Creating a data management environment

Developing a Data Management Plan (DMP) process that leverages content already held in systems.

Delivering a recommended business/workflow process change, business/workflow process integration points and design requirements which would support Griffith University's implementation of a DMP solution.

Start date

23 July 2019

Expected completion date

21 October 2019

Investment by ARDC

$50,000

Co-investment partners

Griffith University

Lead node

Griffith UNIVERSITY

1. Report

Summary of the project, including project approach, FAIRness of the data, collaboration and lessons learnt

2. Presentation

Presentation of project findings at the Data and Services Summit

Core features

Community support and involvement

A strong sense of community support and involvement in developing answers to some of the more difficult questions our sector faces.

Ignite ideas and discussions

Enabling diverse stakeholders to engage in discussions and sharing ideas to shape a national research data commons.

Who is this project for?

Researchers

■ ■ ■ ■

What does this project enable?

Projects in this area will contribute to determining what vision, governance structure and implementation program is necessary to create an Australian research data commons.
