## 1. Consultation

The RDCC will deliver a series of workshops to broaden input and build consensus around key themes emerging from the workshops.

## 2. Final Report

The final report will include the findings of these workshops and will address several questions posed by the ARDC to the group (available in the appendix to the second paper).

## Core features

### Community support and involvement

A strong sense of community support and involvement in developing answers to some of the more difficult questions our sector faces.

### Ignite ideas and discussions

Enabling diverse stakeholders to engage in discussions and sharing of ideas to shape a research data commons for our nation.

# Who is this project for?

Universities

# What does this project enable?

This project will help to elaborate on the ways in which universities will have a role in the work to create an Australian research data commons.
