

22nd Community Call

OPENAIRE CONTENT PROVIDERS MANAGERS

**From COUNTER CoP Release 4 to Release 5:
Updates in the new usage statistics reports
and metrics**

AGENDA:

1) OpenAIRE Provide updates

2) Main topics for discussion

- ❖ Updates in the new usage statistics reports and metrics: COUNTER CoP Release 4 and Release 5

3) Discussion

Notes & Agenda ⇒ <https://bit.ly/2rTgJwy>

OpenAIRE PROVIDE – recent news & reminders

Index and stats update – info

Content updated on the portals: 25 May.

www.openaire.eu/aggregation-and-content-provision-workflows

CRIS systems registration

Deployed in Production (since May 24th)

Requirements to register:

- ✓ Registered in DRIS (Directory of CRIS)
- ✓ Compatible with OpenAIRE Guidelines for CRIS managers

Terms of Use

Updates in the Dashboard interface

Deployed in Production (since May 24th)

- Access your datasource dashboard and update the ToU

Public roadmap

Follow up the PROVIDE activity and feel free to vote features and add comments.

From COUNTER CoP Release 4 to Release 5

Updates in the new usage statistics reports and metrics

Dimitris Pierrakos
OpenAIRE

UsageCounts Service Features

- The Usage Statistics Service of OpenAIRE Research Graph
- Tracking of usage with specialized server-side software (PUSH)
- Collecting COUNTER reports (R4 and R5) (Pull)
- Anonymization of IPs
- Metadata de-duplication enables accumulation of usage for same research outputs
- COUNTER Code of Practice compatibility to provide standards based usage statistics.
- Indicators that complements other (traditional and alternative) bibliometric indicators to provide a comprehensive and recent view of the impact of academic resources.

