Vicky Gardner
Director of Policy
Taylor & Francis

What will we do today?

Workshop learning outcomes

identify how your research engages with real-world problems

define publishing objectives for meaningful research impact within and beyond academia

determine when and how to publish your work for maximum impact

view your work from the perspective of multiple external stakeholders

Taylor & Francis Group
an **informa** business

Play Video

Welcome to the session!

Here's what we're going to do:

Purpose – improve understanding of engaged research; provide suggestions on how to embed this in research process

Outcomes – up to you! Starting to think about engaged research / messy process, problem statement, answers to 5 'W's.

WIIFM – time and space to consider impact – how your work helps communities, fields, research partners.

Engagement – Mentimeter polls and individual reflection

Roles and responsibilities – respect, constructive comments, raise your hand to speak. Pick one thing to do after this session.

● ● Icebreaker: How would you describe your career stage?

Choppportunities

Spotlight Challenge: Canadian research and publishing policy

- Canada: top ten research producing nation
- Canadian RDI: increase business investment; community strengths and information structures
https://www.ic.gc.ca/eic/site/icgc.nsf/eng/h_00022.html
- SSHRC: knowledge mobilization, giving space to all voices and participants

https://www.sshrc-crsh.gc.ca/society-societe/community-communite/Imagining_Canadas_Future-Imaginer_L_avenir_du_Canada-eng.aspx

Spotlight Challenge: Open & engaged research and publication

- What questions should be asked? Who designs and implements the research?
- Who peer reviews the research?
- How should any results be published and who does the publication belong to?

