

Supplementary file 1 List of the studies used in the analysis

1. Asah ST, Blahna DJ (2012) Motivational functionalism and urban conservation stewardship: implications for volunteer involvement. *Conservation Letters* 5: 470-477. <https://doi.org/10.1111/j.1755-263X.2012.00263.x>
2. Asah ST, Lenentine MM, Blahna DJ (2014) Benefits of urban landscape eco-volunteerism: mixed methods segmentation analysis and implications for volunteer retention. *Landscape and Urban Planning* 123: 108-113. <https://doi.org/10.1016/j.landurbplan.2013.12.011>
3. Atchison J, Gibbs L, Taylor E (2017) Killing carp (*Cyprinus carpio*) as a volunteer practice: implications for community involvement in invasive species management and policy. *Australian Geographer* 48(3): 333-348. <https://doi.org/10.1080/00049182.2016.1265229>
4. Carballo-Cárdenas EC, Tobi H (2016) Citizen science regarding invasive lionfish in Dutch Caribbean MPAs: Drivers and barriers to participation. *Ocean & Coastal Management* 133: 114-127. <https://doi.org/10.1016/j.ocecoaman.2016.09.014>
5. Cerrano C, Milanese M, Ponti M (2017) Diving for science-science for diving: volunteer scuba divers support science and conservation in the Mediterranean Sea. *Aquatic Conservation-Marine and Freshwater Ecosystems* 27(2): 303-323. <https://doi.org/10.1002/aqc.2663>
6. Cerri J, Batisti G, Ferretti M, Zaccaroni M, Bertolino S. (2018) Hunters' preferences for engaging in control programs of introduced Eastern cottontails in Italy: a factorial survey approach. *European Journal of Wildlife Research* 64: 21. <https://doi.org/10.1007/s10344-018-1181-2>
7. Crall AW, Jordan R, Holfelder K, Newman GJ, Graham J, Waller DM (2013) The impacts of an invasive species citizen science training program on participant attitudes, behavior, and science literacy. *Public Understanding of Science* 22(6): 745-764. <https://doi.org/10.1177%2F0963662511434894>
8. Crowley SL, Hinchliffe S, McDonald RA (2018) Killing squirrels: Exploring motivations and practices of lethal wildlife management. *Environment and Planning E: Nature and Space* 1(1-2): 120-143. <https://doi.org/10.1177%2F2514848617747831>
9. Dunn M, Marzano M, Forster J (2021) The red zone: Attitudes towards squirrels and their management where it matters most. *Biological Conservation* 253: 108869. <https://doi.org/10.1016/j.biocon.2020.108869>
10. Falk BG, Snow RW, Reed RN (2016) Prospects and limitations of citizen science in invasive species management: A case study with Burmese pythons in Everglades National Park. *Southeastern Naturalist* 15(sp8): 89-102. <https://doi.org/10.1656/058.015.sp806>
11. Garrard GE, Kusmanoff AM, Faulkner R et al. (2020) Understanding Australia's national feral cat control effort. *Wildlife Research* 47(8): 698-708. <https://doi.org/10.1071/WR19216>
12. Harvey RG, Perez L, Mazzotti FJ (2016) Not seeing is not believing: volunteer beliefs about Burmese pythons in Florida and implications for public participation in invasive species removal. *Journal of Environmental Planning and Management* 59(5): 789-807. <https://doi.org/10.1080/09640568.2015.1040489>
13. Jubase N, Shackleton RT, Measey J (2021) Motivations and contributions of volunteer groups in the management of invasive alien plants in South Africa's Western Cape province. *Bothalia* 51(2):a3. <http://dx.doi.org/10.38201/btha.abc.v51.i2.3>
14. Krasny ME, Lee SK (2002) Social learning as an approach to environmental education: Lessons from a program focusing on non-indigenous, invasive species. *Environmental Education Research* 8(2): 101-119. <https://doi.org/10.1080/13504620220128194>

