Basics & Benefits

What is EOSC?

The **European Open Science Cloud (EOSC)** is an initiative to connect existing research

- ★ to make it easier to find, access, and reuse research results, tools and services
- ★ to support data storage and analysis
- ★ to link data sets across disciplines and borders
- ★ to foster innovation and synergies
- ★ to enable new and unexpected discoveries

EOSC aims to:

- ★ provide researchers access to data and results
- ★ connect scattered data and results
- ★ manage different types of data
- ★ handle the increase in data volume
- ★ facilitate data publications and sharing of data
- ★ foster multi-disciplinary collaboration

What makes data FAIR?

Findable	Accessible	Interoperable	Reusable

The FAIR principles ensure that data can easily be reused and incorporated into EOSC, benefiting researchers across Europe and beyond.

Access to EOSC

The European Open Science Cloud includes a wide range of regional and thematic communities.
There are several ways to get involved in shaping EOSC:

How researchers **benefit** from EOSC

- ★ easier access to data and publications
- ★ easier access to tools and services
- ★ advantages of reusable data
- ★ higher visibility for their research and data
- ★ new research opportunities thanks to multi-disciplinary approaches
- ★ access to services of the EOSC portal: eosc-portal.eu

How researchers can **contribute** to EOSC

- ★ make your data FAIR
- ★ become active in research data management
- ★ raise awareness for the importance and potential of FAIR data
- ★ use tools and data from EOSC and increase their visibility
- ★ make sure your institution knows about relevant EOSC services
- ★ benefit from the EOSC-Pillar Ambassadors Programme: eosc-pillar.eu/ambassadors-programme