Accountability

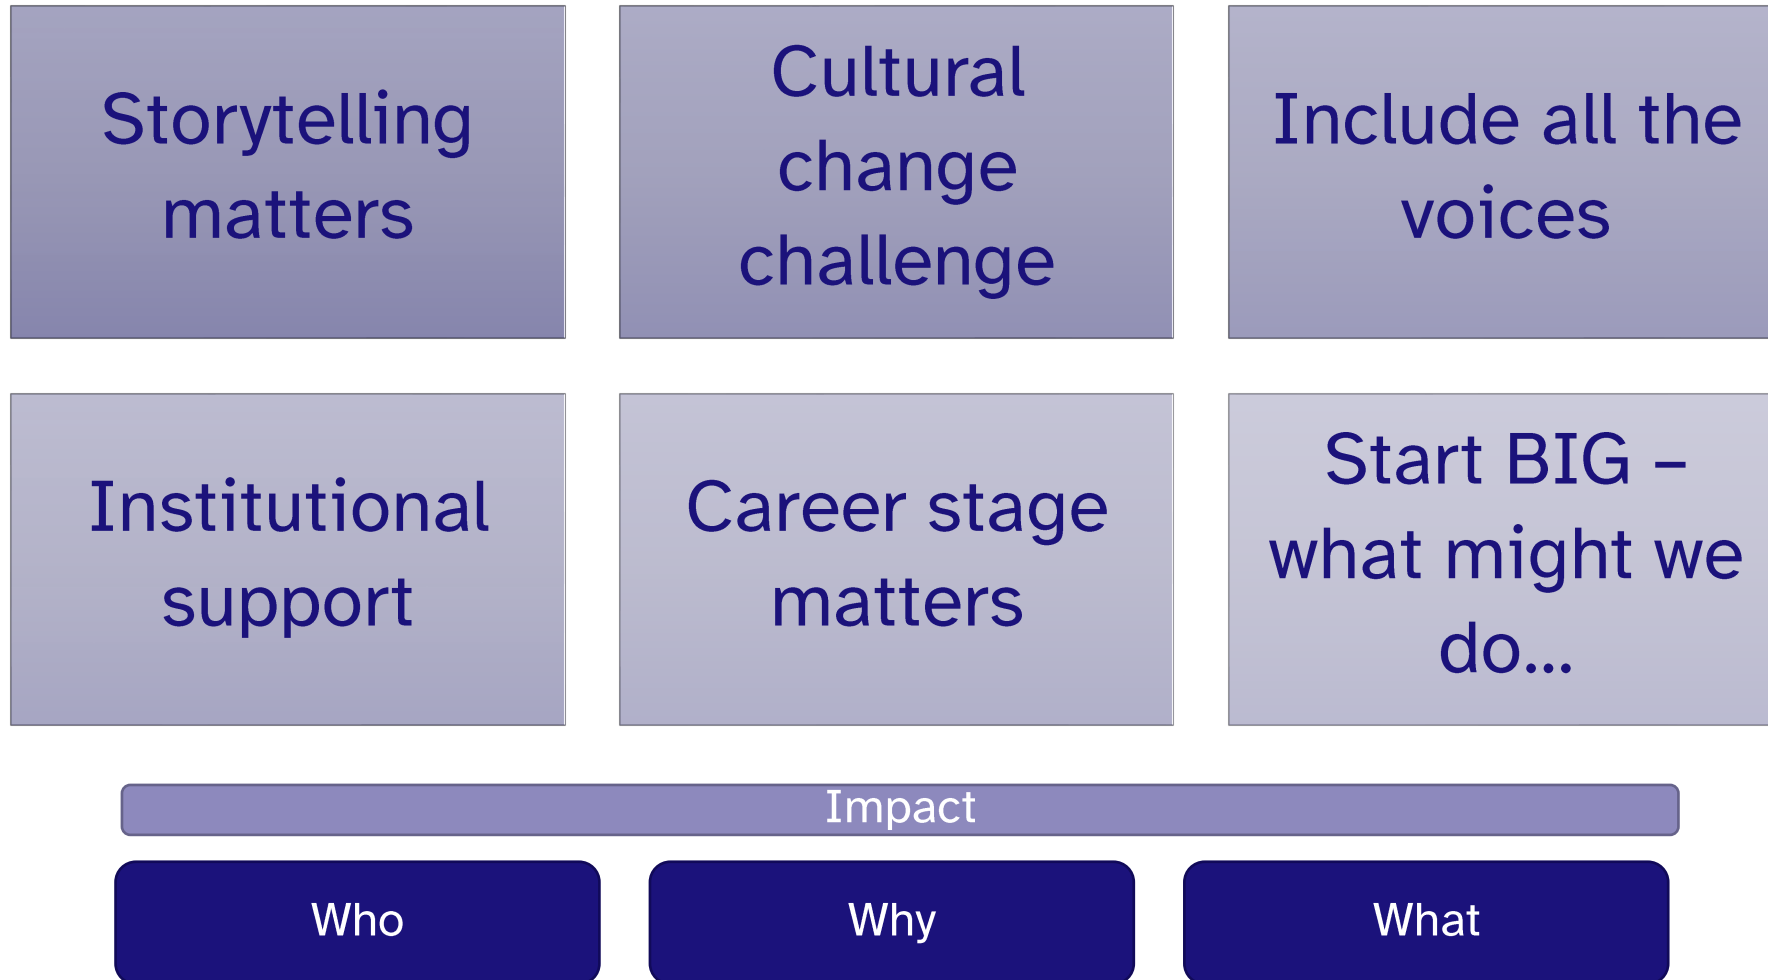

- How to involve multiple, disparate partners fairly?
- What relationship-building activities need to be considered?
- How do you include this in your work?

Open Process

What if we could tell a different story?: the **researcher** view

What we have heard to date: the **publisher** view

Researchers in the humanities and social sciences are engaging wide-ranging communities in their scholarship — as audiences, as partners, and as co-creators

Engaged scholarship advances community life, and promotes the diversity and inclusivity of scholarship as well as richer understanding of research that delivers real societal / economic benefit

The form of the knowledge being created, how and to whom it's disseminated, how the learning that arises from large interdisciplinary projects can influence modes of publication

Model practices and myth-busting #1: Research – Publication – Activity – Impact?

• What and how?

