When should we consider data in research projects?

- Data management plans
- Getting data access/collection
- Dealing with data
 - types of data
 - keeping it secure
 - version control
 - metadata
- Long-term storage/archiving
- Publishing

Data in a research article

Data in supplementary files

Repository with DOI

Linked in a data availability statement

Data paper ★

What is a data paper?

- Describes a dataset
- Does not include analysis or findings
- Data usually in an open repository
- Use a template to write it
- Data journals

SCIENTIFIC
DATA

F1000
Research

 PLOS

What do you write in a data paper?

- Background and summary
- Methods – data collection
- Data records – where is the data?, what format?, overview of the data files – data dictionary.
- Technical validation – what analyses were done to ensure technical quality of dataset
- Usage notes – how can others reuse it? Or apply to reuse it?

Why write a data paper?

- Research papers
- FAIR Dataset
- Data paper?

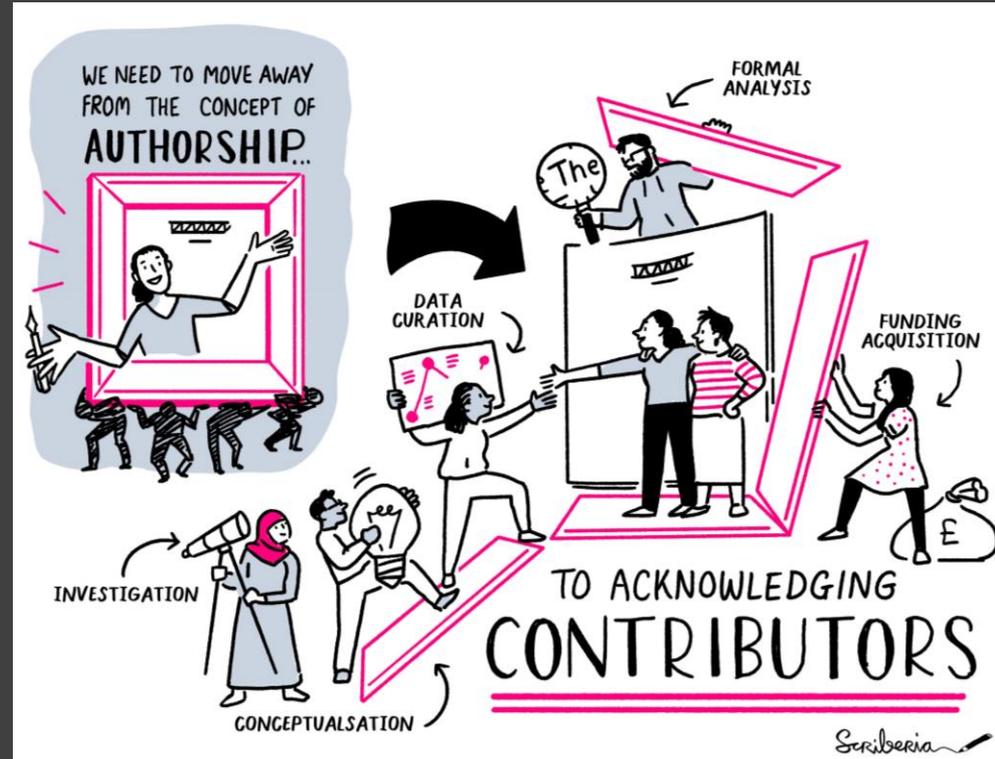

Makes your data more FAIR

- More findable
- AND you take more care to make it:
- More accessible
 - More interoperable
 - More reusable

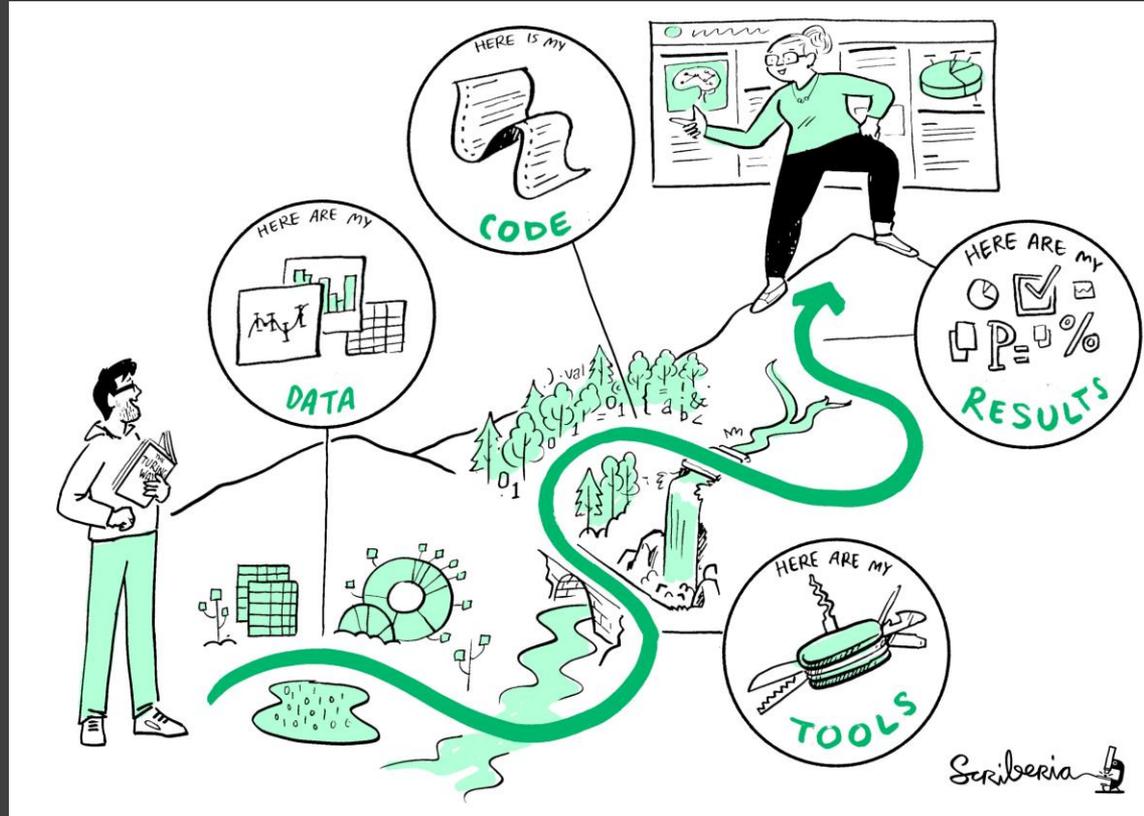

Get credit for your dataset

- Sustainable and reproducible research practices often receive less credit so get some!
- Equitable authorship

Reproducible research

Transparency =
Reproducibility =
Research quality

ELIXIR-UK FAIR Data Stewardship Fellows

Applications open - deadline 10 July 2022

RDM bites

Asynchronous
training

F2F courses

Aims:

- Community Network
- Embedding practice
- Professionalise role

[Link to fellow application information](#)

Useful resources and links for data management and publishing

- *The Turing Way*
 - Research data management chapters
 - Data papers
- Elixir-UK
 - RDM kit – and soon to be released! *RDM bites*
 - FAIR cookbook
- FAIRsharing – a collection of standards, policies, tools
- FAIRSFAIR

Thank you!
