kendell.powell 11:39 AM

Hey everyone, I've just realised that there are two **Goulburn Rivers**: one in NSW (Hunter catchment) and one in VIC (MDB). Would it be best if the **Goulburn River** tag reflected the Victorian one so there's no confusion?

duncan 1:05 PM

I think so, yes.

The map displays the Lower Darling/Anabran region, highlighting Lake Victoria and the Murray Weirs. Key features include:

- Geographic Labels:** Lake Victoria, Murray Weirs, Darling R., Great Darling Anabranch, Pomona, Werriworth, Mildura, Red Cliffs, and Robinvale.
- Infrastructure:** Pomona Weir, Burbundy Weir, and various weirs along the Darling River.
- Parks and Reserves:** Danggali Wilderness Area, Danggali Conservation Park, Chowilla Recreation Reserve, Mungo National Park, and Murray-Sunset National Park.
- Handwritten Annotations:** Numbered circles (1-11) and letters (A, B) marking specific locations. A note reads: "A = Lake Victoria Inlet", "B = Lake Victoria Outlet (Eufos River)".
- Regional Markers:** SA (South Australia), NSW (New South Wales), and VIC (Victoria).
- Scale and Orientation:** A north arrow and the text "NOT TO SCALE" are present.

Transcript of interview with Audrey Watson

Title

Transcript of interview with Audrey Watson

Description

Audrey Watson was born on 23rd August, 1922 at Sydney. Audrey moved to Penrith with her husband in 1946. The couple lived in a flat above a shop for a number of years before building a house at Emu Plains. Audrey ran the tea room at the Lewer's Bequest Regional Gallery. Like most of the interviewees she was a member of volunteer organisations for many years.

ozmeka

This is a project to adapt Omeka 2 for use in eResearch, mainly in the Australian context.

Project goals include:

- Adapting Omeka 2 to support cross-disciplinary research data collections. Eg:
 - [Dharmae](#) Data hub of Australian Research on Marine and Aquatic Ecocultures (NOTE, this is still not in its released form)
 - [From Farms to Freeways](#) (NOTE: not using Ozmeka code but this is the kind of collection we want to support).
- Making Omeka 2 as linked-data compliant as possible by improving ItemRelations, and making sure that URIs are used in as many places as possible rather than scalar-values such as strings.

The end
