## A NASA OPEN-SOURCE SCIENCE MISSION: **TOPS: TRANSFORM TO OPEN SCIENCE**

### NASA HQ TOPS Core Team

Dr. Chelle Gentemann, TOPS Program Scientist  
Yvonne Ivey, TOPS Project Manager  
Cyndi Hall, TOPS Community Coordinator  
Dr. Karla Mastracchio, TOPS Communication Strategy

### NASA HQ OSSI Team

Kevin Murphy, Chief Science Data Officer SMD  
Katie Baynes, Deputy Chief Science Data Officer SMD  
Dr. Steve Crawford, Science Data Officer SMD  
Amy (Uyen) Truong, Chief Science Data Office Coordinator  
Christian Reyes, OSSI Coordinator  
Dr. Yaitza Luna-Cruz, OSSI/TOPS Science Coordinator  
Dr. Elena Steponaitis, OSSI/TOPS Science Advisor

# Welcome!

We are encouraging people to use  
#NASATops and #IHeartOpenScience

I   
**Open  
Science**

# Code of Conduct

## Expected Behavior

All participants are to...

- Be treated with respect and consideration, valuing a diversity of views and opinions
- Be considerate, respectful, and collaborative
- Communicate openly with respect for others, critiquing ideas rather than individuals
- Avoid personal attacks directed toward other participants
- Be mindful of your virtual surroundings and of your fellow participants
- Alert a host if you notice a dangerous situation or someone in distress
- Respect the rules and policies of the virtual meeting space

## Unacceptable Behavior

- Harassment, intimidation, or discrimination of any form will not be tolerated
- Physical or verbal abuse of any participant
- Examples of unacceptable behavior include, but are not limited to, verbal comments related to gender, sexual orientation, disability, physical appearance, body size, race, religion, national origin, inappropriate use of nudity and/or sexual images in the meeting space or in presentations or threatening or stalking of any participant.
- Disruption of proceedings, panels, discussions, and/or lightning talks.

# Code of Conduct (Continued)

## Expected Behavior

- Anyone requested to stop unacceptable behavior is expected to comply immediately.
- Hosts may take any action deemed necessary and appropriate, including immediate removal from the meeting without warning.

## Reporting Unacceptable Behavior

- If you are the subject of unacceptable behavior or have witnessed any such behavior, please immediately notify a meeting host.
- Notification should be done by contacting a host via direct chat or emailing your concern to Chelle Gentemann [chelle.gentemann@nasa.gov](mailto:chelle.gentemann@nasa.gov)
- Anyone experiencing or witnessing behavior that constitutes an immediate or serious threat to public safety is advised to contact 911 or your local emergency number.

# Submit Feedback or Suggestions

Your inputs are essential to the success of our mission. Throughout this week's panel, please feel free to submit questions, feedback, or suggestions via the feedback tool.

You can use the QR code to access the feedback tool

# Welcome

**Chelle Gentemann**  
Transform to Open Science  
Program Officer

# Agenda

| <i>Time (ET)</i> | <i>Agenda Item</i>   | <i>Description</i>                              |
|------------------|--|---|
| 12:00 pm         | Introduction and Review of Code of Conduct   | Karla Mastracchio                               |
| 12:05 pm         | Welcome and Meeting Objectives   | Chelle Gentemann                                |
| 12:10 pm         | NASA's Open Science Vision   | Kevin Murphy                                    |
| 12:20 pm         | Introduction of Panelists  | Yvonne Ivey                                     |
| 1:00 pm          | Break  |   |

| 1:20 pm          | Transform to Open Science (TOPS): Areas of Action  | Yvonne Ivey                                     |
| 1:40 pm          | Discussion   | Yvonne Ivey & Chelle Gentemann                  |
| 2:00 pm          | Break  |   |
| 2:10 pm          | Discussion: <ul style="list-style-type: none"><li>• How can TOPS best support adoption of open science?</li><li>• How can TOPS best support open science communities?</li><li>• What are future directions TOPS should consider?</li></ul> | Chelle Gentemann & Yvonne Ivey & Steve Crawford |
| 2:55 pm          | End of Day Wrap Up   | Yvonne Ivey                                     |

# Meeting Objectives

- The TOPS Community Panel will provide constructive feedback on TOPS mission, plans, and recent activities.
- This group will serve as a representative of their community in these conversations; and speak to their experience with open science; lessons learned in conducting open science; and provide input on future steps to be taken by TOPS, TOPS partners, and the greater NASA science community.
- Provide a written report within 4 weeks after each panel meeting.

