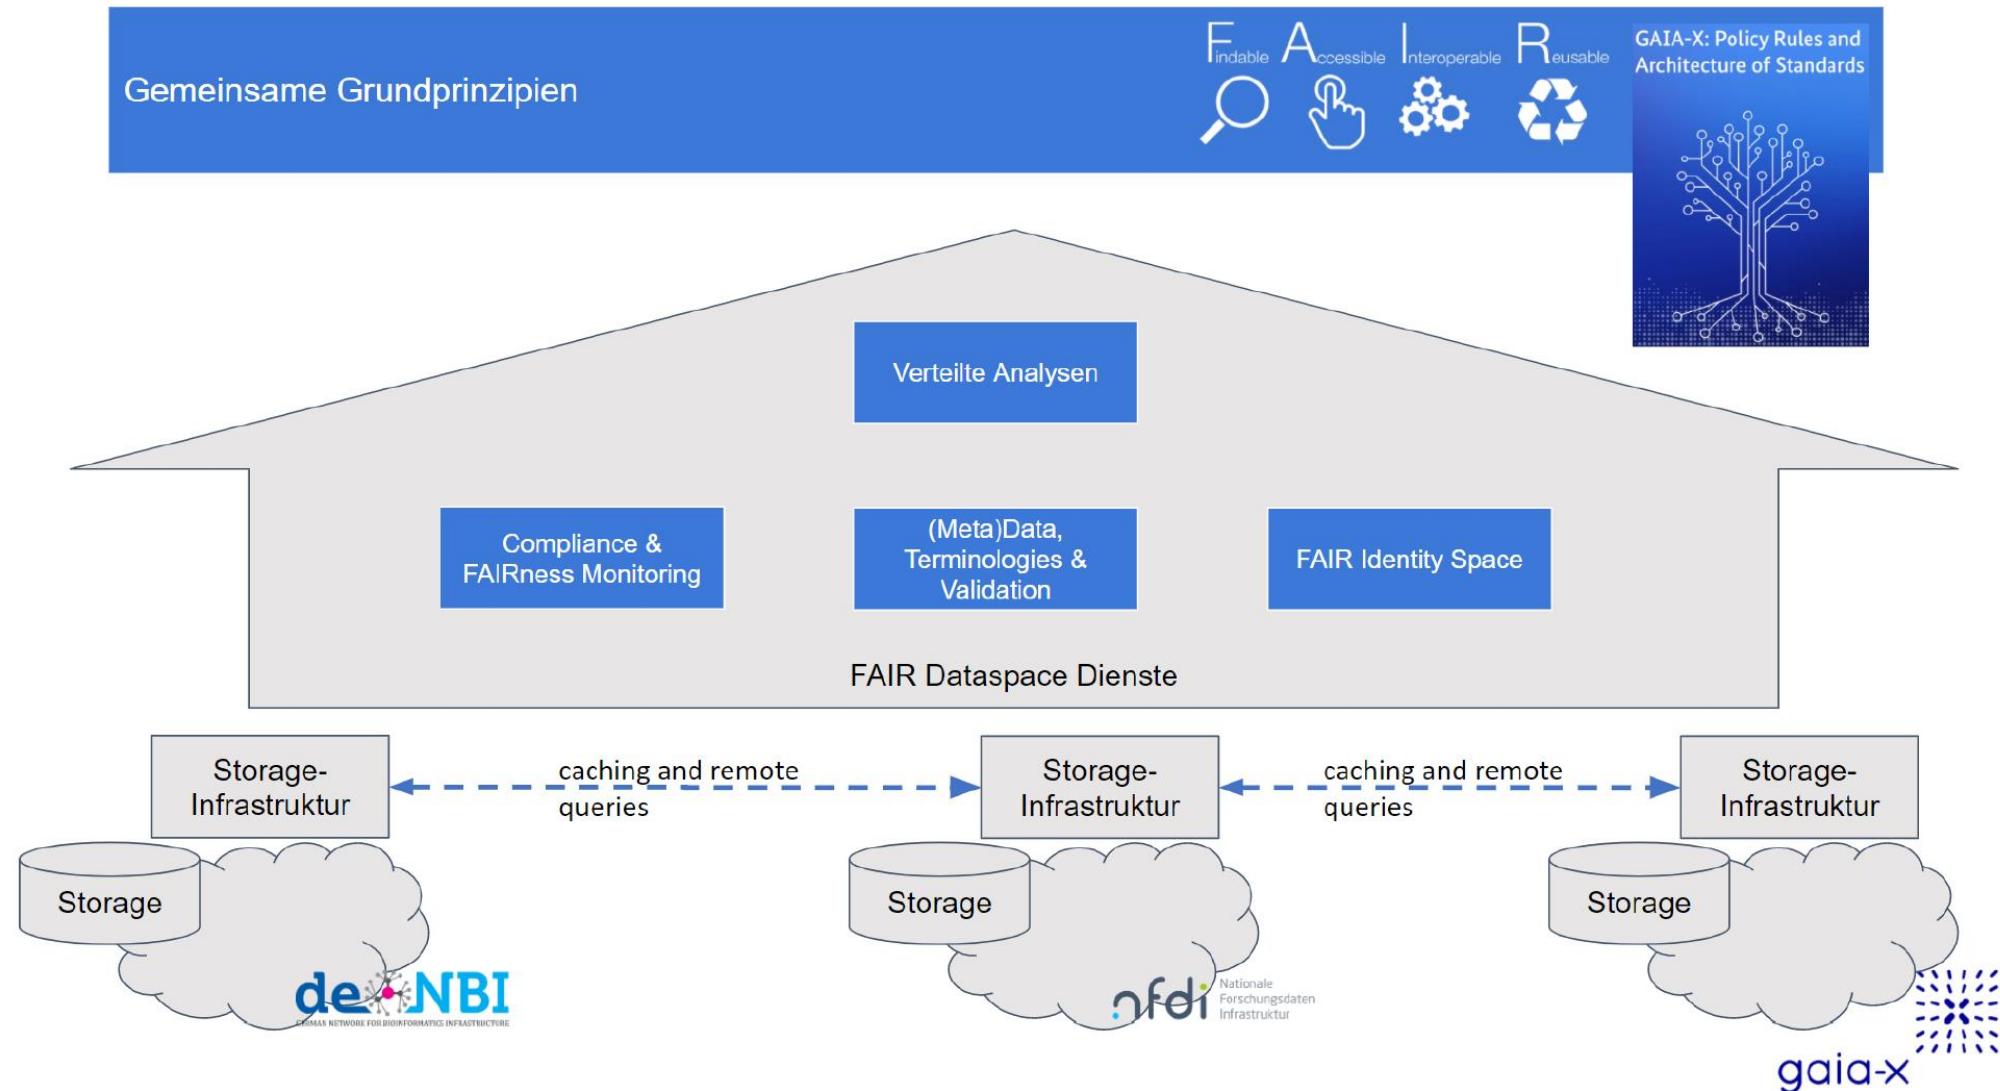

# Next level technology: Moving services to the academic cloud

## Section: Common infrastructure & interoperability

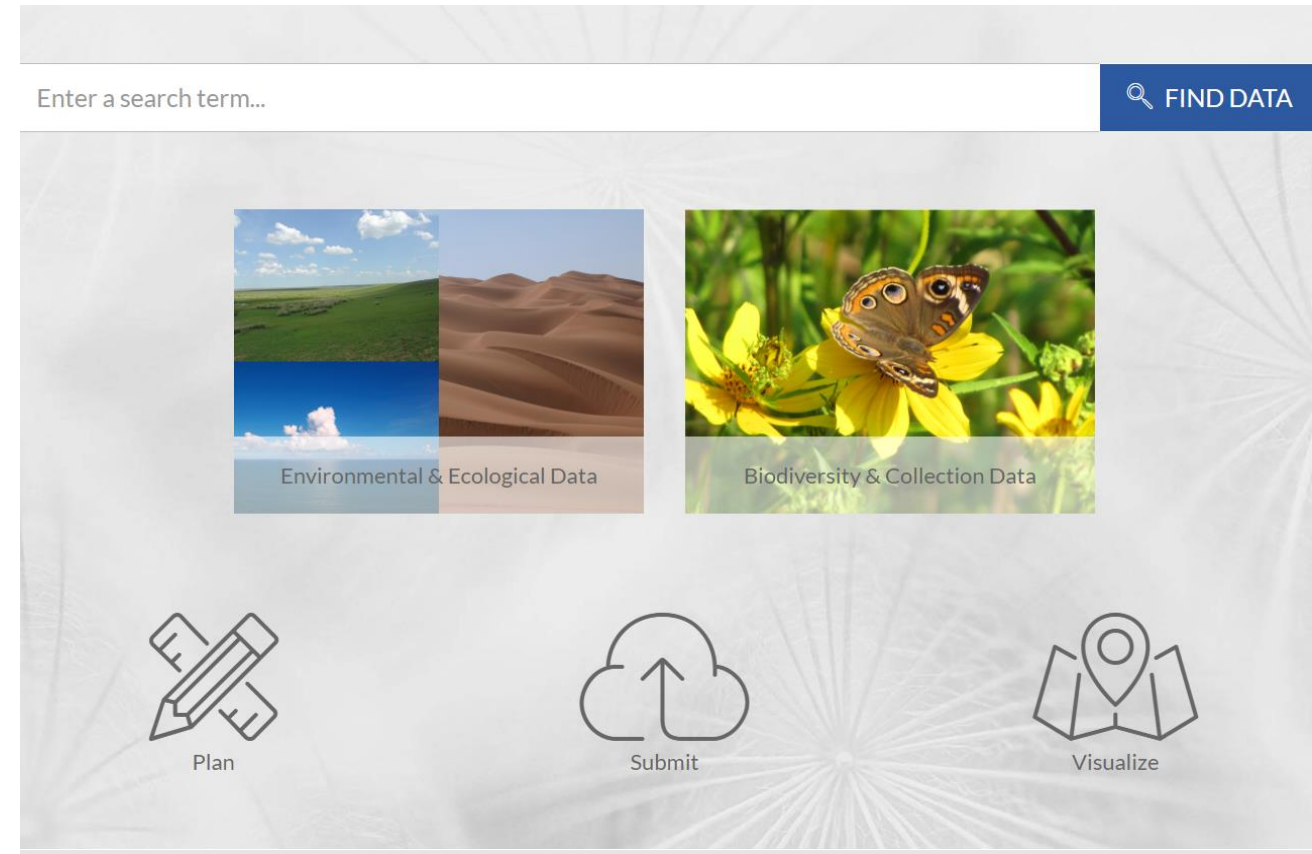

# FAIR Data Space for Science and Economy

# Research data services

A portfolio brought to NFDI4Biodiversity through the German Federation for Biological Data (GFBio e.V.)

The screenshot shows a web interface for research data services. At the top, there is a search bar with the placeholder text "Enter a search term..." and a blue button labeled "FIND DATA" with a magnifying glass icon. Below the search bar, there are two main data categories represented by images and text: "Environmental & Ecological Data" (showing a landscape with green hills and blue sky) and "Biodiversity & Collection Data" (showing a butterfly on a yellow flower). At the bottom of the interface, there are three icons representing different actions: "Plan" (two crossed pencils), "Submit" (a cloud with an upward arrow), and "Visualize" (a map with a location pin).
