

Project: Go Zero

Giving Voice to, and Empowering Stakeholders of UKRI DRI: A Net Zero Workshop Series (Go Zero).

Abstract

Different digital research infrastructure (DRI) stakeholders need help to understand and plan for meeting net zero challenges. Many of the skills and knowledge needed to solve net zero challenges are already in the community – but we lack the mechanisms for sharing them and enabling behaviour change.

This project will lead a series of participatory workshops which will be undertaken with the aim to connect and enthuse the DRI community in order to meet the net zero challenge. The workshops are designed to empower all stakeholders to take ownership of the path to net zero. Making.

Institutions and representatives for the project

Brunel University London - Danae Manika

Heriot-Watt University - Susan Krumdieck

Science and Technology Facilities Council - Dawn Geatches

University of Reading/National Centre for Earth Observation – Niall McCarroll

National Oceanographic Centre - Justin Buck and Alvaro Lorenzo Lopez

Funding information

This project has been awarded a total of £100,000.00 by the UKRI Net Zero DRI Scoping Project (NERC project [NE/W007134/1](#)). This funding is split between the institutions listed above.

Additional information

The UKRI Net Zero DRI Scoping Project will produce clear evidence and recommendations for a roadmap for the UKRI and their community to deliver carbon neutral DRI by 2040 or sooner.

The Go Zero sub-project was selected for funding via a sandpit event in May 2022. The proposals from teams were assessed on three factors; their excellence, potential to produce conclusive evidence and clarity of planning.