# Welcome

**Kevin Murphy**  
NASA Chief Science Data Officer

## 2022 Year of Open Science

Large shifts in community norms occur over decades. *We have lost the luxury of time.* Climate change is rapidly impacting lives across our planet and Earth scientists must change just as rapidly. *Designating 2022 as the Year of Open Science will act as a catalyst to jump-start organized activities designed to transform agencies, institutions, and communities over the next decade.*

Open science is “research conducted openly and transparently” (National Academies of Sciences, 2018). Open science advances science faster while enabling interdisciplinary collaborations leading to the breakthroughs we need to address climate change. Many of the barriers to open science are rapidly falling away with recent technological advances, creating an opportunity to transform how we do science. Adopting open science practices has the potential to lower the threshold for entry, expand the science community, and increase opportunities for collaboration while promoting scientific innovation, transparency, and reproducibility. This will *increase the pace and quality of scientific progress.*

Open science begins with shared access to data, software, resources, and results (publications). Yet, openness that advances science is not a pure product of technology; it is a product of practices, norms, and community behavior around that technology. Just as new technology requires designing new workflows, it is important to deliberately design a new community infrastructure that is welcoming to a more diverse community and strategically directs support and community dynamics to include marginalized groups. While part of the science community has embraced open science, *a catalyst is needed* to motivate for larger adoption. We propose to coordinate activities across federal agencies, institutions, and scientific associations to rapidly advance open science participation across science.

**Potential Activities:** - *Work with each group to define activities & metrics of success*

**Science associations:** Designate 1 day of annual meetings to focus on open science education, including workshops, tutorials, showcases on all the aspects of participating in and contributing to open science. This would reach a large percentage of the science community and create an urgency around learning to use these new tools to do science. Advance ability to publish software research notebooks alongside research results. Create open science awards and include open science activities in criteria for existing honors where possible.

**Federal agencies:** Remove bureaucratic barriers to open science, incentivise open science activities, and provide training opportunities on open science activities. Update agency guidelines to better enable participation in open science. Set agency workforce training goals aligned with doing open

May 18, 2021

The screenshot shows a Google Docs interface. At the top, the browser address bar displays the document ID: docs.google.com/document/d/1WLAN5SYBlyno958my3Pdx1ju0IMZICHV38tBVsz\_nY/edit?pli=1. Below the address bar, a toolbar includes icons for Apps, gmail, calendar, TOPS, gdrive, concur, ESD help, NAMS, Satern, SharePointTOPS, and raptor. The document's version history is visible, showing a list of versions from May 14, 2021, to May 24, 2021. The current version, 'May 18, 2021, 12:33 PM', is selected and highlighted in blue. The document content is centered on the page and features a title '2022 TOPS: Transform to Year of Open Science' in green. The text discusses the impact of climate change on scientific norms and proposes actions for federal agencies and science associations to promote open science.

# 1 year later....

The screenshot shows a GitHub repository page for 'Transform-to-Open-Science'. The page includes a file list at the top with 'LICENSE.md' (added 9 months ago) and 'README.md' (updated 17 hours ago). The main content area features an 'Announcements!' section with a bulleted list of events: '12 May 2022 TOPS Community Forum', '17-19 May 2022 TOPS Community Panel', and 'Funding Opportunities'. Below this is the 'Transform to OPen Science (TOPS)' title, followed by a 'What We Do' section containing a paragraph about the project's goals and a 'Goals' section with a numbered list: '1. Increase understanding and adoption of open science principles and techniques', '2. Accelerate major scientific discoveries', and '3. Broaden participation by historically excluded communities'. The 'TOPS and the Year of Open Science' section mentions the 2023 initiative. On the right sidebar, there are sections for 'Releases', 'Packages', 'Contributors' (13 total, 2 shown), and 'Languages' (CSS 68.7%, HTML 25.8%, SCSS 5.1%, Other 0.4%). The TOPS logo is also visible on the right side of the page.