- 3-year project cataloguing Latin inscriptions
- Produce teaching resources
- Set up visits to the museum
- Blog, podcasts, articles

Outcomes:

- ✓ Articles published
- ✓ Workshops and school sessions
- ✓ Online resources
- ✓ Teaching resources

<https://blogs.ashmolean.org/latininscriptions/who-we-are/>

Model practices and myth-busting #2: Case Studies

- **What and how?**

- How to facilitate design for healthy ageing in cities
- Community participants in interviews, surveys and focus groups

Outcomes:

- ✓ Literature reviews
- ✓ Synthesised results
- ✓ Baseline information gathered
- ✓ Case study published

<https://www.tandfonline.com/doi/full/10.1080/23748834.2021.1930980>

Model practices and myth-busting #3: How to break the mould

• What?

- Youth Historians in Harlem
- Collaborative public history
- Faculty, graduates, young people

• How?

- Walking tours, Omeka exhibit, presentations

Outcomes:

- ✓ Digital collection:
<https://ansleyerickson.github.io/heh/>
- ✓ Unknowns of working with community prioritized
- ✓ Messy process documented
- ✓ Article published in 3 distinct parts

<https://www.tandfonline.com/doi/full/10.1080/13642529.2018.1494934>

Model Practices #3+: Voices, partners, processes, formats

In this article

ABSTRACT

Introducing the Youth Historians in Harlem (YHH) project

Part I: setting the stage for collaborative historical research

Part II: challenging the norms of history research through co-conducted oral histories

Part III: shifting responsibilities through creating digital history exhibits

The youth historians experiment in retrospect

Acknowledgements

Disclosure statement

ABSTRACT

This essay describes a yearlong public history collaboration between graduate students, a faculty member, and local public high school students collectively producing original scholarship on a topic in the history of education. This collaboration occurred in three parts, described chronologically: a planning phase, where the group devised research questions; a research phase, where graduate students, faculty, and high school students co-conducted oral histories; and a dissemination phase, where the group created Omeka exhibits based on oral histories and other secondary research. By focusing on the methodological implications of this type of novel scholar-youth collaboration, this essay argues that there are untapped opportunities and scholarly benefits to researching topics in the history discipline (particularly the history of education) with historically trained, local high school youth. This experimental collaboration is meant to spark dialogue about how to combine the traditions of the history field with important hands-on youth/community work for the purposes of rethinking traditional historical processes.

Introducing the Youth Historians in Harlem (YHH) project

I vividly recall one afternoon after I moved to New York City, walking through hallowed Morningside Park, the long, narrow stretch that separates the grandiose structures at Columbia University from the historic Black neighborhood of Harlem. Here I was, a white graduate student from the Midwest – an outsider – passing through the site of the infamous 1968 Columbia University protests where the Harlem com

- ✓ **Diverse ideas** – including all the voices of participants and project leads
- ✓ **Partner collaborations** – ensuring shared values are well articulated at the outset and mutual goals well defined
- ✓ **Messy processes** – complexities of working with multiple stakeholders and embracing failures
- ✓ **Multimodal formats** – describing, preserving and connecting born-digital research outputs

Model Practices #3++: Infrastructure for engaged research and publication

Early-stage

- How are you going to publish

- Who are you publishing for/with?

Your engaged research and publication design

Wrapping up

Take aways

Thoughts?

Actions?

What did we do today?

Workshop learning outcomes

identify how your research engages with real-world problems

view your work from the perspective of multiple external stakeholders

determine when and how to publish your work for maximum impact

define publishing objectives for meaningful research impact within and beyond academia

What might we do next?

A few further considerations...

- Start with the why?
- Develop problem-framing approaches – embrace complexity and messy processes
- Define your publication objectives – collaborate on design
- Work with your partners – establish who publishes what and when
- Anticipate failure and expect to redesign your work – tell others about that!
- Explore all the model publishing practices – challenge existing paradigms and institutional blockers
- Understand the infrastructure – talk to your librarian!
- Consider engaged research and publication overlaps – integrate this into your teaching

● ● What one thing will you take away and do next?
