[1] Only listing Exposure Terms that overlapped with at least two of the three previous categories. All the other terms will go into the Exposure / Risk Factor analysis section

[2] Chronic disease

[3] Could also include terms like 'renal disease' and 'hepatic disease'; not reflected here since in the majority of cases forms they weren't grouped together (likely due to lack of 'metabolic disease' term usage).

[4] Inheriting count from subterm coverage.

[5] Inheriting count from subterm coverage.

[6] Chronic disease

[7] Inheriting count from subterm coverage.