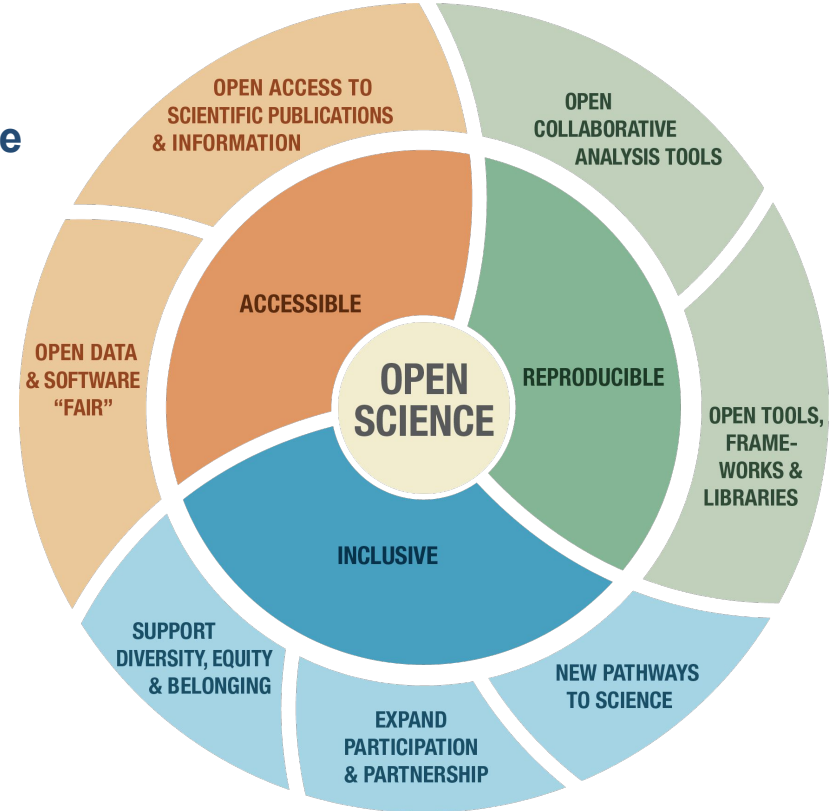

# Open Science: Accessible, Reproducible & Inclusive...

## Creates research that is:

- Cited more
- Creates a bigger impact
- Increases transparency
- Generates more scholarly collaborations

## Inclusive science means more:

- Collaborative projects
- Access to 'hidden knowledge'
- Equitable Systems
- Participation

# Open-Source Science is NASA's method to put Open Science into practice.

- **Open** the entirety of the scientific process, *from start to finish*
- **Broaden** community involvement in the scientific process
- **Increase** accessibility of data, software, & publications
- **Facilitate** inclusion, transparency, and reproducibility of science

# NASA's Open-Source science is the *activation* of an open science community

## *A continuum of open-source science*

# Why Open Science?

We are facing **Big Challenges**:

Covid, Climate change, ...

We need *more* people - more hands, more eyes, more brains - with diverse experiences to participate so that we ask the best questions and find the best solutions

## Open Science:

- Accelerates the pace of science
- Increases the impact of science
- Expands applications of data and science
- Shares hidden knowledge & expands participation in science

Image credit: NOAA

Image credit: Twentieth Century Fox

# Why Now?

We **now** have the tools to make open science a reality. Advances in technology have created accessible, reproducible, inclusive science at a scale not possible a few years ago.

There is national and global momentum for the move to open science.

Equal and open access benefits the public

# NASA's Open-Source Science Initiative

*Unlocking the full potential of a more equitable, impactful, efficient, scientific future*

## Policy development, education, compliance tools

*Updating* NASA Science policies on scientific information to better enable the activation of open science (eg. SPD-41a)

## ROSES Elements

*Supporting* open-source software, tools, frameworks, libraries, platforms, and training with over \$5 million dollars in grants per year

## Core Services for Science Discovery

*Developing* core data and computing services to enable open science

## Community Building & Partnerships - Transform to Open Science (TOPS)

*Accelerating* adoption of open science and expanding participation of marginalized communities in science

National Aeronautics and  
Space Administration

A NASA OPEN-SOURCE SCIENCE MISSION:  
**TOPS: TRANSFORM TO OPEN SCIENCE**

Yvonne Ivey  
TOPS Area of Actions

# Leading the Path to Open-Source Science

Transform to Open Science (TOPS) is a \$40 million\*  
5-year NASA Science Mission Directorate mission

## Objectives:

- ★ Increase understanding & adoption of open science.
- ★ Accelerate major scientific discoveries.
- ★ Broaden participation by historically underrepresented communities.

