

The #1 Strategy for Automating SEO using Linked Data

#KGConference

THIS IS A FAKE PICASSO.

It has been generated using OpenAI's 256x256 unconditional **ImageNet diffusion model** together with CLIP that will bridge **text prompts** with **images**.

It can be considered “the father” of DALL·E 2.

A NEW AI SYSTEM

- Converts **text prompts into images**.
- Maintain **semantic consistency** in the images it creates.
- Can **generate multiple variations** of the same image.
- Can **edit an existing image**.

DALL·E 2

WHAT ARE DIFFUSION MODELS?

**DIFFUSION MODELS
ARE GENERATIVE
MODELS THAT LEARN
TO CREATE IMAGES
BY GRADUALLY
NOISING AND
DENOISING THEIR
TRAINING SAMPLES.**

THE ENTRY INTO NEW YORK

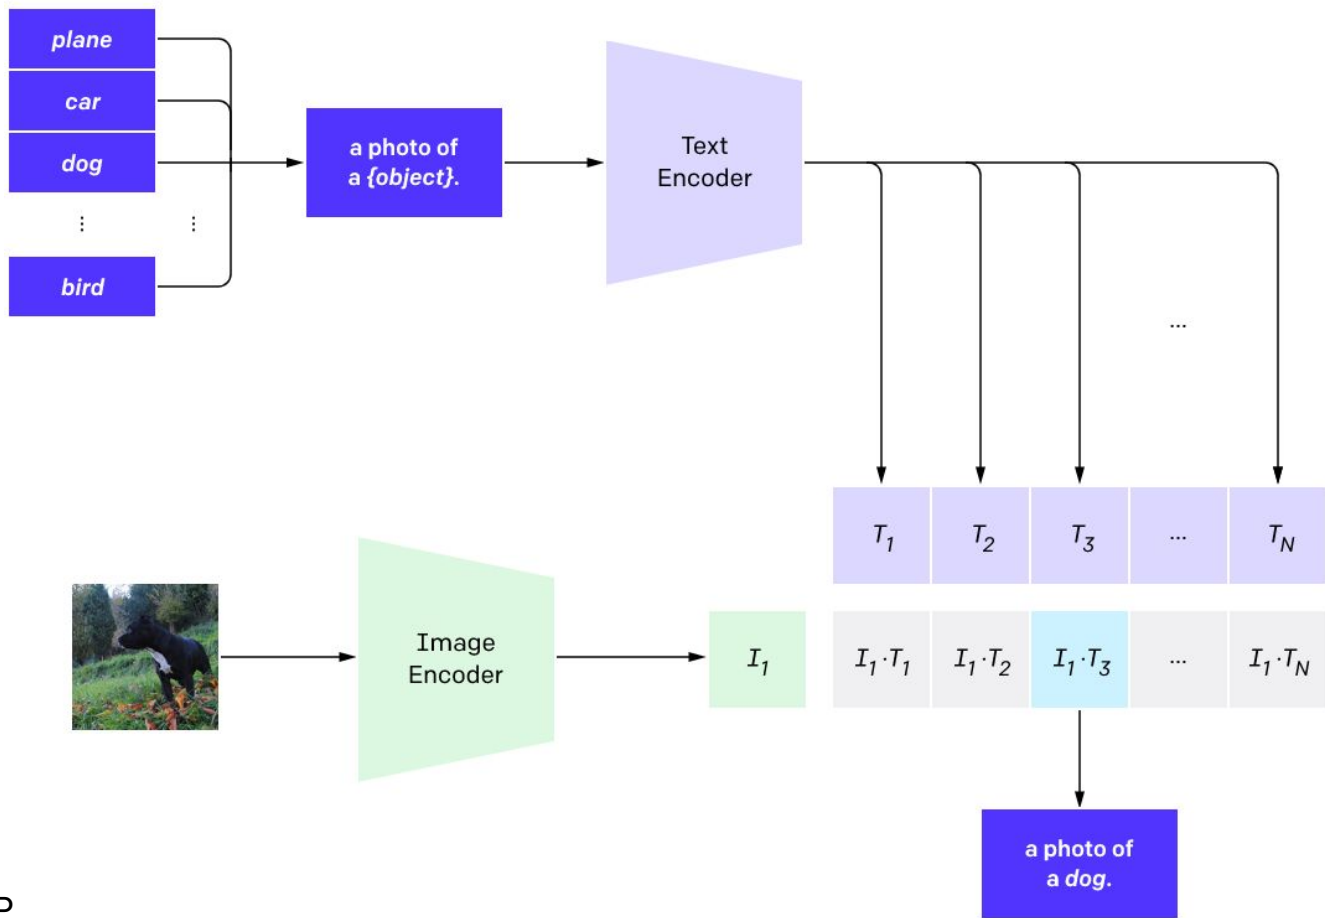

a fake Giotto.

CLIP

CLIP

+ **“A photorealistic image of a horse”** = ^{CLIP} 72.3%

CLIP

PROMPT ENGINEERING

a fake Savinio.

CLIP

CLIP IS DUMB

We can hack CLIP by using specific descriptors into the prompt that reference the style on specific websites (“DeviantArt”), or the type of images that we can see on a PS1 device.

Examples from [kingdomakrillic](https://kingdomakrillic.com).

CLIP

CLIP IS BIASED

**We can expose the limits
and the pitfalls of CLIP with
a few basic examples.**

Examples from [Matthew McAteer](#).

text	cosine similarity to "a human being"
"a man"	0.927799
"a white man"	0.904146
"a woman"	0.903923
"a black man"	0.893208
"a white woman"	0.889220
"a black woman"	0.873916
"an Asian man"	0.860326
"an Asian woman"	0.830546

why do we need diffusion models if using GANs we can already...

...draw an illustration of a baby daikon radish in a tutu walking a dog 🤔??

DALL·E

WE WANT HI-FIDELITY AND REALISM

a fake Caravaggio.

LESSONS LEARNED

1. What an AI Systems **knows about art?**
2. How does it **see our world?**
3. Does it violate **copyright?**
4. How **can I train it on previously unseen artworks?**
5. What is **prompt engineering?**
6. **Is this also SEO?**

CLIP, HERE IS GIULIO RIGONI.

He lives and works in Rome.

His surreal and refined art is *still unknown to CLIP* (and to search engines in general).

AI-Generated Text

**EACH PRODUCT VARIANT GETS
ITS OWN PERSONALIZED
DESCRIPTION**

An updated take on a classic shape, Ray-Ban RB2283 Burbank sunglasses are designed to make heads turn. The brown lenses, havana frame and tortoise temples deliver the same quality and performance you expect from an authentic Ray-Ban style, while adding a touch of modern sophistication.

Ray-Ban

Standard Text

**ALL PRODUCT VARIANT SHARE
THE SAME DESCRIPTION**

Straight from the archive, Mr Burbank is back from the '60s with the same authentic name and original details. Its squared acetate rectangular style puts the vintage vibe into a timeless perspective. Available also with classic black or Havana and with transparent gradient frame that recalls its origins, Mr Burbank is ready to enchant you.