15. Krželj M, Cerrano C, Di Camillo CG (2020) Enhancing Diversity Knowledge through Marine Citizen Science and Social Platforms: The Case of *Hermodice carunculata* (Annelida, Polycheta). *Diversity* 12(8): 311. <https://doi.org/10.3390/d12080311>
16. Larson LR, Cooper CB, Hauber, ME (2016) Emotions as drivers of wildlife stewardship behavior: Examining citizen science nest monitors' responses to invasive house sparrows. *Human Dimensions of Wildlife* 21(1): 18-33. <https://doi.org/10.1080/10871209.2015.1086933>
17. Marchante H, Morais MC, Gamela A, Marchante E (2017) Using a WebMapping platform to engage volunteers to collect data on invasive plants distribution. *Transactions in GIS* 21(2): 238-252. <https://doi.org/10.1111/tgis.12198>
18. Marchante H, Morais MC, Marchante E (unpublished data) How successfully can citizens be involved in the management of invasive plants: from web mapping to practical activities with the platform Invasoras.pt. in preparation
19. Marshall GR, Coleman MJ, Sindel BM, Reeve IJ, Berney PJ (2016) Collective action in invasive species control, and prospects for community-based governance: The case of serrated tussock (*Nassella trichotoma*) in New South Wales, Australia. *Land Use Policy* 56: 100-111. <https://doi.org/10.1016/j.landusepol.2016.04.028>
20. Niemiec RM, Ardoin NM, Wharton CB, Asner GP (2016) Motivating residents to combat invasive species on private lands: social norms and community reciprocity. *Ecology and Society* 21(2): 30. <http://dx.doi.org/10.5751/ES-08362-210230>
21. Pagès M, Fischer A, Van der Wal R (2018) The dynamics of volunteer motivations for engaging in the management of invasive plants: insights from a mixed-methods study on Scottish seabird islands. *Journal of Environmental Planning and Management* 61(5-6): 904-923. <https://doi.org/10.1080/09640568.2017.1329139>
22. Pagès M, Fischer A, van der Wal R, Lambin X (2019) Empowered communities or “cheap labour”? Engaging volunteers in the rationalised management of invasive alien species in Great Britain. *Journal of Environmental Management* 229: 102-111. <https://doi.org/10.1016/j.jenvman.2018.06.053>
23. Phillips TB, Bailey RL, Martin V, Faulkner-Grant H, Bonter DN (2021) The role of citizen science in management of invasive avian species: What people think, know, and do. *Journal of Environmental Management* 280: 111709. <https://doi.org/10.1016/j.jenvman.2020.111709>
24. Pocock MJO, Marzano M, Bullas-Appleton E, Dyke A, de Groot M, Shuttleworth CM, White R (2020) Ethical dilemmas when using citizen science for early detection of invasive tree pests and diseases. *Management of Biological Invasions* 11(4): 720–732. <https://doi.org/10.3391/mbi.2020.11.4.07>
25. Saavedra S, Medina FM (2020) Control of invasive ring-necked parakeet (*Psittacula krameri*) in an island Biosphere Reserve (La Palma, Canary Islands): combining methods and social engagement. *Biological Invasions* 22: 3653–3667. <https://doi.org/10.1007/s10530-020-02351-0>
26. Scyphers SB, Powers SP, Akins JL et al. (2015) The role of citizens in detecting and responding to a rapid marine invasion. *Conservation Letters* 8(4): 242-250. <https://doi.org/10.1111/conl.12127>
27. Servia MJ, Cao A, Lueje YR (2020) Back and forth to the campus: Tackling invasions through service-learning activities in higher education. *International Journal of Sustainability in Higher Education* 21(7): 1413-1427. <https://doi.org/10.1108/IJSHE-02-2020-0059>
28. Stien J, Hausner V (2018) Motivating and engaging volunteer hunters to control the invasive alien American mink *Neovison vison* in Norway. *Oryx* 52(1): 186-194. <https://doi.org/10.1017/S0030605316000879>
