

Views Controlled Vocabularies (VCV) Task Group
Zoom meeting
2020-04-28 14:00 UTC

Attending: Steve Baskauf, Matthew Nielsen, Randy Singer, Dan Stowell, Neil Cobb

Regrets: none

Meeting notes:

Notes added during the meeting and from the chat are in red.

- I. John Oswald (TAMU, Neuroptera, Megaloptera, and Raphidioptera image dataset with views. See new folder "oswald-neuroptera" in the Google Drive (Access db tables, screenshot, and explanation).
- II. Katja Seltmann (Bee-Net) seltmann@ccber.ucsb.edu responded to my email positively and would like to attend our next meeting. She can't attend at this time.
- III. Neil suggested Jorrit Poelen (GLOBI) jorrit.poelen@ronininstitute.org, jhpoelen@xs4all.nl as someone that might want to participate. Sent emails to two email addresses, but no response. Do we want to pursue further? **Steve will ping again.**
- IV. Didn't contact Mary Barkworth (plant traits). Is she retired? **nobody knows**
- V. Template spreadsheet to generate the SKOS:
 - A. Separated the SKOS collections from the subjectParts.
 - B. Progress on adding to subjectParts sheet.
- VI. Discussion points during meeting. **Items have been added to the part-collection-join spreadsheet; need to also be put on the subjectPart-cv sheet. Keep adding parts for insects and other groups.**
- VII. Would like to set up a meeting soon that John Oswald and Katja Seltmann can attend. Katja teaches at 8 AM on Tuesdays this quarter, so we could try a different day, although she may be done with classes by the next meeting. Based on current times, 15:00 UTC is 10 AM Nashville and Houston, 5 PM Stockholm, 8 AM San Diego and Flagstaff, and 11 AM Ann Arbor. I can set up a Doodle poll to check for days. **Let's try for Wed, May 13.**