## Goals for 2027:

- ★ 20K earn Open Science Badge
- ★ 5+ major discoveries
- ★ Increase participation of underrepresented groups by 2x

*Year of Open  
Science*

\*pending appropriations

# 2023 is NASA's Year of Open Science

TOPS will be energizing and uplifting open science across the scientific community through:

## Engagement

## Capacity Sharing Resources

## Incentives

## Moving towards openness

# Area of Action: Engagement

## Focused Community Building

- Activities at all large science annual meetings
- Launch the TOPS Open Science Curriculum
- Targeted Outreach with MSIs
- Monthly Community Forums
- TOPS Community Panel
- GitHub (discussions enabled)
- Website

# Area of Action: Capacity Sharing Resources

## OpenCore Open Science Curricula: 5 Modules Organized as a Scientific Workflow

What is open science, why does it benefit me, and why does it benefit the greater scientific community?

How to share software

Best practices for sharing all results and analysis, as well as peer reviewing

ETHOS OF OPEN SCIENCE

OPEN TOOLS & RESOURCES

OPEN SOFTWARE

OPEN DATA

OPEN RESULTS

How to use popular open science tools

How to effectively use and share open data

Complete All 5 & earn TOPS Open Science Badge & Certification

Earn Micro-Badges at Each Level

# Area of Action: *OpenCore*

- *OpenCore* hosted on Open edX
  - High quality, interaction open online course
  - Free, public, open
  - Fast-pass option
  - Open edX Learning Management System (LMS) tracks learners, completion of modules, and data analytics

- Easily discoverable and accessible
  - In-person workshops at big society meetings and summer schools
  - Organized virtual cohorts
  - Independent learning

*Gamification of open science courses through badges and certifications via prizes, challenges, and hackathons!*

# Area of Action: Capacity Sharing Resources

## Engagement with the Community

### **TOPS Champions**

Scientists to help teach modules at events and act as Open Science champions

### **Cohorts**

Engage with learners through a virtual cohort model to increase Open Science Badge achievement

### **Summer Schools**

Institutions selected to run ~6 weeks of teaching the 5 modules to selected science teams + open competitive under-represented researchers

### **Curriculum Expansion**

Groups funded to migrate/create discipline specific modules and data science skills modules to Open edX TOPS platform

### **Hackathons**

More hackathons that advance data science skills and open science

# Area of Action: Incentives

## Open Science Awards

- Award Purpose: To reward significant leadership and progress toward open science and showcase the benefits of open science
- Societies establish and sustain TOPS Open Science Prizes and Awards programs
- TOPS will work with societies to evaluate and update their existing awards and recognitions to:
  - Include open science activities as review criteria
  - Where possible allow for team nominations

# Area of Action: Moving towards Openness

## Year of Open Science and the Future

Our proposed plan is to use 2023 Year of Open Science to build momentum and support to move towards more openness in science.

- Recognizing open science practices
- Holding open meetings
- Sharing hidden knowledge
- Inclusive collaborations

*\*Proposed: Update necessary systems to allow for documentation of past open science activities and proposed data, software, and publication plans*

# Open Science Results Speak for Themselves...

"We're deeply grateful to all the open source contributors who made our work possible." –Dr. Katie Bouman

"The open source community is very important for scientists; imagine if we had to do everything from scratch every single time." –Dr. Chi-Kwan Chan

We "greatly improve[d] our own work by adopting well-tested community packages that contain the collected wisdom of many other projects." –Dr. Lindy Blackburn

"with the open source projects in NumFOCUS, we were able to iterate our algorithms so fast that they enabled us to finish our work in two years"

## First image of black hole

Replying to @ChelleGentemann and @theNASEM

An aspect we should talk more about, open research practices as a driver to a real reform in the research endeavour. I try to depict it in this image :)

Replying to @ChelleGentemann @openscience and @theNASEM

- Being an open scientist has:
- 1) accelerated my career. It has allowed me to choose projects which benefit more people.
  - 2) Has created long lasting collaborations and friendships. When you are open you are... open!
  - 3) Made me a better scientist. "Show your working!"

I've briefly returned to the public-private sector (between 2019-21) and the nicest thing about working with OSS during all my career was the ability to show new methods to be applied in that company, which was of clear understanding, helping auditing efforts.

Here's a great use-case of @Py ART , which is funded by @doesscience @armnewsteam ! Over 200 citations so far, with many including awesome code like this paper which enables #OpenScience !

The power of open source software! The authors (@jehcssou and @deeplycloudy) also provide a clean code to encourage reproducible science. I could apply their technique to my dataset within a few hours. Neat! Yes to #OpenScience