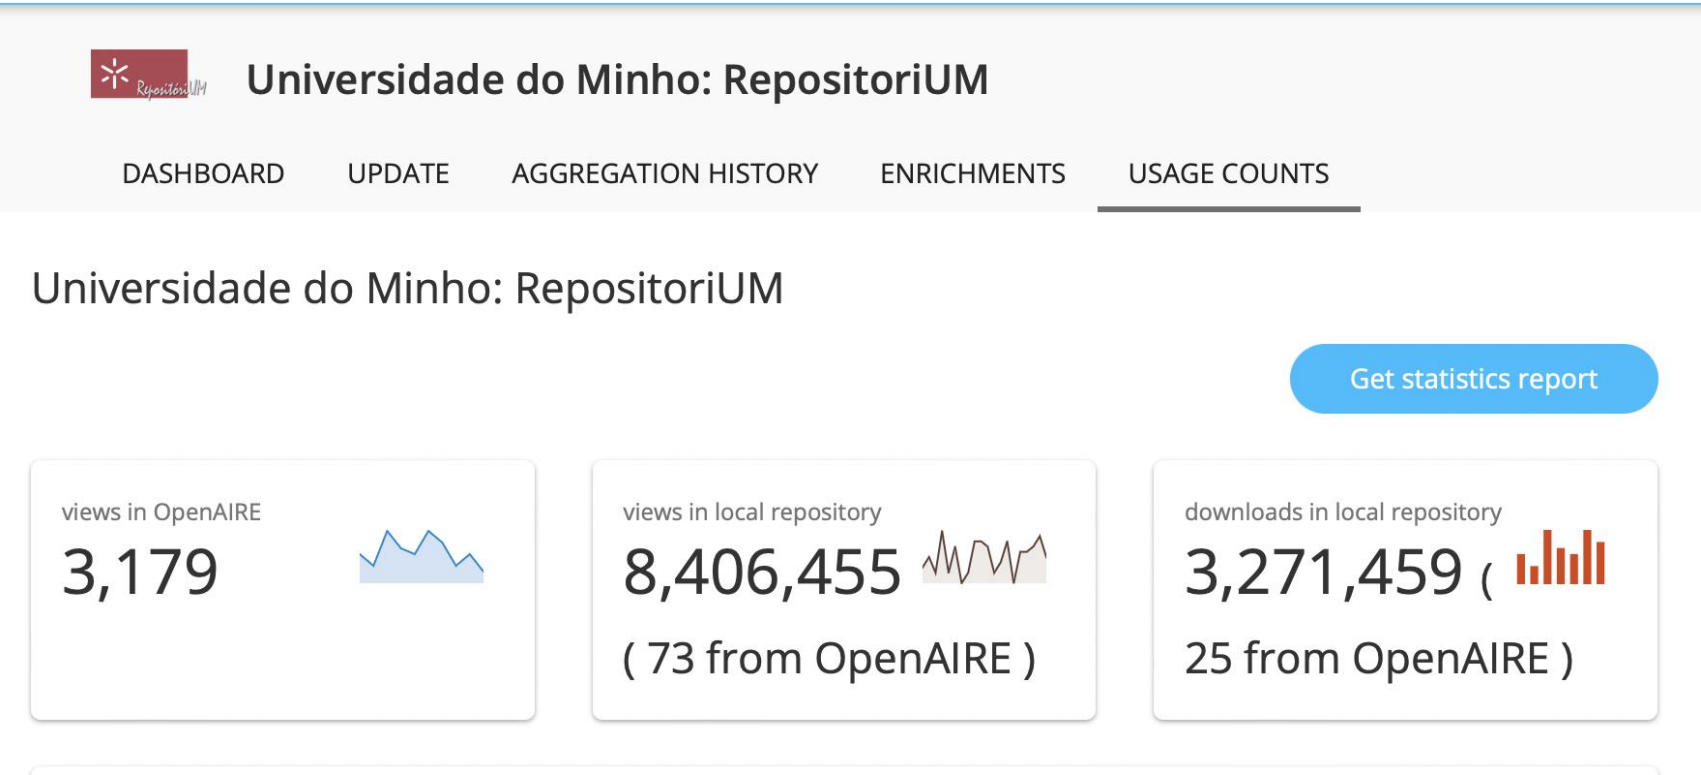

COUNTER CoP Timeline

- Before COUNTER
 - Not Consistent, not comparable usage statistics, i.e. not standard
- Release 1 (2003)
 - Journals and Databases
- Release 2 (2005)
 - Platform-wide use
- SUSHI (2006)
 - automate harvesting of reports
- Release 3 (2009)
 - Book reports, journal archive and YOP
- Release 4 (2013)
 - 24 Reports including multimedia reports, book chapter reports
- Release 5 (2019)
 - 4 Master reports
 - New CoP
 - New concepts, metrics, filters, etc

Current Status: COUNTER CoP R4 Reports

Supported Reports

AR1

Article Report 1, number of successful article download requests by month and repository.

IR1

Item Report 1, number of successful item download requests by month and repository.

RR1

Repository Report 1, number of successful item downloads for all repositories participating in the usage statistics service.

BR1

Book Report 1, number of successful title requests by month and title.

BR2

Book Report 2, number of successful section requests by month and title.

UsageCounts: Upcoming Updates

COUNTER Code of Practice R5

- Metric Types
- Other Concepts
- Reports

COUNTER CoP R5 Metric_Types

- An **investigation** is tracked when a user performs any action in relation to a content item or title
- A **request** is specifically related to viewing or downloading the full content item
- COUNTER R4: ~~Views/Downloads~~

COUNTER CoP R5 Updates: Metric Types

- **Unique_Item_Investigations:** Counts unique article investigations and requests in a user-session.
- **Total_Item_Investigations:** Counts total number of times information related to an article viewed (including all article full-content views).
- **Total_Item_Requests:** Counts all article full-content views across all formats like HTML and PDF. This is **equivalent** to the Release 4 usage count.
- **Unique_Item_Requests:** Counts unique article full-content views in a given session regardless of format. If a user views an article PDF and HTML in the same session this would only count as 1.

COUNTER CoP R5: Example Scenario

Susan is researching the history of Porto in UMINHO repository. From a list of search results, she opens three article abstracts. The counts are:

- total_item_investigations: 3
- unique_item_investigations: 3

After reading the abstracts, Susan downloads the PDFs for two of the articles. The counts change to:

- total_item_investigations: 5 (3 as "views" + 2 as "downloads")
- unique_item_investigations: 3 (3 unique "views")
- total_item_requests: 2
- unique_item_requests: 2

R4 Downloads vs R5 Total_Item_Requests

R4 Views vs R5 Total_Item_Investigations

OpenAIRE
UsageCounts

CoP R5 Metric Types Features

- **Total Item Requests**
 - Important for providers that have full-text content
 - Reports the number of full-text downloads or views
- **Total Item Investigations**
 - Provides a big picture perspective of the total number of investigations
- **Unique Investigations and Requests**
 - Powerful metrics for identifying activities with unique items and titles
 - Most accurate for cost per use analysis

R5 Data_Types (R4 Items)

Data_Type identifies the general type of content being accessed or for which usage is being reported.

Data_Type
<ul style="list-style-type: none">• Article• Book• Book Segment• Collection• Database• Dataset• Journal• Multimedia• Platform• Repository Item

- Article
- Book
- Book Segment
- Collection
- Database
- Dataset
- Journal
- Multimedia
- Platform
- Repository Item

CoP R5 Access_Type

Access_Type describes the nature of access control that was in place when the content item was accessed.

This attribute appears in Journal Title Report 1 and allows usage of open access content to be separated from content that requires a license.

Data_Type
• Controlled
• OA_Delayed
• OA_Gold_APC
• OA_Gold_Non_APC
• Other_Free_to_Read

- Controlled
- OA_Delayed
- OA_Gold_APC
- OA_Gold_Non_APC
- Other_Free_to_Read

CoP R5 Access_Method

Access_Method is an attribute indicating whether the usage related to investigations and requests was generated by a human user browsing and searching a website (“regular”) or by Text and Data Mining processes (TDM).

This attribute appears as an optional parameter in the Expanded Title Report.

TDM usage is excluded from the standard Journal and Book reports.

Access_Method
• Regular
• TDM

- Regular
- TDM

CoP R5 Year of Publication

YOP is the year of publication for the content item accessed. If content is available in print and online format and the publication dates of these two formats differ, the year of publication of the print will be used.

This attribute appears as an attribute in Journal Title Report 2 as well as both Book Reports and as an optional parameter in the Expanded Title Report.

Access_Method
• <i>yyyy</i>
• <i>0001 (unknown)</i>
• <i>9999 (articles in press)</i>

- *yyyy*
- *0001 (unknown)*
- *9999 (articles in press)*

COUNTER CoP R5 Reports

- Reduced number of reports (4 Master, 16 Total vs 24).
- Many of the special-purpose reports that are seldom used are replaced with a small number of flexible generic reports.
- All COUNTER R4 reports have either been renamed or eliminated in favour of other COUNTER R5 report options.
- Filter to show selected:
 - Dates
 - Content/Data types
 - Metric types
 - Year of Publication
 - License types
 - and more in various combinations

IR_M1	Multimedia Item Requests

COUNTER CoP R5 Reports

Report Name	Short Description	Description
PR	Platform Master Report	A report summarizing usage activity for the repository by month, metric type and item type
PR_1	Platform Usage Report	A report summarizing usage activity for the repository by month, broken down by metric type
IR	Platform Master Item Report	A report for items requests by month metric_type, item type and repository
DSR	Datasets Report	A report for datasets requests by month metric_type and repository

COUNTER CoP R5 Reports

PR

Platform Master Report

A customizable report summarizing activity across a provider's platforms that allows the user to apply filters and select other configuration options for the report.

PR_P1

Platform Usage

Standard View of the Package Master Report that presents usage for the overall Platform broken down by Metric_Type.

IR

Item Master Report

COUNTER Item Master Report.

DSR

Datasets Report

COUNTER Datasets Master Report.

Notes & Recordings

June 8th, 2022 [new date] —

Main topic:

- New usage statistics reports: from Release 4 to [Release 5 of the COUNTER Code of Practice](#), in which the [OpenAIRE UsageCounts](#) statistics reports are based.

Participants will also be asked to give their feedback on the best options for PROVIDE service regarding the delivering of reports based on both Releases 4 and 5, in order to identify the best options to meet their needs.

Time: 2:30 PM - 3:30 PM CEST
Call link: [Zoom](#)
